

# EAGLE EYE

## Authorities On Campus Speak

By Bill Frank

Two weeks ago, an alert Eagle Eye reporter passed by a Mack truck, which he learned later, contained a large globe and a used computer. He heard an interesting conversation between the two objects, which went something like this:

Globe—Hi! You must be the used computer I've heard so much about. I understand we've got a lot in common. Computer—We certainly do. I heard that we both cost somewhere in the neighborhood of \$15,000.

Globe—Well—plastic is expensive these days. What's your excuse?

Computer—I don't need one. I came cheaper than I should have. The thing that interests me is that we were both already bought with library funds.

Globe—No kidding. How'd that happen?

Computer—The students didn't hear about it, I suppose. But then the administration obviously knows what they're doing.

Globe—(proudly) Obviously!

Computer—I don't know about you, but I suppose the powers that be have some kind of course set up where

students can use me as a learning tool. They would never have bought me for their own convenience.

Globe—I still have a few problems to work out—students won't be able to see Greenland. But then I am only the \$15,000 model. The \$20,000 model is equipped with a ladder.

Computer—We must be very important to the students. After all, we've had to compete with \$30,000 worth of books.

Globe—Ha! I'll bet powers that be didn't even have to think twice. Why, did you know that I can teach a student all about the world (except Greenland) in one or two hours? Isn't that exciting? Now they won't have to spend a whole semester learning about me.

Computer—That certainly is exciting. I can hardly wait to hear what they've got lined up for me. I've never worked with students before.

Globe—Yes, the powers that be certainly knew what they were doing when they bought us.

Computer—(proudly) Obviously!

Well

### Deserved!?

Praise is extended to the marvelous planning for one elevator to connect the upper and lower campus.

the designers of the parking lots for their promotion to the employment in the Federal Government - they are now making postage stamps.

Harrisburg for the prompt action in having Raub Hall air-conditioned. Perhaps the science department could devise a method to collect the cold air from the heaters in Raub and save it for a summer worth's cooling process.

the cafeteria for their super-fast serving lines.

the maintenance crew for having decided to dispense with the salting of the walks. Next winter everyone will go to class on ice skates.

the SCC Board of Directors for attending so many meetings.

the powers that be who have amended the Liberal Arts reading list. L.A. majors now must read 80 comic books.

good planning for the shortage of books. 3rd floor books will be moved to 2nd floor so that 3rd floor may be renovated for a replica of the universe.

## Letter Policy

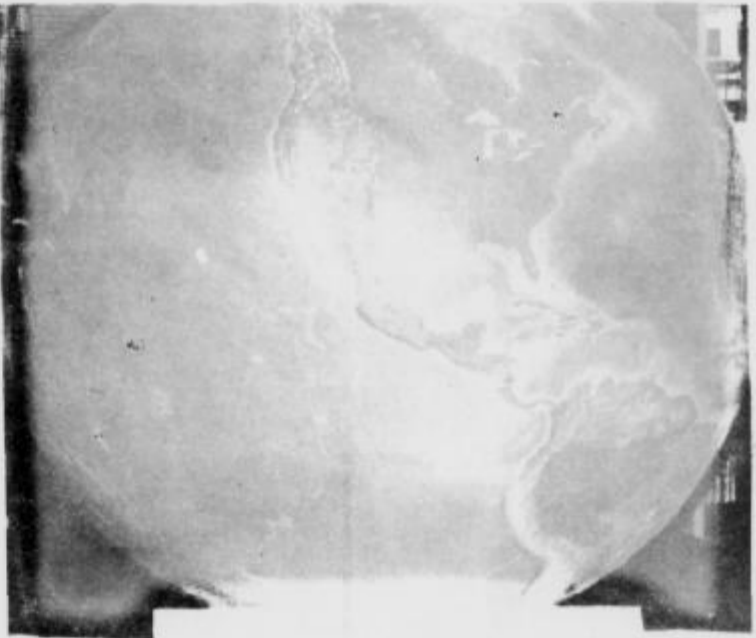

Eagle Eye will accept letters to the editor only if they are in compliance with the views of the bigoted editor. If letters do not agree with the editor's views they will be burned at a mass bonfire held once every month.

Although letters must not be libelous they need not be written in good taste—simply agree with the editor.

The population bomb keeps ticking...

Litter. It's enough to make you sick.

With the shortage of off-campus housing available to LHS students - may we suggest circular living inside the globe?

## Sought-After Globe On Display At LHS

LOCK HAVEN - The largest and most accurate relief globe is now on permanent display on the ground floor of Stevenson Library, Lock Haven State College.

The original was constructed by Rand McNally over a two year period at a cost of \$450,000.

The LHS model is a replica of the globe used by N.A.S.A. in their astronaut training program. It is painted to represent summer vegetation in both hemispheres, with varied shades of blue indicating ocean depths. A similar model is located at the United States Military Academy at West Point N.Y.

The globe, which measures over six feet in diameter, was shipped in two hemispheres which fit precisely at the Equator, and was assembled on the ground floor of Stevenson Library, near the children's library section. The axis is inclined 23 1/2 degrees from vertical to correspond with the inclination of the earth's axis. The globe makes one entire revolution every three minutes. A mirrored base allows the viewer to see the bottom portion easily.

The original was developed under the direction of Kenneth S. Fagg, noted cartographic illustrator. Authenticity was assured by a consulting staff of experts from the American Geographical Society, Columbia and Clark universities, and the United Nations on permanent display on the ground floor of Stevenson Library, Lock Haven State College. Reproductions are fabricated of epoxy reinforced with Fiberglass laminations, the most stable and durable casting medium currently available.

The Fine Arts Building at Lock Haven State College seen from a photographer's view. What a beautiful addition to the campus!

Congratulations are extended to the LHS Music Department for their fine selection of new band uniforms. The plumes on the hats are especially colorful.

# Vast Changes Implemented In Phys. Ed. Dept.

by "Duty" M.

Come next year, Matthew G. Minton, head of the Lock Haven State College health and physical education department has announced he will change his whole philosophy of education.

Informed sources say that Matty G. will dump his traditional crew-cut and grow locks to his shoulders, sporting a bright, new, red, white, and blue headband and let it all hang out.

It has been learned that Matty G. has approached President Francis N. Hamblin and received his approval to change the name of this institution from Lock Haven Normal School to Lock Haven State College. Fran didn't want to hurt Matty's feelings, so he didn't tell him the college hasn't been a normal school for more than 50 years.

Goat Completely Mad

The good doctor has gone completely mad giving approval to a recommendation by the coaches in his department. The department sought and received

approval from the admissions office on lowering entrance requirements for athletes. The decision rendered now makes it mandatory that athletes only have to put an X for their name on their admissions application.

Vast changes will be made in the phys. ed. department itself.

Bob Weller has been given permission to take a few days off next year to participate in the Masters Golf Tourney in Augusta, Ga. with Arnold Palmer. Bumbling Bob felt he should make the jump from mediocre tourneys in North Carolina and step up with the 'Big Boys.'

Smith Requests Change

Dr. Charolette Smith has requested a coaching change and would like to head the football staff. She says football has been losing too long and that her winning tradition speaks for itself. She feels that if Weller takes her field hockey position, he can finally experience a winning season.

Head wrestling coach Krazy Ken Kox is taking flying lessons

in hopes of achieving his pilot's license. He is doing this so when next year's NCAA tourney rolls around, he will have that extra seat on the plane. He forgot to count the pilot among the members in the plane for this year's trip.

Athletic director Steve Jacobs, in an attempt to get tougher competition on the basketball schedule, has again decided to schedule two different opponents for the same game. He also decided to cut the grid fans a break and schedule the Homecoming game away again.

Hopes of Winner

Since Jim Christopher still hasn't produced a winner here in basketball in his two-year tenure, he and Stan Daley have decided to combine efforts in hopes of winning at least half of the contests next season.

Edinboro State College, host of next year's Pennsylvania Conference wrestling tournament, has asked Christopher to head the ticket selling committee for

tourney because of the good job he did at this year's tourney.

SCC has granted an extra allocation to the football coaching staff to equip the coaches with decent clothing for the football games. The board of directors felt that certain coaches shouldn't come out at the Homecoming game in a T-shirt and gym trunks.

New Requirements for Gym

Lester P. Zimmerman has announced that requirements for his gym courses will be easier than in the past years. To pass his course one must only complete a front 1½ over the field house; a back flip over Rogers Gym; and a double rip-up over the computer center.

It has been learned that the real reason cross country and track coach Jim Dolan purchased his 150-acre farm was to run the perimeter to help keep him in shape.

Charles 'Tod' Eberle, instead of working on his doctorate degree this summer, has decided

to enroll in barbering school. Tod feels he will save shelling out money when baseball season rolls around next year, when he again issues his demand for his ballplayers to get a haircut.

Athletic apparel will also be changed next year. Karl T. Herrmann, the Beau Brummel of the phys. ed. department, has been appointed as the buyer for the department. Karl T. has informed us that he has ordered flowered and psychedelic towels, pin-striped socks, and purple and lime green fluorescent athletic supporters for next year.

An avid LHS athletic supporter commented that if all the changes proposed are implemented, it could be an interesting season next year in all sports.

## Rock Festival To Hit LHS

by Ann Margaret

Well, Lock Haven State College has finally hit national news. LHS will be the scene of the largest rock festival to ever hit the East.

In commemoration of the Centennial year, the college has received special funds to bring a few of the big name groups to the fest.

Because space is limited, we are not permitted to name all the groups.

However, just a few of those coming to the rock festival will be Chicago, Richie, Havens, Sly, Credence, Crosby, Steels and Nash, James Taylor, Joe Cocker, John Sebastian and one added attraction, Paul McCartney, George Harrison, Ringo Starr and John Lennon have decided to re-group especially for this festival.

Apparently one of the Beatles' mothers graduated from LHS and asked her son to do this as a special favor to her alma mater. Many thanks are extended to that Beatle mother.

The site of the festival will be our own practice field. If the crowd becomes too great, all campus buildings will be torn down and shoved to the side, to provide a larger seating capacity. So don't worry, everyone will get a seat. After the concert all buildings will be re-assembled.

The concert is FREE except for a small fee of 11¢ to compensate for travel expenses.

The newest recreational facility to hit the Lock Haven State College campus.

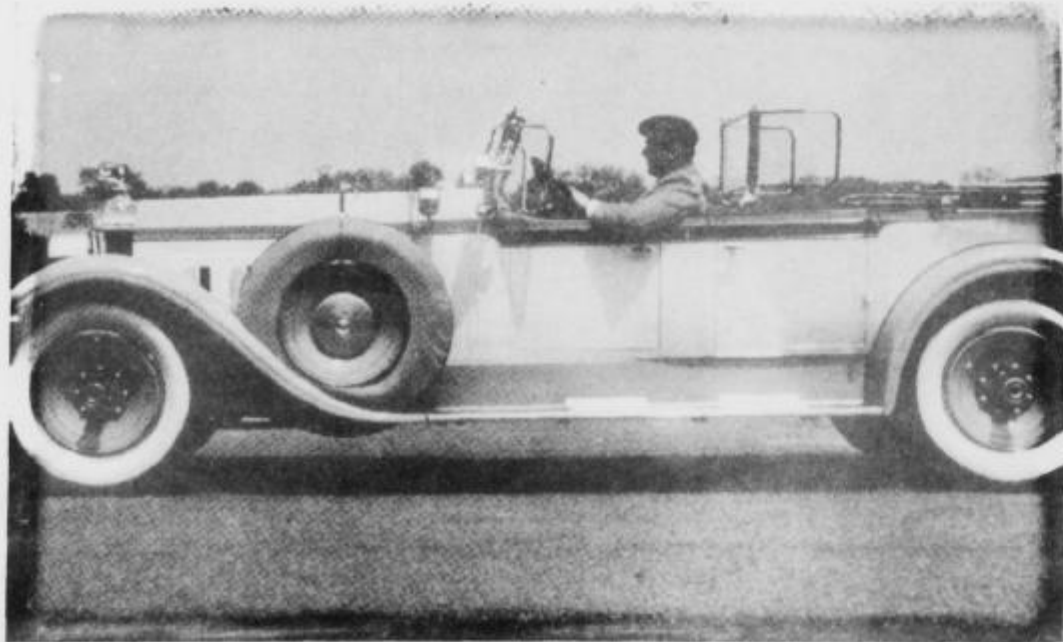

Eagle Eye

Merry Christmas

Wishes Everyone

Happy New Year

Colonel Latta sitting in the new SCC van.
