

Power Dev. Moratorium Sought

Washington, D.C. — A coalition of environmental organizations and American Indians have asked for a moratorium on all Federal action related to electric power developments they fear will devastate the heart of the scenic southwestern United States.

The Native American Rights Fund, Environmental Defense Fund and National Wildlife Federation told Interior Secretary Rogers Morton a mammoth system of coal-fired power plants, strip mines, high voltage transmission lines and related developments seriously threaten the fabled Four Corners area of Colorado, Utah, New Mexico and Arizona.

The first plant of the system has been operating since 1964 at a site on the Navajo Indian Reservation near Mesa Verde National Park. It emits more particulate matter daily than New York City and Los Angeles combined. Four more plants are under construction and another in final planning stages. Smoke from the first plant alone has covered up to 10,000 square miles and was the only man-made object visible in a 1966 photograph taken from Gemini 12 at an altitude of 170 miles. When all six plants are in operation they will daily emit an estimated 200 tons of fly ash, 1,365 tons of sulphur oxides, and 1,000 tons of nitrogen oxides. The groups contend these emissions will blanket the Four Corners area with smog potentially hazardous to human health and the fragile desert ecology.

They contend too that the plants' tremendous demands for cooling water from the already saline surface waters of the Colorado River Basin could have serious impact on resident Indians, damage agriculture in the fertile Imperial Valley and aggravate existing water squabbles between the U.S. and Mexico.

According to NARF, more than half of all American Indians living on reservations will be subjected to the air pollution and strip mining operations threaten to despoil areas of unique religious significance to the Navajo and Hopi.

More than 16 million Americans visited the six National

Parks, three National Recreation Areas and twenty-eight National Monuments subject to air pollution from the power plants. Tourism ranks second or third in each of the four state economies.

Involved Federal agencies have filed estimates of potential environmental impact for individual pieces of the total project. However analysts from the three organizations claim all are woefully inadequate and completely ignore the National Environmental Policy Act mandate for a report on the cumulative environmental impact of the whole system.

A spokesman for the groups said the requested moratorium would give the Federal government time to do the required environmental studies which will be vital to the utilities if they are to fulfill promises to minimize the environmental impact of the Four Corners development.

The powerful U.S. Senate Interior and Insular Affairs Committee called the Four Corners situation "a classic example of the clash of divergent needs" and scheduled field hearings for May 24, 25, 26 in Albuquerque and Farmington, New Mexico and Salt Lake City.

Earth Week
April 18-24
Pres. Richard M. Nixon

Environment New Topic For Foreign Affairs

WASHINGTON (WCNS)— Foreign policy suggests security, diplomacy and power. But in his state of the world address of Feb. 25, President Nixon moved beyond this level to consider "an increasing range of problems which are central to our national well-being.

Pollution. The Oceans. Population Control. Crime and Narcotics. Natural Disaster. These issues formed the basis for his approach to "global challenges—the new dimension in foreign affairs."

The environment, Nixon told Congress, is now being accorded a special place at international roundtables. The United Nations, he said, is preparing for the 1972 Stockholm Conference on the Human Environment; the UN Economic Commission for Europe, the Organization for Economic Cooperation and Development, NATO's Committee on the Challenges of Modern Society, and the Inter-Governmental Maritime Consultative Organization—they are all addressing the problems of pollution of the sea, land and air.

NATO discussed oil spills at a conference last year. European nations will hold a conference in Prague on their concerns. And the growing number of bilateral discussions between the US and other countries is producing a new awareness of the "costly measures needed to protect the environment."

Cost notwithstanding, the President mapped out seven areas of future discussion on the ecology issue for international conferences: identification of pollutants; establishment of a world monitoring network to keep track of pollution dangers; exchange of experience and knowledge; establishment of air and water quality criteria

and standards; development of environmental guidelines; comprehensive international action programs; development of training and education programs.

An "oceans policy" for the 1970s, Nixon continued, will include his proposals of last spring on the rights to natural resources in the seabeds to the depth of 200 meters and a twelve-mile limit to territorial waters off a nation's coast.

US initiative in this field at the UN last fall, he said, was widely welcomed "as a step toward organizing necessary international negotiations," and has led to the call for an international conference in 1973.

In combating the narcotics problem, Nixon said the US has asked the UN "to develop a plan for the provision of new economic opportunities for poppy growers, and the education and rehabilitation of addicts."

The President also reported that progress has been made on the hijacking problem with the signing of a new treaty at The Hague at the end of 1970.

Disaster relief, another international problem addressed by the President, deserves "development of a more rational approach by the world community."

Finally, the President looked forward in his global review to a greater degree of international exchange of scientific and technological know-how. We should "view our preeminence as an asset to be invested in building effective partnerships with other nations to create a world pattern of open sharing" of knowledge.

In ending his 235-page report to Congress, President Nixon urged the American people to forge "a partnership of purpose . . . For all nations we visualize a partnership that will make this planet a better place to live."

Tom Jones At Hershey

Hershey, Pa. — Tom Jones, the 29 year old Welsh singing superstar has been set for an in-person concert appearance at Hershey Stadium Friday night, June 18, at 8:30 p.m. Rain date for the event is Monday, June 21, at the same hour.

The Tom Jones Show stars Tom Jones, musical director Johnny Spence, Pat Henry, the Blossoms, and the Jeff Sturgens Universe and will be produced "in-the-round", with the stage and 30-piece orchestra placed in the center of the football field. Over 17,000 seats, including permanent and bleacher, will be available for the event, plus 3,000 "grass sitting room" general admission locations.

Tom Jones was named "Entertainer of the Year" by the Friar's Club, the elite and exclusive group of American show business personalities, probably the most outstanding accolade of Jones' career to date, an incredible achievement for the singer, who began singing for his living little more than five years ago.

A bus will be leaving for Washington, D.C. Saturday morning at 6 a.m. and will be returning late that night. The purpose of this trip is to give students an opportunity to participate in the student Mobilization March that day. There will be a charge of \$2.00 for each student going.

Tuition Rises To Be Discussed At Conference

Deciding what efforts can be employed to avert further tuition rises and budget cuts by the legislature will be a high priority topic at the 33rd annual Conference of the Pennsylvania State Association of Student Governments, April 22-24, at Indiana University of Pennsylvania.

More than 130 student government members from the 13 state-owned colleges and Indiana University will assemble at IUP for the three-day conference opening this morning with a welcoming address by Dr. William W. Hassler, Indiana president.

Delegates to the conference, to be chaired by new PSASG president J. Robert McLaughlin of West Chester State College, will discuss and resolve certain issues important to all state colleges. Agenda items will include not only on-campus issues but also the difficulties in communicating the urgent needs of the state colleges to the Pennsylvania public and legislature.

Helping to alleviate some of the communications problems will be Samuel F. Furgieuele, IUP's director of public relations and president of the Alumni Council of the Association of State College Organizations (ASCO), the counterpart to the PSASG on the faculty administration level. He will address tomorrow's general assembly of delegates on ASCO reorganization.

Another speaker will be Tony Scoblick, a defendant in the "Betrigan" case currently being heard in Harrisburg. He will deliver his talk to the conference at 8 p.m. this evening.

In addition to the scheduled speakers, the conference agenda will include the forming of various committee and discussion groups to deal with such areas as racial affairs, judicial systems and legal awareness the student's role in campus affairs, and the college curriculum.

Manufacturer Aids Students In Job Hunt

With the job market this summer expected to be at an all-time low for student employment, GoldTec, Inc., a fire extinguisher manufacturer based in Chicago, Illinois 60646, has divided a college student, summer, self-employment program.

Mr. Richard D. Marmor, Marketing Vice President, said "we have geared the concept of the student program to be of a self-help nature, enabling students to create jobs themselves," he explained that the program was geared to aggressive young men and women who would like the experience of self-employment, further stating "even approaching this on a part-time basis, a student could earn \$10-\$15 or more per day."

On the question of motivation, Mr. Marmor said, "Certainly, our country is in business to make profits, but there is no reason why we can't benefit others while we're doing it. After all, the summer-employed student is after profits too. . . there's an added bonus for the student as well, in that he will be valuable on a year-around basis thereafter."

The company is making applications and information available by mail from its main office: GoldTec, Inc., 4001 W. Devon Avenue, Chicago, Illinois 60646, and in most college placement offices.

SCC Officers Installed

Last night's SCC meeting was highlighted by the installation of the new Executive Board officers. Those taking office were: President, Gary Worthington; 1st V.P., Steve Podgajny; 2nd V.P., Ron Jury; Recording Secretary, Cathy Zeinicki; Corresponding Secretary, Nancy Landon; Treasurer, George Bower; and Parliamentarian, Owen Conaghan.

President Worthington asked the Board to take back to their respective groups the rain of encouraging students to participate in several meetings next Thursday with members of ASCO. Representation will be here at that time to discuss any problems at LHS with students.

In other business, Worthington expressed his desire for any ideas or suggestions to be brought to the Executive Committee for its consideration.

A motion was passed to transfer the remaining funds of the SS-IRC to help pay the cost of a bus to Washington, D.C. Saturday.

In addition, funds from the Union Committee will be transferred to finance the remainder of the trip. The 38 passenger bus will leave LHS at 6 a.m. and will return late Saturday night. There will be a charge of \$2.00 from each student going to help pay the over-all cost.

Tickets to the Maxwell Taylor lecture are available for distribution at the reception desk in the Parsons Union Building.

One ticket will be given to each student and faculty member if identification is presented showing affiliation with Lock Haven State College.

General Taylor is presently Chairman of President Nixon's Foreign Relations Board, and was formerly Chairman of the Joint Chiefs of Staff. General Taylor's presentation will deal with the realities of Vietnam and the United States' military role throughout the world.

Honor Society Being Formed

A new type of honor society, open to students studying all disciplines, is being organized. Formerly, each honor society was only open to students engaged in a specific area of study or interest.

Phi Kappa Phi, initiated by Dr. Paul F. Klens in 1967, has selected members for the fall.

Dr. A. H. Crosby expressed hope that the local chapter will become a national chapter as soon as possible.

According to its Constitution, PKP is, "An honor society dedicated to the unity and democracy of education and is open to honor students from all departments of American universities. Its prime objective is to emphasize scholarship and character in thought of college students."

Criteria for membership in PKP will be that all juniors must be in the top 5% of their class and seniors must be in the top 12½%. The total from each class cannot exceed 10% of those eligible for graduation.

The seven original members of PKP at Lock Haven State are: Don W. Crews, Alan H. Crosby, Francis N. Hamblin, Paul F. Klens, Margaret Mercer, David Salstrom, and Bruce E. Thomas.

Alan H. Crosby is serving as president while Charles G. Klingman is the newly-elected vice-president and Bruce E. Thomas is secretary-treasurer.

Student members of Phi Kappa Phi are: Denise Asp, Melinda Barnhart, George G. Bierkamper, Gunhild Chuber, Kathleen Clough, Marcia K. Conway, Deborah Ann Eck, Marilyn Gardner, Joan Y. Getz, Gary B. Harris, Charles G. Klingman, James J. Lebda, Kathleen E. Nicoletti, Elizabeth Pettingill, Jessica E. Snyder, Mary L. Strouse, Gloria Strubeck, David A. Witmer, and Darwin C. Zeigler.

Women Netters Lose To PSU

"We were simply out-psyched," commented Coach Barbara Berry after her women's tennis team lost 5-2 to Penn State University Tuesday. "We are very strong and we carry the strength all through. I feel the match was close and could have gone either way, but Penn State is a tough team, certainly the best we'll play this season."

This was the opening match for the women netters. Last year's 4-1 record was the best in the history of the college. With seven returning letter winners, Coach Berry is hopeful for at least as good a record this year. Left on the schedule are Gettysburg College, Mansfield State, Bucknell University, all at home, and Susquehanna University at Susquehanna. Lost from last year are Millersville State and Slippery Rock State who went to a fall schedule.

Scores in the singles matches were: 1. Missy Niebel (PS) over Alice Rutkowski (LH) 6-1, 6-3; 2. Debbi Holland (PS) over Sue Heckendorn (LH) 6-1, 6-2; 3. Joan Wohlgemugh (PS) over Pat Brunner (LH) 6-3, 6-2; 4. Mary Overington (LH) over Adenne Hendricks (PS) 6-4, 6-3; and Mary Lou Rodger (PS) over Pat Shearer (LH) 6-4, 6-4. Doubles matches: 1. Carol Rebeck and Diane McMillen (LH) over Candy Roger and Judy Zoble (PS) 6-1, 6-2; Tanya Romanice and Sandy Turner (PS) over Gail Engelking and Pat Sammons (LH) 5-7, 6-1 6-3.

The lady netters will meet Gettysburg College on April 27 at 3 p.m. on the college courts.

Ecology Clean Up

Here's your last chance to help clean up your campus! On Saturday the 24th we will again attempt to finish cleaning the stream and gully in front of High Hall. All equipment, including buzz-saws, trucks, and drivers, will be there to help haul the debris away. Last week we only finished half the job, so why not help us finish it and make our campus something nice to look at? Meeting time will again be at 8:00 a.m. in front of the GSA (that's the little white building in front of the stream). So please make plans to be there and help us clean YOUR CAMPUS!

Nixon Proposes Clean Up

WASHINGTON, DC (WCNS)-The nation's fouled waters stand second only to air among those segments of the environment the Nixon administration is determined to clean up.

"We have the technology now to deal with most forms of water pollution," President Nixon told Congress in his February environmental message. "We must make sure that it is used."

The most dramatic examples of water pollution are the 10,000-plus oil spills that occurred last year. Under the Water Quality Improvement Act of 1970, signed by the President on April 3 1970, oil spills caused by vessels and oil spills can now cost a polluter up to \$14 million for spills caused by vessels and \$8 million for those coming from onshore or offshore facilities.

Water pollution is also caused by inadequate sewage treatment plants, especially those located on inland waterways and lakes. The first step toward remedying this kind of pollution was a record appropriation in 1969 of \$800 million for more construction of sewage plants. This year's \$1 billion construction budget ends this five-year program.

A new sewage-plant construction program is up for consideration by Congress this year. The Administration wants \$12 billion spent over the next three years (50% federal money), as well as an Environmental Financing Authority to help finance municipal bonds for plant construction. Industries would pay a users fee to cover whatever it costs to process their wastes.

To control dumping into rivers and lakes, the Administration rejuvenated the 1899 Refuse Dumping Act in December. Industries must now obtain permits from the Environmental Protection Agency (EPA) certifying that their effluents meet state and federal water quality standards. The President's 1971 program calls for revised standards and an eventual \$30 million worth of grants to state water offices for expansion of their programs.

Another aspect of water pollution under scrutiny by the Nixon administration is ocean dumping.

"Our national policy should be to ban unregulated ocean dumping of all wastes," President Nixon told Congress in his February message, "and to place strict limits on ocean disposal of harmful materials."

Working from a Council on Environmental Quality (CEQ) report he ordered last year, the President asked Congress to require permits before dumping any materials into the oceans and lakes, and to seek international accord on banning dumping on the high seas.

Finally, to dramatize his concern for the well-being of the nation's waters, the President permanently halted construction on the Cross-Florida Barge Canal in January after 30 years' work.

"We must assure that in the future," he said, "we take not only full but also timely account of the environmental impact of such projects--so that instead of merely halting the damage, we prevent it."

Netters Win

The Lock Haven State College men's tennis team put their season record at 2-1 Monday when they defeated Slippery Rock State College 5-4 in a very close match.

Joe Castagnola, who is undefeated in single matches, has been the backbone of the men's team thus far this season. Freshman Scott Karcher also contributed to the victory with a singles win.

Coach Herrmann isn't making any predictions; however, if the team lives up to its potential, it would achieve the best win-loss record in the school history.

Saturday afternoon at 2 p.m.

the team is scheduled to play at Millersville State College. LHS will be looking for its first win against this usually strong conference team.

The Eagles only loss was a 7-2 decision to Mansfield State.

Basketball Clinic Here

Robert Davies, former star of the N.B.A. Rochester Royals will conduct a basketball clinic in Thomas Field House at 7:30 p.m. tonight.

A native of Harrisburg, Davies began his court career at John Harris High. In his junior and senior years at Seton Hall University he was named All-American.

During his ten years with the Rochester Royals, he was named All-Star Pro seven times, and captained the Royals for four seasons. He had earned the title of the league's most valuable player during his second season.

According to "Sport" magazine, he ranks as the sixth greatest basketball player of the first half-century.

In 1968, he was inducted into the Pennsylvania All Sports Hall of Fame. Recently, he was elected to the Basketball Hall of Fame and to the N.B.A. Silver Anniversary Team.

As head coach of the 1946-47 Seton Hall basketball team, he compiled a record of 24 wins and only three losses. Prior to accepting his present position as a staff member of the Converse Rubber Company, New York, he served as head coach of basketball, soccer, and golf at Gettysburg College.

**Bring all the GI's Home Now
End the War Now!**

**March in Washington
and San Francisco April 24**

EVERYTHING FOR THE COLLEGE MAN

John Marshall

Main Street

To the editor:

We are in the final week before the massive demonstrations in Washington and San Francisco for immediate withdrawal from all Southeast Asia now. The demonstrations have gathered the largest sponsorship of any action in the history of the movement to end U.S. involvement. From Senators to trade unionists, we can expect the turnout on the 24th to be impressive and powerful.

However, it is the students who have been the real backbone of the struggle for peace. It is the massive participation of students in demonstrations like April 24th that give them oomph and size. And, it is demonstrations like the 24th, that express the deepest wishes of America's students for an immediate end to the war.

In this final week, we call on you as leaders of students and as editors to push something else aside this week in order to include the enclosed ad for the 24th. It is an ad signed by active duty GI's in Vietnam asking us to march for them on the 24th to show that they want to come home now. It can help in the final push to maximize the size and impact of the demonstration.

Also find enclosed an ad announcing the National Moratorium Against the War and in Commemoration of Kent and Jackson States for May 5. This national moratorium on "business as usual" has been called by a broad spectrum of organizations in the student movement, from the National Student Association to the College Young Democrats. As sponsors of these actions, we would like to urge you to include this ad in the week following the 24th. It is our feeling that the tremendous antiwar energy generated by the April 24th actions will cry out for further actions to allow expression of our outrage at the continuation of the war and in memory of our brothers and sisters killed last year. We are confident that in local areas, significant rallies, marches and other actions will be planned.

We hope that you will agree with us on the importance of these actions this spring. If they are truly massive and powerful, they can take us a giant step closer to the end of the war.

Hope you join us in Washington or San Francisco on the 24th.

Yours for peace now,
Debbi Bustin
National Coordinator,
Student Mobilization Committee

Barry Holtzclaw,
President,
United States Student Press
Association

**Help us save
man.**
