Employment opportunities outlook improves for 75 graduates

Employment of this year's college graduates is expected to be up considerably from last year's level, although prospects are not the same in all fields. C. Herbert Larson, Jr., director of the Office of Career Services, reports that the strongest demand is anticipated for engineers and accountants. Liberal arts and education majors face the least favorable prospects for jobs.

Surveys of anticipated hiring were made by the College Placement Council, Inc., and based on information from 697 employers. According to the council, employment of new graduates in all disciplines and at all degree levels is expected to be 11% higher than overall hiring in 1973.

Social Workers in Luck

Excellent employment opportunities await social workers with graduate degrees, with a favorable outlook through the 1970's for those with bachelor's degrees. Competition may increase in the 1980's.

For those in computer science, the occupation enjoying very rapid employment growth is systems analysis, as data processing systems are expanding. Computer operating personnel and programmers also face rapid job growth, although a declining demand for key-punch operators exists because of improved methods of data entry.

Accountants should expect excellent opportunities, those with college degrees being in greater de-

mand. Economists, however, may find keen competition for better jobs in colleges and universities. Those holding a bachelor's degree will find the best openings in basic research.

A good job outlook exists for psychologists and employment counselors. Clinical and counseling psychologists should fare better than those wanting to teach or do research in large colleges and universities, where there is some competition.

Supply exceeds demand

Teachers in both elementary and secondary education will continue to be caught up in the "supply exceeding demand" dilemma. Some relief: a recent survey found teacher shortages in mathematics, industrial arts, special education, and some vocational-technical subjects.

Although the overall opportunities look favorable, some librarians may have to compete for the jobs of their choice. Best employment prospects are in public and special libraries. Home economists, despite an anticipated slow growth in employment, will find openings due to death and retirement.

Geologists will find favorable opportunities at all degree levels if past patterns of entry into the field continue. Conversely, foresters will find keen job competition due to the probable graduate number exceeding the amount of openings. Opportunities will also be affected by increased use of forestry aides.

Favorable job prospects are in store for chemists and physicists, primarily in research and development. Increased openings in the fields of atomic energy, environmental control, and urban development have resulted in jobs for engineering and science technicians.

Engineers will see moderate growth in the fields of chemical and aerospace engineering. More jobs are emerging in the rapidly expanding fields of civil, electrical, and industrial engineering. Broadcast

Discussion tonight on LHS queen

Maybe not Convention Hall, maybe not Bert Parks, but it has all the markings of a meaningful pageant.

In the past, Lock Haven homecoming queens were sponsored by an organization and elected entirely by the student body.

This year the homecoming committee will stage a pageant increasing the meaning of the contest. The program will be styled near to the professional

Rockathon: source for hearing aid

Sisters of the Delta Zeta sorority rocked for 34 hours straight last Thursday and Friday to earn over \$800. Thanks to the sisters, a Renovo seventh grader will receive a hearing aid.

According to Barb Eveland, chairman of the project, most of the money earned is in the form of pledges which will be collected this week. Over \$200 came from direct contributions at the Rockathon cite where five chairs were manned during a marathon "rock".

"We were really surprised with the response of the students," stated Eveland in regard to the project's success. "We were pleased with the way everything turned out." The rockathon idea for this

campus came from Eveland, who knew it had been used successfully on other campuses. "We wanted to do something different," she said.

Kim Henry, the hearing aid recipient, will get her aid fitted and adjusted as soon as possible. The mechanism itself was donated by Mr. Robert Lynch. Remaining funds will be used toward the purchase of an aid for another child, who has not yet been named.

Eveland commented that the Delta Zeta's next project for hearing will come this spring with the annual "Kidnapping". Proceeds from this eve : will go to Gallaudet College for speech and hearing.

Today's Editorial

Crime Won't Pay

With the re-appearance of a full fledged student body the incidence of criminal activity has increased on our campus.

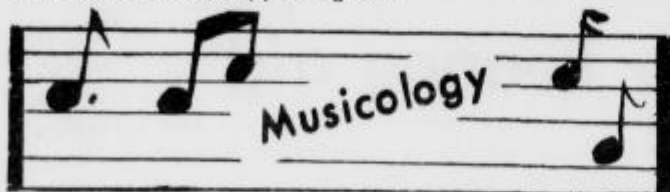

Perhaps we are attempting to keep up with the figure for nation-wide crime as presented by Attorney General Saxbe. In talking about this phenomenal trend, Saxbe cited the possibility of a national police force.

While we are sure that the campus will never turn into a police state, the current budget wouldn't permit it, many of the incidences reported to and investigated by the law enforcement and safety division are of a criminal nature.

Those pranks or dares that many of the offenders get caught up in are more than a joke when viewed through the eyes of the law. What started out in fun too often ends up as the beginning of a police record.

As the lyrics to a famous song state, 'You always hurt the one you love', and in the case of the youthful law offender no truer words could be spoken.

Anyone can have fun while in college and still not become part of the daily police blotter. Make sure that those moments of temporary insanity, some people call fun, don't jeopardize a career you may wish to pursue in the future. Felonies and misdemeanors are not written on police blotters in disappearing ink.

Leader of the pack

by Renny Miller

The following is part two of last week's consumer report, "Leader of the Pack."

Lug 35 pounds on your back, trample weeds and wade mud, run nature's obstacle course, and love every minute?

Last semester, Lock Haven State joined the national craze with the inception of a backpacking club.

The organization will soon be planning future trips. Experienced and new packers alike will be looking forward to the trips but an experienced person will probably return in better shape. The reason--selecting a backpack that is right for them.

A backpack consists of five parts: frame, shoulder strap, hip belt, backband, and the bag itself.

Frames hold the pack together. The hip belt on the lower frame transfers most of the weight to the hips. A good belt adjusts up and down for a proper fit. Padded belts are much more comfortable than plain. Half belts (made from hard material) are uncomfortable and cause the load to shift away from the body. Backbands permit ventilation, keep the frame away from the body, and distribute weight evenly. A broad mesh band is better than strips of webbing. Shoulder straps definitely should be padded.

The pack bag contains two compartments. The upper one is twice as large as the lower one. A large flap covers the upper compartment while the lower one zippers. On each side there should be two pockets. Some bags feature holes between the two compartments. These store tent poles and other long gear.

Most backpacks are designed to hold approximately 35 pounds. When packing, place heavy gear on the top and light gear in the bottom. This helps balance the load.

When purchasing a backpack, try it on for size. Never mail-order a pack. Most models come in small, medium, large, and extra large. Entire body size is not as important as torso size; a man may need a medium size if he has a small torso.

A hiker only has to lean forward very slightly if he is carrying a well-designed backpack.

RICHARD NIXON ENTERING HOSPITAL

Richard Nixon is entering the Long Beach Memorial Hospital today for treatment. There will be a daily news briefing on his condition.

FAMED AUTHOR DIES

Jacqueline Suzanne died of cancer in a New York City hospital. She is the well-known author of such books as *Valley of the Dolls* and *Once is Not Enough*.

Intramurals' season kick-off

by George Morrison

On September 18th this year's intramural football season kicked-off with its first six games. There are a total of 12 teams, 6 in two different divisions. Here's how the first meetings came out. KDR defeated Beach House 14-0 while Phi Mu Delta squeaked by 1st floor High 8-6. Sigma Pi upset 2nd floor North 15-8 and last year's defending champs Lambda Chi trounced 2nd floor High

46-0. TKE and 1st floor Gross fought it out with TKE squeezing by, 22-20 and the Vets shut out the Outhouse in a close contest 6-0.

This year's women's intramurals will start with field hockey and tennis. Tennis starts on September 23rd and the field hockey competition starts on the 24th. There are 10 hockey teams entered and 59 women have signed up for singles tennis.

Jayvees tackle first opponents today

LOCK HAVEN → The Lock Haven State College junior varsity football team will play three games during the 1974 season according to LHSC Athletic Director Stanley Daley.

The Bald Eagle JVs will be coached by head mentor Tod Eberle and assisted by Barr McCoy and student assistant Dave Baker. The two home games will be played on the new Hubert Jack Stadium turf.

Neighboring Lycoming College will furnish the

opposition for the home opener on Monday, Sept. 23 at 3 p.m.. The other home tilt is scheduled for Monday, Oct. 21 at the same time with new opponent Ithaca College of New York testing the Eagles.

The Susquehanna University junior varsity squad will host Lock Haven at Selinsgrove on Oct. 7 at 3 p.m.

Last season the Eagle JVs topped Lycoming by a 14-6 score and lost to Susquehanna, 34-13.

Death on gridiron dying out

The National Collegiate Athletic Association has announced a substantial drop in the number of deaths occurring through football. The 42nd annual survey of football fatalities reports fewer deaths occurred last year, than in the previous 21 years.

Dr. Carl Blyth and Mr. David C. Arnold, the report's authors, confess they are puzzled by the reduction of accidental fatalities. While it is difficult to explain the degree of accident reduction it is easy to explain what brought it about. The report suggests the following factors:

- (1) Better equipment as a result of increased research, particularly headgear.
- (2) Increased emphasis on physical conditioning.
- (3) Improved medical health care for the athlete.
- (4) Improved coaching techniques and rule changes.

The survey is part of the continuing attempt to

determine what causes football injuries. By determining an accident's cause, training procedures can be properly evaluated. Specific recommendations are then made to develop beneficial programs and eliminate harmful procedures.

Corner Kicks

by Gary Brubaker

Deadlocked in a scoreless battle at halftime, the Bald Eagle booters of LHS rallied for three unassisted goals in the second period to stun a tough Edinboro squad this past weekend on the Scot's home ground.

The Saturday afternoon contest, played in beautiful weather, saw Coach Herrmann's contingent outshoot the boys from E.S.C., 17-3 in the first half. But it wasn't until six minutes into the second stanza that the Eagles put a score on the board.

A great solo effort by Jon Conner made it 1-0 - a lead the boys from "the Haven" would not relinquish.

Taking a pass at midfield, the Eagle sophomore beat his man to the wing, racing outside downfield. Cutting horizontally across the field, and alluding two more Scot defenders, Conner tallied on a 12 yard shot to draw first blood for Lock Haven.

Getting into the act, Mike Seigfried scored on a "bomb" from 20 yards out on an unassisted play.

"Siggys" goal came less than one minute away from Lock Haven's initial score of the contest, making it 2-0 LHS. The Eagle offense was starting to click.

In what was deemed "a super-hustle goal" by Coach Herrmann, Roger Bernecker grabbed a loose ball away from the Edinboro goalie and pounded the ball home, 30 minutes into the final 45 minutes of the game. Leading 3-0 with little time to play the Eagles were practically assured a victory. It came fifteen minutes later.

The goal turned out to be the final one of the game - a game in which the Eagles out-gunned the Scots 31 shots to 9, and in corner kicks, 8-4. The whitewash marked the third consecutive shutout in 3 games for the '74 campaign.

Following the contest, a well-pleased Coach Herrmann commented, "This is the best we've played all season. Each time out we get better."

This year the Eagles have perhaps the most diversified attack they have ever had as a team. Every player is capable of pounding the ball in for a score, which is a big reason why the "Eagle Machine" has been virtually unstoppable so far this season.

The Booter mentor stated, "As far as giving special recognition to anyone, I would have to say Coach Mike Parker deserves a lot of credit. He's molded our back four of Mark Sildve, Mike McCartney, Al Rice, and Sandy Bush into a very effective group in such a relatively short period of time."

Roger Bernecker played a great hustling game, as did Sildve who played a strong game at sweeper," continued Herrmann. "McCartney continues to improve with each game's experience while Tom Rowan beat his fullback all day and hustled back well on defense, too."

"The best sign I saw all day," concluded Herrmann, "as far as team recognition goes, was when Edinboro's head coach walked up to me following the game and said, "We have a good team but your boys just out-muscled and out-hustled us." That statement speaks for itself.

The Eagles have one week off before hosting a tough Shipensburg eleven this coming Saturday at 12:00. Read the pre-lim story later this week in the Eagle Eye.

A. TREE GROWS IN MEMORY — The sisters of Zeta Tau Alpha planted a blue spruce on the lawn of McEntire Hall in memory of Teresa A. Frey. (picture by Lew Wertley)

Living memorial planted by ZTA sisters

The sisters of Zeta Tau Alpha have planted a tree in memory of Teresa A. Frey. The young blue spruce may be found on McEntire lawn and a plaque will also be placed there in the near future.

President Sue Ragan and membership representative, Kathy Barclay attended the National Convention at Vir-

ginia Beach this summer. The two hope to make use of the many ideas they received while there. The sisters have had several money making projects and have more ideas planned.

Rush begins Monday, Sept. 23 which all the sisters are preparing for.

discussion

continued from page 1.
television pageants.

The queen applicants must submit an application, and answer judges questions. If she is chosen she will proceed to the finals--pageant night. Judging will be in five areas: evening gown, readings, on-the-spot answers, talent, and swim suit.

A scholarship will be awarded to the queen by the Friends of Lock Haven. The functions of the new policy are:

1. to expose candidates to the student body equally and for a reason
2. to cut down on the chances of minority groups monopolizing the position
3. to eliminate the generalization that classifies Queen candidates as pretty faces with nothing behind them.

All those in any way interested should attend a meeting this evening at 9:30 in Bentley Hall. The new policy will be the topic for discussion.

AN EAGLE EYE CLASSIFIED AD COSTS ONLY .05 A LINE

People Places and Things

POSSIBILITY OF KARATE CLUB: A meeting of people interested in forming a karate club at L.H.S. will take place in Raub 205 at 8 p.m. on Monday, Sept. 23. New and advanced members are welcome.

Attention ALL PRACCO staff members! Important meeting Monday, Sept. 23, 6:30 p.m. in the Board room, Sullivan Hall. Everyone please attend!

The Wilderness Club of L.H.S. will hold its' first meeting of the year on Tuesday evening September 24.

This organizational meeting will take place in the North Lounge on the bottom floor of the PUB at 6:30 p.m. Any member of the college community who likes the outdoors is encouraged to come by for this informal meeting.

Plans will be discussed for the upcoming year.

job outlook

continued from page 1.

technicians are also expected to find favorable opportunities.

Teeth are big business

Teeth are big business, at least on the job scale. The demand for dental assistants, dental hygienists, and dentists continues to outstrip the supply. Dieticians also find job growth, meeting the needs for management in various nutrition and food fields.

A favorable outlook awaits licensed practical nurses and physical therapists, as health facilities expand. LPN's help to lighten the load of registered nurses. Increased recognition of the importance of rehabilitation and the growth of nursing homes has provided more openings for physical therapists.

Lawyers will find a moderate rise in employment, with the growth of legal action in areas such as consumer protection and the environment. Small towns and growing suburban areas offer the best prospects for establishing a new practice.
