

BRANDYWINE SINGERS HERE

500 Women Applicants Rejected On Dormitory Shortage; Bids Opened

Some five-hundred applicants to California State College were turned down for the fall trimester due to a lack of dormitory space according to Dr. Michael Duda, college president.

Dr. Duda said that the applications were not even processed. He noted that there is not the lack of housing space for men as for women.

This is due to the fact that most men can room in town or will commute.

In discussing the building program for the CSC campus Dr. Duda noted that bids were opened this week for the construction of a new women's dormitory along with a new addition to the Industrial Arts Building.

The new dormitory will provide room for 200 students when completed.

Two other dormitories, one for men and the other for women, are on the drawing board for 1965.

The new addition to the Industrial Arts Bldg. will include ten additional teaching stations—shops and classrooms—plus faculty offices and storage area.

The "moat" that presently surrounds the Industrial Arts Bldg., Dr. Duda said, is for heating pipes for the gymnasium which is now under construction.

This new gymnasium will contain eight classrooms and five gym stations. Besides one large gym which may be divided into smaller areas, there will be a corrective gym for use with the physically handicapped and an auxiliary gym for other uses.

Dressing rooms and a new swimming pool will also be part of the new building. The revised completion date is set for July 1965.

The second phase of this building program will be the construction of a new dining hall which will seat 1,200 at one sitting — 2,400 at each meal.

Dixon Hall will then be converted into faculty and administration offices. The present administration offices in Main Hall will be converted into classrooms.

The Dixon Hall facilities will be used by the administration until the construction of the future administration building. Also planned for this time will be a new education building with 20 to 25 classrooms, which will help to alleviate the classroom shortage.

The athletic plant will be constructed in the redeveloped area of Phillipsburg below the new gymnasium. Included in the facilities will be a stadium, ball fields, tennis courts and recreation areas.

Areas of the college farm are presently being renovated to provide additional recreational area for our students.

Herron Hall will also be used

Good Morning!

A new face for California Times.

Something long needed. It is the hope of the staff that this policy will carry for ever and ever and ever.

Summer school well on its way.

And it's going to be a long hot summer as the old saying goes.

Students have that difficult time in keeping the eyes open through the warm mornings and afternoons.

Once class is finished students are flocking to the beaches and swimming pools in an attempt to cool off.

Construction here at CSC proceeding at a rapid pace.

All new buildings will be a welcome addition to the campus.

Dr. Michael Duda, college president, points out that a lack of dormitory space has resulted in turning away a number of women students.

It is hoped this situation will be cleared in the near future.

New furniture for the Vulcan Lounge and Snack Bar.

With the tremendous use these two areas get new furniture is always a welcome sight.

Brandywine Singers to appear here July 8.

These are some of the fine attractions which make the college a popular mecca for all.

And with top notch shows like these it makes the summer a little more enjoyable.

California students are among those in France making a big hit.

This only goes to show that through it all we still have some

To Appear July 8 In Steele

The Brandywine Singers will appear in concert at Steele Auditorium on July 8, at 11 a.m.

The Brandywine's entitle their concert "Button Down Folk Music," a reference to the sophistication now being displayed by many folk impressionist groups.

The well known group had its origin on the campus of the University of New Hampshire.

The original group consisted of Ron and Rick Shaw and David Craig. Soon Fred Corbett and Hal Brown joined the group and the Brandywine Singers were on their way.

Appearances at the Inter-Collegiate Musical Festival and ABC-TV "Hootenanny" increased the popularity of the folk stylists.

Now the Brandywine singers are recording exclusively for Joy Records. Their songs include: "Mandy", "Two Little Boys," "Ya Me Vay" and "Dry Water."

The Brandywine Singers are a top calibre group and every CSC student should make an effort to be present at this performance.

Summer Group Numbers Nearly 2,000 Students

Nearly 2,000 students are attending summer classes here at California State College according to Dr. Harold Kemper, dean of admissions.

Broken down there are 1,050 students in the regular summer trimester with an additional 650 students enrolled in other summer sessions.

Another interesting note is the fact that 180 graduate students are

here this summer.

And still another credit to the college is the fact that ten special high school students are attending classes.

The second six week summer session will find another 100 students along with 40 to 50 next month for graduate work.

Dr. Kemper said this summer's enrollment is comparable with last years.

Along with campus activities a collegiate workshop with 29 students in it is being held in Monessen.

It was pointed out by Dr. Kemper that 3,200 students are expected to enroll this fall. This will include 725 freshmen. He said a lack of dormitory space has caused rejection of a number of applications.

Exams On Today

A national Cross Culture Examination is being taken by 140 volunteer students in Steele Auditorium

The sessions are three and one-half hours long, beginning at 12:30 and ending at 4:00 p.m.

This testing program, sponsored by the University of Toledo, is part of a nation-wide study to compare the teacher education program of the United States with that of Great Britain.

Students At Break

Over 1,000 students enjoyed coffee and doughnuts at the coffee break held recently by the Student Activities Assn. outside the rear of the dining hall.

Coffee was donated by the Standard Brands Co., and doughnuts

Prof Profile

By Leslie Sweitzer

Thomas A. Leavey has joined the faculty here at CSC as an Instructor in geography.

He completed his undergraduate studies at Slippery Rock State College and received his master of science degree from Pennsylvania State University.

He has taught in the public schools of Western Pennsylvania and Glassboro State College in Glassboro, N. J.

Mr. Leavey is teaching classes in geography and earth science. He and his wife now reside in

Students Are Hits In France

A contingent of students from the state colleges—including California—have made quite a hit with the French.

They've participated in teaching Sunday School and distributing stamps of United States presidents in addition to their studies abroad.

Barbara Wilkes of Crafton, a CSC co-ed with the group, taught Sunday School recently.

After some six months training with Mormon missionaries in France and Switzerland Miss Wilkes, a French major, taught the Bible in French.

She is one of 37 students from the fourteen state colleges attending the University of Besancon in eastern France. This is part of the Junior Year Abroad program.

As a future French teacher she has been instrumental in baptizing thirty Europeans for The Church of Jesus Christ of Latter Day Saints.

Dr. Wilbur R. Marisa, professor of modern languages here at California, is resident director in France for the group. He was accompanied by his wife and two children on the trip.

Teachers Here For Conference

The Annual Group Discussion Conference for elementary and secondary school personnel, sponsored by the Pennsylvania branch of the Secondary School Principals' Association was held here last week.

It is one of 13 held throughout the state in the spring and summer months.

There were over 500 teachers and administrators in attendance. Dr. Edward B. Corday, principal of Waynesburg High School, was the conference chairman.

The college co-ordinator for the workshop was Dr. Frank M. Naylor. The workshop acts as an in-service training program for teachers.

These teachers receive the opportunity to learn of practical solutions to problems in their fields of study and to view current literature concerning the problems.

The discussion of this year centered around the following problems:

- (1) What is the current status of the modern mathematics program in the elementary school?
- (2) What is the current status of the modern mathematics program in the secondary school?
- (3) What should constitute an effective business education program in light of today's time demands?
- (4) What criteria and techniques are suggested by teachers and supervisors to evaluate teacher effectiveness?
- (5) What is the role of the humanities in the secondary school program?
- (6) What is a good reading program (developmental and remedial) for the elementary grades.

Each discussion group had the service of a consultant who had done study in that specific field.

The teachers also had an opportunity to visit an exhibit of educational materials in Herron Hall.

STUDENTS

(Continued from page 1)

And the trip to France by the Pennsylvania students has met with high praise from a French official.

Professor Bernard Quemada, head of the language institute at the university said "The Pennsylvania group is one of the best that we have ever had. This is due to the quality of the preparation they received before arriving here."

He went on to say "The participants in the Pennsylvania program, through their hard work, have won the esteem of their professors and have also earned very satisfactory results in their examinations. As director I wish to express to the Commonwealth my complete satisfaction with this pioneer program." At the present time there are three European Universities sponsoring state language programs. The number will be expanded to five due to the need for more language teachers in the state.

Another project which CSC students participated in was the distribution of stamps of United States presidents from George Washington to John F. Kennedy.

LUNAR EXPLORATION DISCUSSED IN ASSEMBLY PROGRAM HELD HERE

Dr. Keller Has Book Published

A California State College professor has had his first book published.

"Germany, the Wall and Berlin: Internal Politics During an International Crisis," is the first work of Dr. John W. Keller.

Dr. Keller is professor of International relations here at California State College.

Dr. Keller noted that the crux of the continuing struggle between East and West is the problem of divided Germany.

Dr. Keller

He analyzes the four political parties in Germany as of 1960, their leaders, principles, tactics and sociological bases.

Dr. Keller spent some five months on both sides of the wall in gathering material for the book.

Dr. Keller is a graduate of Columbian High School and Heidelberg College, both in Tiffin, Ohio and received his master of arts degree from Ohio State University in 1931. He earned his doctorate degree from Ohio State in 1947.

He has also done post-doctorate work at the University of Chicago and American University in Washington, D.C.

Prior to joining the California faculty Dr. Keller taught at American University and the Universities of Alabama and Oklahoma City.

He has another book in the works. It is "German Party Platforms: 1848-1964." He hopes to have this published within the next year.

Vantage Press Inc., New York City, is publisher of his first works. It is on sale at Prosser's Book Mart in California and Wood's Book Store, Uniontown.

EDITOR'S NOTE—

We did not have the space to run a complete list of those who worked on this edition, however speaking on behalf of the student body and myself, we appreciate their fine efforts in publishing this paper.

However, the California Times still needs more reporters, typists, and headline writers to insure adequate coverage of campus news. If you wish to work on the CT staff please write your name, how we can contact you, on a piece of paper and put it under the door of the CT office.

- - EDITORIAL - -

New Face For Paper

In the past the *California Times* policies have earned it a reputation as the "campus disturber", (please excuse the terminology) "the bitch sheet", and many other titles, some of them unprintable.

This trimester we are putting on a new face. The CT has ceased its chronic complaints and has become an optimist.

However, this does not mean that we will be Pollyannaish and ignore situations that should be brought to light.

Every once in a while we do have some legitimate complaints, but our student body shouldn't feel special about it.

Everybody's got problems! For example the commuter at Indiana State College has very adequate facilities for his sojourn on campus.

Clarion State College can't have cigarette machines on campus and local merchants aren't permitted to sell cigarettes to minors.

It's tough all around. If you think you'll get rid of your problems by transferring to another school, well, lot's o' luck Charlie!

Let's take a look at our campus! It has many virtues, such as our top-rated IA Department, our modern science building, the new dormitories, a demonstration school on campus and very attractively landscaped grounds.

We also have organizations that bring acclaim to our campus. One is our football team, another the symphony orchestra, or the college players, the Monocal, and the recently revived Pegasus.

Several instructors on our faculty are authors of widely used books. We've been so busy looking for things to complain about we sometimes overlook the good.

Admitted we also have room for improvement of several inadequate facilities and moves for their alleviation are in operation.

However, if you're still convinced that our school's at the bottom of the heap, then brother, we can't go any place but up.

R. A. Z.

Athletic Plant Under Construction By Firm At Philipsburg Site

A new campus building is now under construction at site located on Boaz St. in Philipsburg.

The building, a two story structure with accommodations for seven classrooms and a gymnasium, is contracted to the LD Construction Company (the same firm that built McCloskey and Binns Dormitories).

The stipulated completion date is Feb. 5, 1965 and the approximate cost of the final structure will be well over \$1,200,000.

A gymnasium with a seating

capacity of 3,500 is included in the contract.

A swimming pool and auxiliary gym are scheduled to be annexed at a later date.

Since 1959, CSC's construction program has been growing by steady increments, beginning with the opening of the New Science Bldg.

Two years later the J. Albert Reed Library was made available to the student body. Last year McCloskey and Binns were ready for the incoming Freshmen.

Furniture For Campus

New furniture and a public address system will be bought for the Vulcan Lounge and Snack Bar.

This followed action taken at an executive meeting of the Student Activities Assn. Board of Directors held recently in the faculty lounge.

Paul Weisman, president, was in charge of the session.

A motion was passed that a public address sound system be installed in Vulcan Lounge and the Snack Bar. The purpose of this system is to expedite the business matters of the SAA office.

A motion was passed to accept

the bid of \$11,199 from the Delmar Printing Co., for printing the Monacle.

Furniture for the Snack Bar was the subject of the next motion passed. Four square laminated-formica top tables, four round laminated-formica tables, 16 fiberglass armchairs, and 32 fiberglass teardrop shaped chairs are to be ordered from the Troy Seating Company through Starchrome Distributors, Uniontown.

This furniture is to be paid for from the Summer School Students Activity Fund.

R. Ferber Speaker On Space

"Lunar Exploration and the Establishment of a Lunar Base" was the subject of a talk given by Robert R. Ferber, radiation laboratory engineer at the Westinghouse Research Laboratories last Wednesday in Steele Auditorium.

Mr. Ferber's discussion covered the difficulties that may be encountered and the anticipated hazards to our astronauts and scientific moon exploration teams during projects Gemini and Apollo, and the establishment of a permanent moon base.

Through a series of excellent slides, Mr. Ferber illustrated the surface of the moon.

He led his audience to consider the extended precautions which must be made before man can explore earth's natural satellite.

Some of the reasons for the "moon race" and the possible benefits of the establishment of a permanent lunar base were also mentioned in his lecture.

Mr. Ferber has long been interested in various fields of engineering. He worked as an audio engineer at radio station WWSW from 1952 to 1957 and from 1954 to 1958 was a motion picture equipment design engineer for Warren R. Smith, Inc.

During this time, he developed Tele-Cam, a combination motion picture and television camera which is now patented. Mr. Ferber joined the Westinghouse Electric Corporation in 1958 as an engineer at the Radiation and Nucleonics Laboratory of the Materials Engineering Department where he has been doing research work on radiation effects and radiation detection.

His current work is concerned with an analysis of the radiation effects and the radiobiological problems being conducted by Westinghouse. A computer shielding analysis study for the lunar base is being done as a part of his work.

Mr. Ferber's presentation was well-received by an audience of about 600 students.

Women Applicants

(Continued from page 1)

student activities now held in the cramped Vulcan Lounge.

A student union and a community building are in the planning for use as recreational facilities.

Many of these facilities still in the planning stage will require alterations and revisions by those responsible—the State Planning Board, the Dept. of Public Instruction, the college administration, and the General State Authority—but this is a general outline of the buildings planned for our future campus.

Copies of *Pegasus*, the literary magazine of California State College were distributed to students at the close of the spring trimester.
