# Hormal

Vol. VII. No. 9. CALIFORNIA, PA., MAY, 1892.

50 CENTS A YEAR.

Entered as second-class matter.

Chas. Guinn is located in Butler, Pa.

O. I. Woolsey is teacher of short hand at Monongahela college, Jefferson, Pa.

Miss Nannie Hornbake, '90, is teaching stenography and typewriting in Pittsburg.

Burgess Crawford, of the newly organized borough of Duquesne, is a former student of the Normal.

Mr. Milton Phillips, of the Senior class, attended the Y. M. C. A. convention at New Brighton as a delegate.

Miss Elda N. Hoover, of the class of '85, was married on Tuesday, April 5th, to Mr. Charles A. Peters. The best wishes of The Review attend them.

H. L. Kiehl, '87, represented the Philo society on original oration at the Waynesburg annual contest, and Miss Luceola Acklin the Union on select oration.

In a recent issue of the N. Y. School Journal is an able and very valuable article on Elementary Meteorology from Prof. W. S. Jackman's "Nature Studies."

Prof. A. S. Bell, a member of the faculty two years ago, is a candidate for State Superintendent of Rublic Instruction in West Vir-Te: We wish him success.

w" Haven schools, closed a sucal term on Thursday last. So Tipleased are the board of edu-

they have asked him to return and take charge of their school next have moved to California, Payear.--Uniontown Genius.

The large apple trees in front of The campus is improved by the change, but the shade will be missed in the hot days of summer.

"Miss Ray Whitsett, '91, visited us at the Normal recently, and gave at morning chapel a very interesting and instructive ten-minutes talk on her impressions of Sweden and its people.

Messrs. Sloan, Garwood, Smith and Phillips, and Misses Greathead, Billingsley, Barnes, McClure, Eva Powell and Patterson have been selected as performers for commencement.

Prof. Walter L. Cooper, principal of the Derrick City High School sends us a neat programme of the commencement exercises, which occurred April 14th. The class consists of five members.

Walter A. McDonough, since he left the Normal in 1889, has taken a course in Duff's College and is now roughing it as brakeman on the Chartiers railroad, to recuperate his impaired health. He will re-enter school in the fall.

State Chairman Patton, of the Prohibition party, was a student at the Normal in its early days, and se O. Arnold, principal of the at a later date a member of the faculty. It is interesting to hear his reminiscences of the time when he used to recite Latin to Prof. Hull cation with Mr. Arnold's work that in the old building on the hill.

The family of W. H. Martin, '91,

Prof. DeMotte begins his week's work in Science, May 25th. We the main building have been cut are expecting the most interesting and profitable week ever passed at the Normal. He will lecture twice during the day and on each evening during the week, making fifteen lectures in all. Admission to the evening lectures one dollar for the course.

> Mrs. Laura Lilley MacKinzie writes from Cholarne, Cal.: THE REVIEW is worth much more than the subscription to me. Am glad to learn through its pages of your present success; hope you will climb still higher. It makes me a little homesick sometimes, but for all that it affords me great pleasure to read it.

> Superintendent Tombaugh's new system of granting diplomas to common school graduates is meeting with well merited success, and the indications now are that it will raise the standard of our schools to a degree of excellence never before attained. School directors and teachers should give the superintendent every possible encouragement in this new departure from the old drag system in order to encourage the pupils to be industrious in the pursuit of knowledge. The superintendent is being highly complimented and justly so for the anxiety he is manifesting for the improvement of our schools. Let us hope his success will be commensurate with his efforts,-California Messenger.

### EDITORIAL.

We want to urge upon all teachers the necessity of attending their State Associations. Send you membership fee any way.

North Carolina, at Morehead City, June 21 to July 4.

Atlanta, S. Ed. Association, July 6–8.

Tennessee State, at Tullohoma, July 26-28.

Alabama State, Montgomery, June 28.

Ohio State, Cleveland, June 28, 29, 30.

All school work now should be booming, and from all reports educational interests are in excellent condition.

the fear of "passing," or rather of world's progress. Miss Keith, or rather of "not passing," should "Di Vernon," as she has been not be held, like the sword of called, is not only an accomplished Damoeles, over the heads of the children. Say little or nothing of possible failure. Such remarks as cisco. She has kept out of the "You will have to do better work rut. ### English Fiction and Its Public.

Whether there are any great novels being written by English authors in these days, and why, if we answer the question in the negative, there are not, are questions which it might be imagined be imagined were already worn threadbare by discussion. And yet there is room for doubt if the arguments on either side have been so very far convincing, or if most of the disputants have been fortunate in the selection of their point of view. Moreover, criticism is hampered by the very extent and variety of which the art of fiction is capable. It was comparatively easy when Sir Walter was putting forth romance after romance to award the palm of supremacy. Nor did the demure young woman who sent forth 'Pride and Prejudice" and "Emma" from a country parsonage have many peers; although, perhaps, it must be admitnon), whose untiring interest in ted that Jane Austen's own generthe society for the Prevention of ation did not appreciate her, and Cruelty won her the elegant medal that the Janeans, now a flourishbest, and there will be no fear of last year, appears to be on the ing literary sect, are of comparathe result. There will be cases right road to retain it another tively modern growth. Even as where neither teacher nor child twelve months. Her articles in late as the days of Dickens and the Humane World, of San Fran- Thackery this matter of pre-emicisco, as well as St. Paul, Minn., nence was comparatively plain; to enable him to take advanced in argument, full of pathos, logic each his own high place, but there work, and the matter should be and good sense. We have something less than a peck of postal card inquiries, but most of them omit the State and postoffice, others the name of the writer and some of the postal authorities here find it impossible to make out the name of the signature. We hope our teachers will see to it, that pupils are drilled on this important matter of dating, signing and properly directing letters.

He that hurts another inflicts a deeper hurt upon himself; so also in helping your neighbor you help vourself more. The good Samaritan received a greater blessing from the healing wine and oil than did the wounded man he rescued. The good we bestow and the evil we inflict has in the end its sweetest or bitterest fruit in our hearts and lives. The good or evil results come with infallible certainty only to the doer of the deed; the one you aim to help or hurt may not be reached by your effort.

The flags for the United States Navy are made at the Brooklyn Navy Yard. The work is done under the care of Mr. Crimmins. the foreman of the department, and is further examined once a week by Commandant Gibson. The bunting used in these flag is bought in large quantities twice a year from Lowell, Mass. It must weigh five pounds to every forty yards, and must stand the test in weight of seventy pounds to two square inches To set the color it is steeped in salt for six hours, and must then stand exposure to the sun for the same length of time before being used. The red and white bunting are then placed together, and six stripes are cut at once with an immense pair of The stars are cut from chisel, thirty stars being cut at one last estimate sent to Congress.

The star must be turned "the great ones gone forever and med down, and, what must be far from easy of achievement, another sewed directly at its back. For the plain work of sewing the stripes. women are paid by the yard, but on more difficult work they are paid according to time. No imperfect stitches are allowed. The canvas binding is sewed on by sailors. The foreign flags carried by our ships, and used in saluting vessels of other nations, are also made in this very interesting workshop.

### World's Fair Notes.

The World's Fairappropriations by foreign countries, as far as reported, aggregate more than \$4,-500,000.

The Silk Association of America and the Silk Industry Association have decided to combine in making the finest possible exhibit of silk goods and products.

A choral building, 160x260 feet, and costing \$100,000, will be erected near Horticultural Hall. It will be devoted to musical attractions, chiefly large choruses.

Australia will send to the World's Fair probably the biggest astronomical clock ever made. It will be forty feet high and twenty-five feet square, and is to be built of colonial cedar.

The Italian government has selected its war ship, America, to convey to the United States the Italian exhibits to the Exposition free of charge. The Rome Chamber of Commerce has invited other chambers to form committees to promote the securing of Italian exhibits.

A telegram from Chicago says that President Baker, in an estimate of the total cost of the World's Fair, places the ultimate expenditure at \$22,226,000. This bleached muslin with a mallet and is about \$4,000,000 more than the

### CHARACTER.

Among the happiest and proudest possessions of a man, is his character -it is a wealth--it is a rank of itself. It usually procures him the honors, and rarely the jealousies of Fame. Like most treasures that are attained less by circumstances than ourselves, character is a more felicitous reputation than glory. The wise man, therefore, despises not the opinion of the world-he estimates it at its full value—he does not wantonly jeopardize his treasure of a good name—he does not rush from vanity alone against the received sentiments o others—he does not hazard his costly jewel with unworthy combitants and for a petty stake. He respects the legislation of decorum. If he be benevolent, as well as wise, he will remember that character affords him a thousand utilities-that it enables him the better to forgive the erring, and to shelter the assailed. character is built on a false and hollow basis, which is formed not from the dictates of our own breast, but solely from the fear of censure. What is the essence and the life of character? Principle, integrity, independence!-or, as one of our great old writers hath it, "that inbred loyalty unto Virtue which can serve her without a livery." These are qualities that hang not upon any man's breath. They must be formed within ourselves; they must ourselves-indissoluble and make indestructible as the soul! If, conscious of these possessions, we trust tranquilly to time and occasion to render them known, we may rest assured that our character, sooner or later, will establish itself. We cannot more defeat our own object than by a restless and fevered anxiety as to what the world will say of us. Except, indeed, if we are tempted to unworthy compliances with what our conscience disapproves, in order to please the fleeting and capricious countenance of the time. There is a more honesty in a due regard for character which will not shape itself to the humors of the crowd. And this, if honest, is no less wise. For the crowd never long esteems those who flatter it at their own expense. He who has the sup pleness of the demagogue will live to complain of the fickleness of the mob.

#### MORALS AND PATRIOTISM.

BY SUPERINTENDENT G. W. M'GINNIS, WEST CLEVELAND, O.

Every subject of a government is in part responsible for its good name, and its honor will depend as surely as the twilight and midupon the high regard in which it night darkness follow in the path is held by its subjects. We have in the United States no rank except that of character. Every citizen is eligible to the highest office in the gift of the people. No form of government can exist for any extended period of time without the intelligent and honest support of its people, much less a republie. We should be apprised of our country's faults and proud of her glories. It is clearly the highest duty of our public schools to cultivate a love for country and its in stitutions. A knowledge of the curriculum will enable men and women more easily to earn bread, but they must also be prepared to mind and heart of every American take possession of government and manage it with prudence and wisdom. The heirs of our republic must be taught the true spirit of patriotism, to love and respect their native land. It is this truly patriotic ment, and above all, influence to spirit that prompted the Americans the right the life and character of at a dinner in Paris to respond to the toast, "Here's to the United States," "The U. S is bounded an the north by the Aurora Borealis, on the south by the precession of the equinoxes, on the east by primeval chaos, and on the west short, to insure a good citizen. by the Judgement day." Such oughtal ways to characterize American youth, for it is needed to counteract the baleful influence of anarchy and irreverence for our instiin authority that exist to such a tect. marked degree in our American We must in some way con-

of the setting sun.

Standing armies eat up the substance of the people of Europe. Let us teachers count ourselves a part of the great standing army of public schools, in which are now fought day by day the future battle of the nations in which we are instilling the eternal principles of self-government that will insure the perpetuity of our great republic. Let us observe patriotic days, commemorate the birthdays of our nation's heroes, and teach lessons of morality and patriotism that will be indelibly imprinted upon the child. Let us study our national! biography, and thus develop patriotisms and open the way to the study of our national history, insure better understanding of our governthe future citizen. "Lives of great men all remind us," etc., is a golden and appropriate gem. An hour a day with a great good man in his biography means to imitate his noble acts and imbibe his spirit, in

The growing conviction of edupatriotic buoyancy of spirit as this cationists is that intellectualism has too exclusively monopolized the work of the schools, that heart culture should receive a larger share of attention, that an intellitutions, and the almost too great gent apprehension of the right is freedom of speech and press. I not of more vital moment than cannot contemplate without fear of the disposition to do the right, and the result, the disregard for old age that character building is the grandand disrespect for parents and those est work of the pedagogical archi-

means of its perpetuity. Respect theless, it is the highest duty of the for government must have its public schools not only to train origin in the schools, and every men (and women, too, for they will teacher must make special effort soon be voters) thoroughly in histo imbue pupils with a high regard tory, and government, and politics, for the rights of others, for without intelligent enough for taking hold it anarchy will follow in our wake of the reins of government, but with character, virtue and integrity enough to scorn to intimidate or be intimated, to drive corruption from the field and make honesty the rule in politics as in other walks

May it not be done by the proper America, holding the forts of the example and right government in schools? We think not fully. It must require both precept and example. There is often, however, a lax discipline in schools which impresses pupils with disrespect for law and leads them to hold it no great sin to break both the commandments of God and man. Pupils in such a school grow into the feeling that no law limiting their desires and ambition is worthy of their observance. Good citizens can not be developed under such training.

There is a cluster of virtues in the word "obedience," compliance with just requirements, subjection to restraint and control. The obedience must be unquestioned obedience. The child must be taught to obey out of respect for the authority of the one who gives the command. The officer commands, the soldier has no option, he must obey. The same principle must obtain in the family and school government. Obedience must be prompt, cheerful, and without evasion. No half-way compliance must be tolerated. Every pupil who does not learn this lesson most thoroughly is in danger of becoming a violator of the law, and therefore a bad citizen.

Ability to suppress wrong doing by flattery, or even genuine love, is often mistaken for disciplinary Such a course is only power. deferring the difficulty, and insubordination will burst forth like a volcanic eruption sooner or later. vert this bold effrontery into a mod- in mere intellectual pursuits, for do | The good disciplinarian is he who est spirit of independence, self- not industry, regularity, steadiness plants in the hearts of his pupils respect and due appreciation of necessarily accompany the pursuit the seeds of honor, integrity, the rights of others. Sometimes the quiet school, the one in | George Carter, who was at that which the management is most time governor of the Island ter." excellent, may be, so far as good training is concerned, the very nel. worst in the whole system. Improper incentives are used, deception is daily and hourly practiced by the teacher, integrity, accompanied with dullness is at a discount, and dishonesty, if only covered up by shrewdness, is quite commendable.

Pupils under such discipline will not hesitate to violate contracts, take advantage in a bargain and take advantage of the most sacred social and civil rights to accomplish a selfish purpose. Good citizens cannot come from such training, and the more powerful the intellect becomes the greater the danger to society and the Good citizens look to state. teachers to do more than they are now doing. Hence the cry for manual training, more and better libraries, better reading, etc., but upon these we will write again.

### Names of States and Their Meaning.

Province of Maine, in France, and was so-called as a compliment to bow. the queen of Charles I., Henrietta, who was its owner.

from Hampshire, England. New it means "River of the Big Hampshire was originally called Bend.' Laconia.

Vermont is French Mont.) signifying Green Moun-from the Indian word "Kain-

Massachusetts is an Indian word signifying "County About the Great Hills."

Rhode Island gets its name because of its fancied resemblance to the Island of Rhodes, in the Med-

The real name of Connecticut is "Quon-eh-ta-cut." It is a Mohican word, and means "Long River."

New Jersey was named for Sir ters." of Jersey, in the British Chan-

Pennsylvania, as is generally known, takes its name from William Penn, the "sylvania" part of it meaning woods. Literally, it is "Penn's Woods."

Delaware derives its name from Thomas West, Lord de la Ware.

Maryland was named in honor of Henrietta, Maria, queen of Charles I.

Virginia got its name from Queen Elizabeth, the "Vigin Queen."

The Carolinas were named for Charles (Carolus) II.

Florida gets its name from Kanunas de Flores, or "Feast of the Flowers."

Alabama comes from a Greek word, and signified "Land of

Louisiana was so naméd in honor of Louis XIV.

Mississippi is a Natchez word and means "Father of Waters."

Three or four Indian interpretations have been given to the word Arkansas, the best being Maine takes its name from the that it signifies "Smoke Waters," the French prefix "Ark" meaning

Tennessee, according to some writers, is from Tenasea, an New Hampshire took its name Indian chief; others have it that

> Kentucky docs not mean "Dark (Verd and Bloody Ground," but is derived tuk-æ," signifying "Land at the Head of the River."

> > Ohio has several meanings fitted to it. Some say that it is a Suwanee word, meaning "The Beautiful River." Others refer to the Wyandotte word Oheza, which signified "Something Great."

Indiana means land of In-

Illinois is supposed to be derived from an Indian word which was

New York was so named as a intended to refer to a superior class of men.

> Wisconsin is an Indian word, "Wild, Rushing Wameaning

Missouri means "Muddy Wa-

Michigan is from an Indian word, meaning "Great Lake."

The name of Kansas is based on the same as that of Ar-

Iowa is named from an Indian tribe, the Kiowas; the Kiowas were so called by the Illinois Indians because they were "across the river.

The name of California is a matter of much dispute. Some writers say that it first appeared in a Spanish romance of 1530, the heroine being an Amazonian named "California.''

Colorado is a Spanish word, applied to that portion of the Rocky Mountains on account of its many colored pears.

Nebraska means shallow waters. Nevada is a Spanish word signifying "snow covered mountains."

Georgia had its name bestowed when it was a colony, in honor of

George II.

The Spanish missionaries of 1524 called the country now known as Texas "Mixtecapah," and the people Mixtecas. From this last word the name of Texas is supposed to have been derived.

Oregon is a Spanish word signifying "Vales of wild thyme."

Dakota means "leagued" or "allied tribes."

Wyoming is the Indian word for "Big Plains."

Washington gets its name from our first President.

Montana means mountainous. Idaho is a name that has never been satisfactorily accounted for.

The found a river hitherto unknown, It is prairie the acre, but 20 bushels is the with prices as they were last year.

### The Sources of the Nile.

The announcement that Emin But none of Northwest would make sufficient them-not even Mr. Stanley in his tions-done much more than to We realize the majesty of agri- corroborate with nineteenth cen finished problem and fully worked Shimeeyu River, discovered by There are 8,832,000 acres in the it out; though the very letter that Mr. Stanley, may be entitled to valley, and less than a quarter of tells us this suggests that there are that honor. Very little is known

would be no market for the wheat; clear that Emin Pasha has made called the Kifu. It rises in the Uhha country, northeast of Ujiji, and flows northward some 220 or 230 miles, past the base of Mount Mfumbiro, and empties itself into the southern part of Lake Albert Edward. If this be true we must greatly altar the hydrography on all our maps of that region. If the Rusizi River is allowed to remain as hitherto indicated, the Kagera surely cannot be; and ... Akanyaru, Nyanza, or Axlexandra Lake, as Mr. Stanley named it, must be regarded with grave doubts. Neither Mr. Stanley nor any other white man, we believe; actually saw that lake. They put it on the map on the strength of native heresay, connecting it with the Kagera, and making that identical with the Alexandra Nile. If such a body of water exists at all, it now seems more probable that it is a part of the Kisu River system, and tributary to Lake Albert It is not stated that Edward. Emin Pasha has fully explored the Kifu. He has simply traversed its lower portion and surveyed its fabulous. For instance, it was them fully solved the world old mouth. While he has, therefore, boasted that the farmers of the problem. Nor indeed has any of added facts of material value to our knowledge of African geography, it is too much to say, so far as present information goes, that he has discovered the ultimate What he may source of the Nile. have done since the latest news came hither from him is, of course, only to be conjectured.

The Nile problem at present stream, flowing into Albert Edward Lake, the Semliki River, and

of Kilimanjaro, and flows westward, emptying itself into Victoria Lake at the southern side of Speke This would make Victoria Lake and the Victoria Nile the true upper waters, and remove Albert Edward Lake from the main course of the Nile. The third possible solution is suggested by the discovery of the Kifu, the headwaters of which must be very near Lake Tanganika. It may be that the Kifu and the Malagarazi, or some other stream, havs a common origin in some undiscovered lake in Karagwe, the one flowing northward to join or to form the Nile, the other flowing into, if not, indeed, from Lake Tanganyiki. thus making the latter inland sea itself confluent with the Nile system. Then, as Tanganyiki is said to be connected, by the Lukuga River and Lanchi Lake, with the Lualaba River, we should have the Nile and the Congo joined at their sources in a single chain of waterways from the Mediterranean to the South Atlantic. There is even an easy possibility of adding a third member to the same confluent system, for the headwaters of the Congo and the Zambesi are so close together as probably to be actuelly identical. At present there is room in this theme for almost boundless speculation without transgressing reasonable limits. There is interest enough to make the world hail with eagerness every authentic word that comes from Emin Pasha and his fellowexplorers. that the final solution of the problem will be invested with much of wonder and surprise. Whatever that solution may be, however, it between France and England is to must remain a cause for national suspend two tubes, each about three pride that an American explorer feet in diameter, by means of steel has in all direction contributed most largely to it. For our knowledge of the salient feature of each of the three schemes we have outlined, the Albert Edward Lake, the Shimeeyu River and the Congo, is to be ascribed to the valor and patience and tact and indomitable will of Stanley Africanus. - New through the tubes. - New York Jour-York Tribune.

The education of the rising generation ought never to be lodged in the hands of the immoral and irreligions, While our public schools should not be under sectarian oversight, they should possess a good moral influence. Those who control them and those who teach in them should be the friends and promoters of law, order, right and truth. We cannot insist upon their being professing Christians, but the future welfare of society and of the nation demands the exclusion of all addicted to known vice, or who lack the elements of good citizenship.—Presbyterian Observer.

Many of the influences now cast around children are actually educating them to unhappiness. Particularly this is done by instilling a disproportionate care and anxiety about little things. Not only is the child admonished and reproved about hundreds of family trivial matters, thus raising them in his mind to the level of serious offences; he also sees those around him whom he respects and loves full of worry and disquiet about small annoyances; he hears them criticising trifling mistakes and delinquences in their neighbors, detailing petty grievances, complaining of little discomforts, craving all sorts of small luxuries, and he becomes accustomed to see them usually occupied with matters that ought to be treated as comparatively insignifi cant. This spirit is inevitably infused into his receptive mind, and thus the selfishness, narrowness, seeds of cowardice and unhappiness effectually sown.

### And we doubt not POSTAL TUBES ACROSS THE CHANNEL.

The proposed plan for a postal tube cables thrown across the English Channel, 120 feet above the level of the water. These cables are to be fixed to pillars whose foundations will be the r-cky bottom of the Channel, each pillar 800 yards from his fellow. If the plan as proposed is consummated, miniature trains, each carrying 500 pounds of mail matter, will run

Ohio State Teachers' Association, Cleveland, O., June 30,

Subjects discussed, and those who take part in the discussiods:

Paper—What contitutes a satisfactory normal training, and how can it be secured?

Paper—Is the utilitarian tendency detrimental to the true ends of education?

FRANK GRAFF, Editor.

Olio is still progressing.

Mr. Lowis. '33, was a late visitor at society.

Old members continue to attest the fact that they have not forgotte was, nor yet forsaken us.

Several weeks ago the poutine of soctety was enlivened with and miginal-oration by Mr. Horton.

Instead of society on May 13, divided tended our compliments to Philipsiad enjoyed her fine entertainment.

Our new members are doing excellent work. Somerset's "Special Train Delegation" is doing nobly. She ought to be proud of her sons and daughters. We are if she isn't.

Mr. Arch W. Powell has been requested by the patrons of several large schools to apply for the principalship. Mr. Powell has talent which is only equaled by his tact.

Judging by the great manifestations we would infer that the Somerset county mountains were supercharged with eloquence. It is transmitted by conduction and induction.

Smith will join the reportorial staff of some paper; which one is not known. It may be the New York Tribune, the World or the Monongahela City Daily Republican.

It is current here that Calvin Luther ning under the management "Ladies' Mt. Vernon Association carrying about two thousand popular the management "Ladies' Mt. Vernon Association carrying about two thousand popular the management "Ladies' Mt. Vernon Association carrying about two thousand popular the management "Ladies' Mt. Vernon Association carrying about two thousand popular the management that the management is the same paper; which one is not known. It may be the New York Tribune, the World or the Monongahela City Daily Bepublican.

It is with a feeling of sadness that we gaze at the increasing verdure of the ball ground. That same ball ground which was the center of three great victories, which trembled with the cheers of enhusiastic multitudes, now is silent. Is the "national game" to thus degenerate? May we not hope that the "Normal Stars," which were obscured by the radiance of an uncompromising July sun, will yet be at the "summit" of local consciousness?

Mr. I. L. Smith has just closed a successful term as principal of the Belle Vernon schools. We also note with pleasure the success of W. H. Martin, 91, at Ursina, and J. W. Bowman, '91, at Merrittstown. Old Clios, wherever you may be, with whatever of the multiple farious occupations of life you have the massive stone walls of Fort Washington, gray with the mosses of age. identified yourselves, we are illeased to hear of your advancement. Go on; our best wishes and our sympathy go with you, continue to go upward to greater usefulness, to greater honor.

MOUNT VERNON.

A Brief Description by One of the Excursionists.

Each one home from the trip to the Nation's Capital is like an overchar ed storage battery, says Dr. Small wonder it is, I am s die, wi st into a short three days inder ded the sights of the uncless leantage city on the contine at, if the whole world. But for Mr. Valla hpt to describe our journey would be folly, so I will tell c where the best to me. Control of the Toolded to On Friday C of far party and go leave the rest Albert She to to Mount Vernon. e say book the the Fish Commissio of the River cable cars for the pier est patience Queen. This is the fin steamer on the Potomacan. A the ning under the management carrying about two thousand people. We steam out from the wharf in the teeth of a stiff breeze. Away and to the right is Arlington, the home of General Lee, standing a silent sentinel over the graves of the Nation's heroes. On down to Alexandria, once a large and thriving city, the chief port on the Chesapeake, now no larger than Homestead or Braddock. Away to the right the verdant hills of Virginia slope away from the river and hide their heads in the forests that crown them; to the left are green uplands dotted with fine summer villas. One of these hills was crowned by the massive stone walls of Fort .Washington, gray with the mosses of age. Fifteen minutes after we

What is it? fell on the vessel: The home of Washington is in sight. We land at a pier covered like a summer house and start through the tree-covered grounds to the house. It would be useless for inc to attempt to describe the house. Suffice it to say that everything is as it was when he lived and died there. Here the settee on the wide piazza where he used to sit, the old barn, the smoke house. You pass down a graveled driveway to the A low stone vault built against the hill, enclosing, yet exposing to view two marble sarco-Here lie the remains of phagi. George and Martha Washington; above them a plain marble tablet thus inscribed: "I am the resurrection and the life; he that believeth in me, though he were dead, yet shall he live: and whosoever liveth and believeth in me shall 18 year miver die.

How true? There lie the ashes Goorge Washington, yet his spins dwells in the heart of every objectation in forty-four States, Lie by his gathered the four soil subjects which her for-

Awaiting the has 2000 coing house-house, Prof. Bryan keeping, and is now in Brownsville, going to train.

One of the most interesting time we have listened to for a lon, was that of Rev. Zwayer, of the Barchurch, on Bible reading, at the DeMopraise meeting.

Esquire Lambert, of Coal Center, who has for many years been a stanch friend of the Normal, was a welcome visitor at morning chapel recently. His address, though brief, was pointed. "To get rid of a vice, practice the opposite virtue," was his theme.

# Philomathean

Motto-Non Palma Sine Pulvere.

ELEANOR W. PATTERSON, Edito

R. M. Day, of last year's class, is attending the Duquesne College in Pittsburg.

The Seniors are now enjoying some work in Physics under the able instruction of Dr. Smith.

We are glad to see our old friend, Mr. Peairs, with us once more. We extend to him a hearty welcome.

Contest is coming on apace, "Rouse, then, Philos, rally round your banner:

Ready, steady, pass the word along; Onward, forward, shout aloud victory! We will conquer all the throng."

Among the performers for Class Day exercises are the following Philos: Miss Mary J. Phillips, Miss Flora Horne, Miss Arizona Longdon.

We were very much pleased to have the name of Prof. P. A. Shanor, principal of the McKeesport schools, added to our list of honorary members.

The following persons have recently visited relatives in school: Mrs. Dalby, Misses Bertie Phillips and Ida Daft, Miss Kisinger, Miss Elliot, and Messrs. L. W. and Z. W. Patterson.

Several old Philos visited the Normal recently. Among them were Misses Bannie McGrew, Anna McClure, Margaret Gilmore, Mattie Morgan, Ina McKinney; and Messrs. Johnson and Henderson.

The greater part of the Senior class spent a very enjoyable week in Washington City. They saw all the sights worth seeing, and returned to the Normal a tired, but new topic; and was enabled to do

trip to some was their visit to Mount Vernon, the home of the "father of his country."

The following officers have been elected for the present term of office: President, Mr. Anderson, vice-president, Miss Barnes; secretary, Miss McIntyre; critic, Mr. Hart; attorney, Mr. Manon; marshal, Mr. Breese.

The entertainment of May 13th, under the auspices of Philo, was a grand success. Home talent was well represented, and the performers did credit to both themselves and Philo. The excursion on the "City of Pittsburg" brought a large crowd from all points down the river. The following program was ably carried out:

### Language.

#### A Lesson in Grammar.

ELIZABETH CLIFFORD, CLEVELAND, O.

The teaching of technical grammar to a beginning class is usually fraught with many difficulties, but if the Inductive Method is followed, these difficulties for both teacher and pupil are much lessened. the following lesson mode in presented according to this method:

Object.-To cultivate the perceptive faculty, memory, reason, you say I was giving you?

and language.

Point.—To develop idea of and

give term mode.

Matter. - Mode is the manner the singing? in which action, being, or state is expressed.

Method.—Teacher suggests and obtains from the class sentences sion on board. similar to the following:

1. Mary sings.

2. Mary, sing.

3. Mary may sing.

4. If Mary sings, she may go. Teacher.—You may read the first sentence.

Children. - Mary sings.

talking?

Children.—We are talking of Mary.

Teacher.—What do we say of say is

Mary?

Children.—We say that she sings.

Teacher.—What of Mary do tence? we know from the first?

Children.-We know of the sing-

ing of Mary.

Teacher writes the word singing on the board on the same line as views the facts obtained, namely, the first sentence.

singing of Mary?

*Children* —The verb sings.

questions about the sentences on the board, and obtains the fact that of Mary from all these sentences? from the verb in each sentence, we know of the singing.

Teacher.--What do you know about the singing from the first sentence?

Children.—We know it to be a

Teacher writes word fact on blackboard on the same line as first sentence.

Teacher.—What can you tell me about the singing in the second sentence?

Children.—That it is a command.

Teacher writes the word command on bord on the same line as the second sentence.

Teacher.-You may read the third sentence.

Children.—Mary may sing.

Teacher .- John, if you should ask me to leave the room, and I should say you may, what would

John.—Permission.

Teacher.-When we say Mary may sing, what do we know about

Children.—We know it is a permission.

Teacher writes the word permis-

Teacher-You may read the

Children read.

*Teacher.*—What do you know about the singing in this case?

Various answers will be given by the children. The teacher should question until she obtains Teacher.—Of whom are we the fact that we do not know whether Mary sings or not.

> Teacher.—Any thing we do not know or are not quite sure of we

Children.—Doubtful.

Teacher.—What do we know of the singing from the fourth sen-

Children.—That it is doubtful.

Teacher writes the word doubtful on board. Then the teacher pointing to sentences rapidly rethat we know from the first that Teacher.—What tells us of the the singing is a fact, from the second a command, from the third, we know it is a permission, and In the same way the teacher from the fourth that it is doubtful.

Teacher.—What is it we know

Children.—The singing. *Teacher.*—What is singing? Chilkren.—An action.

Teacher.—How is the action expressed in the first?

Children. - The action is pressed as a fact.

Teacher.—In the second?

Children:-- As a command.

Teacher.—In the third?

Children. - As a permission Teacher.—In the fourth?

Children — As doubtful.

Teacher.—How does the way in which the action is expressed in these sentences compare?

Children.--It is different.

Teacher.—What is different?

Children.—The way in which the action is expressed is different.

Teacher.-Who can tell what we call the way or manner an action is expressed?

Children may not know term. In that case, the teacher tells them it is a word which means way or manner. If the children are still unable to tell, the teacher gives the term mode.

Teacher.—What else do verbs assert besides action?

Children.—Being or state.

Teacher. - Who can tell me what mode is?

Children state.

When teacher has obtained the definition in just the form she wants it, she should write it on the board.

Aster children have been Drill.drilled on the definition, the teacher should give rapidly sentence after sentence, children stating after each how the action is expressed. Then the teacher should vary the drill by calling on pupils to give sentences. Thus:

You may give me a sentence where the action is expressed as a fact. After a number have been given, the teacher has them illustrate the other points in the same way. The children may then be asked to open reading-books or histories, select the verbs in a given paragraph, and state how the action is expressed. After a thorough drill on the application, the teacher should again call for the definition by way of summary:

What have you learned about to-day?

Children. — Mode.

Teacher.—What is mode? Children state.

### Memory Gems.

If once a purpose pure and high You form, for naught forgo it! "The mulberry leaf to silk is changed By Patience," says the poet.

–Frances S. Osgood.

"Refresh me with a great thought."—Herder.

God's ways seem dark, but soon or late,

They touch the shining hills of day, The evil cannot brook delay, The good can well afford to wait.

– Whittier.

Patience is bitter but its fruit is sweet .- Jean J. Rosseau.

If we bravely resolve to do our part, And bear our griefs with a patient

And free from all repining, We shall be led to a higher way, To a better work than we do to-day,

And find love's sunlight shining; For truth of spirit and strength of sou! Will make the darkest cloud unroll And show its silver lining.

We would all be great men if we could be measured by the great things we intend to do to-morrow. -- Atchison Globe.

The foolish and the dead alone never change their opinion - Abraham Lincoln.

### Spelling "Kitten."

A dear little girl, With her brain in a whirl, Was asked the word "kitten to spell. "K-double i-t-T-e-n," said she, And thought she had done very well. " Has kitten two i's? Anh the teacher's surprise Wi h mirth and impatience was blent.

"My kitty has two," Said Marjory Lou. And she looked as she felt quite con-

tent. St. Nicholas for December.

A young lady making a collection of curious from all parts of the U.S. will be glad to receive specimens, in return for which she will send full directions for making a silver platter. Address, Miss Georgia Factor,

### Compound Numbers.

Compound numbers are not the difficult things that many consider them. The subject should be taught in the most simple manner, let every step be analyzed and the first problems should be very easy that the pupil may comprehend every principle involved, and until the learner has mastered the method of solution and can explain each step taken. Reduction descending should be given first and it would be well to continue this drill through more than one table. This will teach the pupil the different tables and at the same time give the teacher greater scope to make problems. Follow this drill with reduction ascending. Every step should be analyzed and the learner made perfectly familiar with the proper abbreviations and the form of expressing the analysis. Most pupils look for an answer, they are anxious to obtain a result, and think but little of the thought involved in the problem. The analysis should not be shortened but each equation should contain everything than can be said. This teaches the child the full force of a concise statement, and conforms to his language lesson, which all agree should not be in any manner clipped more than that which is necessary to do away with the superfluous words. The entire thought must always be retained. Linear measure should be used first as it contains all known terms and is possibly the most familiar to the clild. Dry measure should follow, as it is the most simple, and contains the unknown terms.

### ALL THESE BOOKS FREE.

To every one sending us Ten Cents in Silver and Five Cents in Stamps, for a Ten Weeks' trial subscription to THE SATURDAY BUDGET, we will give Absolutely FREE the following Books: Life of Gen. U. S. Grant, Representative Men of New York, John G. Whittier's eive specimens, in She will send full ng a silver platter. Sorgia Factor, Courouty object in making this Great Offer is to introduce into new mesour mammoth family paper, containing 8 LARGE PAGES, 48 LONG COLUMNS, and published weekly, at \$1 a year. Don't miss this chance. Budget Pub. Co., 15 Vandewater Street, New York.

### School-Room Hints.

Keep your school room air tight. If your pupils get into the vicious habit of breathing fresh air, their parents can hardly keep them in the house at all.

Let the children breathe carbonic acid gas; they should learn to live under unfavorable circumstances. Some will die, of course, but the fittest will survive; and the race will evolve toward physical perfec-

You may succumb to your disease yourself, but that will be all the better for those who are left to struggle in an over crowded pro fession.

When the heat becomes too intense, you may let down a window from the top—always from the top. In this way both the room and the children can be chilled without allowing the escape of any carbonic acid gas, which is heavier than air and settles to the floor.

If any dust accumulates on the floor, stir it up before you dismiss, and let the children carry it home in their lungs. Then you will be rid of it.

In the evening, when breathing and re breathing has consumed all the oxygen of the air, the doors and windows should be closed carefully so as to pen in the nitrogen and carbonic gas to be used again next day. If this is not done the room will become filled with a deadly poison, namely, night air, and we all know what a dangerous thing that is.

Curtain the windows. Let the children grow in the shade; then they will get beautiful complexions and beautiful white tombstones.

But these rewards are useless, perhaps, for what I advise is being done already, and, as far as original nality is concerned, I deserve no credit; for the things that I suggest I have seen done quite often. —Educatronal News.

In this day ignorance is not to and in fewer of our grammar grades its waters, but we should not name be commended. I have heard serves to bring out by way of contrast the darkness that obscures surface of the stream. Scholars ignorant young girls discuss "La knowledge in the public school do not receive aid as they ought ignorant." system as a whole. From the from the correlative studies of lan- have made a dowager's wig stand

know what they were talking about.

Shall young girls read the daily newspapers? Certainly. Two or three times in my life I have met families—I am happy to say that they were not Americans—where the young people were not allowed to read newspapers, and a more sweetly inane and stupid set of young women I have never been condemned to meet.

Keep the "Duchess" and all others of that ilk away from young ladies while they are at school, and when they have finished a good course of English grammar and rhetoric they will not be satisfied with the inferior productions of the

publishing world.

While the habit of study and the love of research is still with her, a young girl can do no better than to join a reading club, or to agree with an old schoolmate to meet once a week to read the master-pieces of English literature. She should read Chaucer's 'Canterbury Tales,' Spenser's 'Faery Queene,' Dante's 'Inferno,' 'Paradise Lost, 'Carlyle, Emerson, and just as much poetry as she can find time to read, both silently and aloud. I wish that more were ready to enjoy the earthly paradise of William Morris, and the intensely human poetry of Helen Hunt Jackson. She should at least dip into famous old novels like 'Clarissa Harlowe' and 'Evalina.' I do not think it well for young girls, or any one else for that matter, to read books like 'Robert Elsemere,' which are cal-culated to shake their religious faith -San Francisco Call.

The first clock factory in this country was opened by Mr. Eli Terry, in 1793. The centenary of this event will be appropriately celebrated in Connecticut, where great preparations for this purpose have already commenced.

Miss Sadie Battles is said to be the first girl in America to learn the trade of diamond cutting and polishing. She has been in the employ of a New York firm for twelve years, and is considered one of the best artisans in that line in the country.

### A Little Study in Anatomy.

How many bones in the human face? Fourteen, when they're all I place. How many bones in the human head? Eight, my child, as I've often said. How many bones in the human ear? Four in each, and they help to hear. How many bones in the human spine? Twenty-four, like a climbing vine. How many bones in the human chest? Twenty-four ribs and two of the rest? How many bones the shoulders bind? Two in each—one before, one behind. How many bones in the human arm? In each arm one: two in each forearm. How many bones in the human wrist? Eight in each, if none are missed. How many bones in the palm of the hand? Five in each, with many a band. How many bones in the fingers ten? Twenty-eight, and by joints they bend. How many bones in the human hip? One in each, like a dish they dip. How many bones in the human thigh? One in each, and deep they lie. How many bones in the human knees? One in each, the kneepan, please. How many bones in the leg from the knee?

Two in each, we can plainly see.
How many bones in the ankle strong?
Seven in each, but none are long.
How many bones in the ball of the foot?
Five in each, as the palms are put.
How many bones in the toes half a score?
Twenty-eight, and there are no more.
And now altogether these bones may wait,

And they count in a body two hundred and eight.

And then we have in the human mouth, Of upper and under, thirty-two teeth.

Ank now and then we have a bone, I should think.

That forms on a joint or fills up a chink.

-Selected

Acute sensibilities are intended as a direct means of aspiring generous impulses and cultivating a benevolent character. To him who is always sensitive for others as well as for himself they are not a torment, but a blessing. The pleasure and pain he feels and the sources to whom he traces each are his continued guides to show him how to diffuse the one and to mitigate the other in his intercourse with mankind. Nothing is more selfish than a narrow, self-pitying sensitiveness, nothing more ennobling than a sensitive spirit keenly alive to all good and kindly influences.

### Corporal Punishment Illegal.

The general interest taken in the infliction of corporal punishment by school teathers bespeaks the existence of a healthful public sentiment. The whip for human backs is a relic of barbarism and superstition, no matter by whose hands applied. Why should laws be passed making it a crime to beat a grown person, while none are passed to protect the helpless children? If there are to be whippings allowed by law, why not reverse the situation and make it a crime to bruise the flesh of the helpless, while winking at assaults bestowed upon the vigorous adult? The true practice would be to make all physical violence unlawful, and to punish the assaulters according to the youthfulness and strength of the assaulted. The more helpless the victim, the more severe the penalty should be. Some day society, which has decided that none but parents shall torture human flesh, will say that even parents may not do so. Brutality begets brutality, no matter who inflicts it.

### Free Text Books a Success.

State Superintendent Luce of Maine says the free text-book law has increased the attendance of the public schools. His idea is that the greatest benefit is derived in cases where children have progressed a certain distance in the schools, and been obliged to step out because their parents do not have the money to purchase books, which increase in cost the further the pupil advances. Now the books are free and the scholar can continue attendance until the education is completed, if the cost of text books is the only consideration.

The deferring of work that has to be done to the last possible minute, the putting off till tomorrow that which might be done today, means nothing else than using up one's supply of lessure before it is fairly earned, leaving space only for a turn of hammer and tongs, which it will not do to interrupt at any price.

### Bills to Pension Teachers

The pension bill before the New York legislature retires all teachers at sixty to sixty-five years of age, after forty years' service, on pensions ranging from \$400 to \$1,000 | 24. Graduate of Oxford-John a year, according to grade. Teachers mentally or physically disabled in the service may be retired at the end of twenty-five years of active duty.

introduced a bill into the New Jersey legislature which pensions what constitutes an education." school teachers as follows on half State clearly the necessity for this. pay: Male teachers who have taught thirty years and a e sixty years of age, or who have become disabled, and female teachers who have taught twenty-five years and are sixty years of age.

### Science of Education.

I. "Every teacher, before he Senator Key of Somerset has begins the work of instruction, should have some definite idea of

> 2. What is meant by an ideal? How are ideals constructed?

> 3. Define moral judgment. What kind of mental act is that by which the distinction between discerned?

> 4. What relation do you conceive to exist between clear moral judgment and right moral action?

5. What is the function of the teacher in the recitation.

teacher appeal in his effort to lead pupils to be attentive and earnest in their work.

I. He must have some definite idea of what constitutes an education, in order to work for a pur pose; that he may not experiment with the minds of the pupils; and that he may have just views of education.

2. An ideal is a standard model of perfection, or duty. It is a mental creation.

3. (a) It is a pure, unbiased judgment.

4. Right moral action is a volition of right moral judgment.

5. He must excite interest in the minds of his pupils; he must price of the chair was \$25; how tell well what he imparts; he much mouey did each give?" must stimulate the child's mind, and test its knowledge of the subect.

He should appeal to his 6. sense of justice; his desire for improvement, and his sense of duty.

Little minds are too much wounded by little things; great minds see all, and are not even hurt .- La Rochefoucauld.

### Try Them.

Pupils, even in the higher grades, are often "picked up" by simple little problems. Not because they do not know them, but because, for the moment, they do not think. It should be the constant aim of the teacher to put the power of the pupil on the alert, to sharpen the perception, and to teach him to keep thought awake. Following are a few forms for problems, which, if similar work has not already been done, will develop some surprises.

As already suggested, these forms are only intended for examright action and wrong action is ples. They may be varied in words and numbers, so that the same principle may be involved for several successive lessons, and yet the problem vary with each repetition. They must, of course, be read by 6. To what motives should the the teacher, to have the desired effect.

> "Frank and I went to the city; each bought a bill of goods amounting to \$35. Not having money with us, we promised to send it next day with a neighbor. How many five dollar bills should we send to pay our debt?"

> For smaller pupils the question may read, "What amount must we send?"

"I have two brothers and two judgment of conduct. (b) Moral sisters. Christmas we presented father with a cane chair. Each gave three dollars; what was the cost of the chair?"

Or, let the question be, "The

"A merchant died leaving property, amounting to \$36,900, to his widow and children. There were three sons and two daughters. If all shared equally, how much did each receive?"

To endeavor to forget any one is the certain way to think of nothing else.—La Bruyere.

Prof. Silverthorn has been enrolled as an honorary member in Clio.

Physical exercises, led by Miss Acken, now form an occasional feature of morning chapel.

A piano solo by Miss Lenore Taylor was an enjoyable part of the chapel exercises May 9th.

Mrs. J. S. Elliott, known at the Normal as Minnie Peterson, died recently at her home at Coal Bluff.

Misses Belle and Chat. Sterling have our sympathies in the loss of their father, who died April 25th.

· The Seniors on their Washington trip were accompanied by Miss Keener, Miss Goe, and Mr. Hertzog, '91.

Miss Myrtle V. Dixon, of Grandville, a student of last year, was married April 27th to Mr. J. L. Heiner, of the same place.

Hon. Dr. Graham, of Florence, Pa., and L. P. Beazell, a member of the Board of Trustees, were chapel visitors April 29th.

Mr. Addison Winnett and Miss Bertie Withrow, both former students and successful teachers, were married on Tuesday, April 19th. The best wishes of THE REVIEW attend them.

V. C. Rader, '87, has completed a medical course in Baltimore. He paid his friends in California a visit a few weeks ago. We wish Dr. Rader all success in his chosen profession.

Mr. N. B. Countryman, '90, is teaching his second term in the Eureka school, Mt. Eden, Cal. His employers have recently manifested their appreciation of his good work by an increase of salary.

After the return of the Seniors from their Washington excursion, Miss Lytle and Mr. Meyers, of the Senior class, and Miss Downer, of

the faculty, entertained us in chapel with some chapters from their experiences while away.

Mr. J. A. Berkey, '84, of Somerset, Pa., has received the nomination for District Attorney in his county by the Republicans. This in that county, is equivalent to an practice soon near Columbus, Ohio. election.

Mr. G. W. Snodgrass, '86, who has been attending Lane Theological Seminary, has accepted a call to supply the Mt. Adams Presbyterian church, of Cincinnati, during the four months of his summer vacation.

The Senior class has elected as class day performers, orator, Mr. Powell; poet, Mr. Baker; prophet, Miss Phillips; historian, Miss Longdon; consoler, Miss Horne; class ode, Miss Greathead; donor, Miss McClure.

The election of trustees, May 2d, resulted in the choice, by a large majority, of L. S. Miller, G. G. Hertzog, Wm. McFall and Frank Craven. Col. C. W. Hazzard and H. T. Bailey were recommended for appointment as State Trustees.

Messrs, T. A. Humbert and R. H. Jamison, and Miss Nannie Cunningham, former students, passed the examination for permanent certificates in Uniontown this spring. Principal Lee Smith, of Uniontown, was chairman of the examining O. O. Anderson, a committee. present student, was also a mem-

Dr. T. B. Noss still continues to discharge his duties as principal of the California State Normal School. He was among the first to join Normal Society, and always one of its strong supporters. Dr. Noss is a man of high intellectual and moral standing, and has attained an enviable reputation as an edueator. -Shippensburg Normal Literary Gazette.

J. I. Humbert, '84, was licensed, preach by Redstone Presbytery at It. last meeting.

Dr. E. E. Scott, '82, of Toledo, O., has been elected a member of the Board of Education of that city.

W. R. Scott, '90, has completed a medical course at Chicago and will begin

Miss Anna Powell has resigned her position in the schools of Homestead on account of illness, and her place has been filled by Miss Elva Hertzog.

L. S. Day, '82, took part in the annual prize contest at Washington and Jefferson College, April 22d, on Essay, receiving second prize. His subject was "Straggle."

Dr. Noss preached an able sermon in the M. E. church of California on April 10th, from the text: "The words that I speak unto you, they are spirit and they are life."

Among the delegates to the Ref. can Congressional Conference 24th District we notice the names C. W. Yarnall, S. S. Pattersont Cooper and W. C. Steele, all forme dents of the Normal.

The NORMAL REVIEW is, paper issued monthly by t fornia State Normal School. a very attractive paper and is e. tremely well edited. The Language Department is one of the most attractive and instructive features of the paper, and it certainly serves as a great aid to any one engaged in teaching -Shippensburg Normal Literary Gazette.

One of the most enjoyable incidents : of the term was the visit of the DeMoss family. At their concert, given on the evening of April 23d, a large audience was present, which listened with great pleasure to their skilful playing on over forty different instruments. On Sunday evening following, they took part in a praise meeting held in the chapel, at ; which all the congregations in town were present, filling the chapel to overflowing. Their last appearance was Monday morning chapel, when they a quartette which elicited hear: plause from the entire school. W all be pleased to have them retu some time in the future.
