BSC Will Offer B.A. Degree, 1963

The initiation of a liberal arts program at BSC in September 1963 has been officially approved by the State Council of Education. With it BSC will offer a Bachelor of Arts degree in the Humanities, Social Science and Natural Science.

Before the program is begun in September 1963 the college must employ a director of Liberal Arts Curriculum, and an out-of-state consultant to organize a series of liberal arts faculty workshops in the philosophy and purposes of a liberal arts program. These are needed to meet the requirements of the state council of education.

The faculty needs cited by the college for the future include additional instructors in math, foreign language, and philosophy. In respect to faculty, the College has been preparing for the initiation of a liberal arts program for several years.

Basically, the changes that students will make, aside from the field of specialization, will be the necessity of a year of foreign language, a year of college mathematics, and a year of a laboratory science.

The Maroon and Gold welcomes all students interested in joining the staff. Organizational meeting Monday, September 17 at 4:00 p.m.

Have you noticed the stately beauty of Waller Hall Dorm—with the TV antenna beside it.

Hats off — our frosh dinks are at last a true Maroon and Gold.

Summer School Enrollment Is Largest Known

BSC had the largest summer school enrollment in the history of the college this past summer. With a 50 per cent increase over last year, the growth in the graduate division was especially encouraging. The total enrollment for the summer was 1,871, with the main session attracting 768 and the pre and post sessions, 617 and 486. An unusually large demand from students of other colleges and universities for history courses was noted. The favorite of the summer seemed to be the elementary workshop, which was attended by 60 teachers-in-service and required three college instructors.

The course in radiation biology, that utilized equipment purchased with the funds from the Atomic Energy Commission, had a maximum enrollment. This class is limited to 15 students and will again be filled in the first semester.

Classes in the field of social studies and English showed a sizeable increase also. The probable reason for this being preparation for the future offering of the new liberal arts program in these areas.

On the graduate level, there was a considerably larger enrollment in business education and a significant change in the size of the elementary education classes.

An excellent program of assemblies was held last summer, some of the features were: Anna Marly, French guitarists; Roy Garn, authority on emotional appeal; Surya Kumari, an Indian film star; Vincent Lopez; Dr. John Goodland; Dr. Dorris Lee, and Robert L. Drake.

Resignation and Increased Enrollment Necessitates Eighteen New Appointments To BSC Faculty; Membership Now 127

Dr. Harvey A. Andruss and Dean John A. Hoch are shown above with the new members of BSC's community.

Seven Replace Resigned Faculty - Increase of Eleven

Eighteen new faculty members have been added to the BSC staff. According to Dean Hoch, seven appointments were made to replace faculty who have resigned, and eleven are additional appointments to handle increased enrollment. Total faculty membership is now 127.

ENGLISH and SPEECH

Mr. Robert G. Meeker is a new faculty member and instructor of English at BSC. Mr. Meeker is one of eighteen new faculty members to join the teaching staff at the College this fall.

A native of Lackawanna, N.Y., Mr. Meeker was educated in the elementary and secondary schools of Glen Ridge, N.J. He earned the Bachelor of Arts degree in English at Lafayette College and the Master of Arts degree in English at the

University of Scranton, and has done graduate study at Wilkes College and Temple University.

Mr. John R. Oulmet, a member of the faculty of Syracuse University, is a new member of the BSC faculty. He is an instructor of speech.

A native of Troy, N.Y., Mr. Oulmet was educated in the schools of Watervliet, N.Y., and El Paso, Tex. He earned the Bachelor of Science degree from Syracuse University, and has been engaged in graduate studies at Syracuse and New York State University at Albany, N.Y.

SPECIAL EDUCATION

Mr. Richard P. Iano has accepted a position as associate professor of special education at BSC.

A native of Brooklyn, he was graduated from the Erasmus Hall High School in Brooklyn before enrolling at Syracuse where he earned both the Bachelor of Arts and Master of Arts degrees. He is continuing his work as a candidate for the Doctor of Education degree.

Edard G. Mayer, Director of Special Education classes at Lycoming County Schools since September, 1960, has accepted a position on the Bloomsburg State College faculty as assistant professor of special education.

Mr. Mayer was born in Williamsport, and is a graduate of the pub-

WELCOME TO ALL STUDENTS

With the increase in the enrollment to around the 2,000 mark, a college newspaper has the responsibility of keeping the lines of communication open for all members of the College Community, composed of students, faculty and administration.

That this newspaper will meet this challenge and that students will read it carefully is the hope of

HARVEY A. ANDRUSS, President

IBM System Implemented First Time at BSC on Class Schedules

The IBM system was implemented for the first time at Bloomsburg State College on the class schedules for the 1962 fall semester. In charge of the IBM operations are Donald Housenick, formerly with the IBM department of the Magee Carpet Company and Mrs. Angelia Gerhart, formerly with Acme Fast Freight in Scranton.

The new system has an unlimited number of uses. It will provide a schedule with the bill attached to it. In scheduling for the second semester this year it is hoped that the student will receive a printed schedule by December. The grades and quality point average will be received two weeks after the completion of the semester. Also a mid-semester grade report will be sent out. It is obvious that the greatest asset of the IBM operation is its promptness.

The machine will also have many uses in the future. It can be used for college billing and in business education courses. This training will be valuable as most of the accounting today is done on such machines.

Probationary lists will now be made overnight, thus student-faculty conference can get underway immediately instead of several months after the semester is over. Extra-curricular credit will be registered on special cards and high school activities will be put on special cards for use by the athletic department, band, etc. The machine will aid the post office considerably as the mailing lists will be available almost immediately.

It is requested that patience is exercised in moving to the new system and that a minimum of help be requested. The student's attention is called to the coding in the upper right hand corner of his schedule. He should check it carefully and note that the rooms in Noetling Hall that were formerly E, F, J, K, and L are now 10, 11, 12, 13, and 14 respectively. Also a new code for the building which is A—Carver, B—Noetling, C—Science, D—Navy, E—Special Education Center, F—Ben Franklin, G—Sutliff Hall, and H—Centennial.

Course Changes Are Discouraged

The divisional directors have been notified by the Dean of Instruction to discourage any change in class schedules unless a valid reason is presented. A schedule change can be made by the divisional director only, not the IBM personnel.

The reason for this statement being the extensive difficulty and time consumed in making the change a single schedule. During that time the key punch, reproduction punch, interpreter, sorter, and printer machines are utilized.

A maximum of thirty students was established for each class, thus, any students registered in a section that had already reached its maximum of 30 were put in other sections of the same class. Courses in physical education were the only exception to the limit of 30, here the maximum was 35.

Admission to class is made only on the basis of a class list prepared by the IBM center, so that in case the student loses his schedule he may still be admitted to class. Other than a class list, the only way a student is allowed to enter a course is by the presentation of a permit from the divisional director.

Schedule of Activities

Saturday, September 15

The M&G is here.
Registration and first class meeting of graduate courses.
Orientation breakfast in College Commons.
8 p.m. Feature Movie — "The Perfect Furlough" starring Janet Leigh and Tony Curtis.

Monday, September 17

Freshmen classes begin.
M&G Organizational Staff Meeting, 4:00 p.m.

Tuesday, September 18

2:00 p.m., President's Convocation, Centennial Gym.
3:00 p.m., Big and Little Sister Tea, College Commons.

Friday, September 21

7:30 p.m., End of Customs, Pep Rally, Dink Burning, Dance, Centennial Gym.

Enrollment Figures Expected To Exceed 2,000 Mark; Only 550 Freshmen Accepted Admission

First semester enrollment figures are expected to exceed 2,000. This was the enrollment anticipated by the admissions office, but it is thought that a larger class is not entering because of local financial stress, according to Dean Edwards.

There were 3,316 applications distributed this year. Admission was offered to 625 freshmen, however only 550 accepted. A group of 34 transferring students, 24 former students returning and nine special students will also be entering BSC this fall. In addition to these there will be regular students, graduate students and those enrolled in the graduate program for public school nurses. The total enrollment of these seven categories is expected to exceed 2,000.

This year's enrollment has not had a noticeably large increase. Aside from stiffer entrance requirements, one of the major reasons cited for this has been economic. A significant case in point being that the request for entrance from the Berwick area is almost 50% of last year's total. The obvious cause here being the financial stress and large volume of emigration resulting from the closing of the American Car and Foundry plant located in Berwick.

The choice of curriculum has run the usual course though. Secondary has had its customary popularity, attracting almost 300 of the freshman class. Next in favor was elementary education, with business and special education falling last.

Shown above is one of the IBM machines recently installed at BSC.

Girl Editor Ready for Press

The fatal day has now become a reality — the first issue of the M&G has arrived! With its arrival, yours truly, Dianne Campbell — girl editor, will be diligently searching for mistakes and undoubtedly finding them.

Searching for mistakes and criticizing work seem to be a very important part of the newspaper world. This statement has become a definite reality in my mind as I become increasingly aware of the responsibility of the newspaper to the community — college and otherwise.

With this awareness of the newspaper's responsibilities there is an equal realization of the editor's responsibility to the newspaper and its staff. It's at this point that one Maroon and Gold girl-type editor begins to have weak knees.

But after the initial fright wears off I must admit that my "red-blooded American girl" spirit bursts forward. Then I'm ready to lick the world and the New York Times both at once — with one hand tied behind my back!

In any case, I'm hoping for a good publication this year. As you've noticed we now have newsprint, a new masthead and have removed column rules. These are improvements that we have been wanting to make for quite a while. My next goal is one that may take some time to realize. I, personally, would like to see the Maroon and Gold become a regular six-page publication. The ultimate goal would then, of course, be a six-page weekly publication.

Financially, I am almost certain that this is possible. The possibilities for advertisers in this area is unlimited. Bloomsburg State College is an important part of a multiple-county area and, in the immediate locale, its importance could well be termed "vital." Business establishments and professional people are eager to advertise in the college publications. A six page newspaper has all the more appeal.

Since this is no great problem the biggest step will be a staff. To realize my goal, a dependable, interested staff is a necessity. We have a good core of divisional editors to work with. **Blair Hartman** is the news editor; **Kathleen Roselli**, the feature editor; **Bob Derkits**, the business manager; **Carolee Murray**, the sports editor; and **Shirley Segin** is the advertising manager. With these people in charge and a good staff of reporters, feature editors, photographers, and typists we can and will have a newspaper that reflects the quality of the college and its population. I think we can do it. **I know we'll try.**

Dean Jackson Makes Journey West To See World's Fair at Seattle

Across the nation, people enjoying the 3 month summer vacation have been journeying to the Seattle Washington World's Fair. Joining in this pilgrimage was BSC's own Dean Jackson.

In her description of the fair Dean Jackson states that one of the features of the fair that displeased the visitors most was the long line in front of each exhibition. At the especially good exhibits one never waited less than two hours. However, upon entering, it became evident that it was well worth the time spent.

When asked about the unique features, the first thing Dean Jackson mentioned was that everything was manned by college students. Since the theme was Century 21 it seemed that their presence set the tone. "It is their century year now" Dean Jackson stated.

Among the buildings visited, those that most impressed Dean Jackson were the space needle, the century 21 building, the U.S. exhibit, and the Science Building. The International Fountain and Glenn's space ship were two features that aroused much enthusiasm.

The Ford exhibit was on the order of a jet liner. The visitors were seated and took an imaginary trip into space. "This gave you a concept of what was happening in space that you wouldn't have otherwise. That's why people were willing to wait."

In general, it seemed that the majority of the criticism probably stemmed from the fact that the people tried to see the exhibitions in so short a time.

Two Phase Plan Outlined For Expansion of BSC Campus by 1970

A two phase plan has been outlined for the expansion of the BSC campus to accommodate 5,000 students by 1970. This plan has been presented to the Trustees of the College and Directors of the Alumni Association for their consideration.

The first phase includes details related to the increase in enrollment from 2,000 to 3,000 on the present campus site of 60 acres during the years 1962-1967. When enrollment reaches the maximum, it is anticipated that 1,800 students will be housed in dormitories on the campus, and 1,200 will drive from their homes each day or will find accommodations in the town of Bloomsburg during certain years of this period of development.

The second phase will require a second campus of not less than 60 acres to accommodate 2,000 students — 1,200 of whom will be housed in dormitories on campus.

This plan, according to Dr. Andruss, must consider the function of Bloomsburg State College in relation to the proposed community college movement, a junior college, or the lower division of a senior college.

Proposals Considered

One proposal would have students located, during the first two years, in a lower or junior college division on the second campus with a uniform curriculum in general education or arts and sciences, providing for the selection of one of three foreign languages, one of three social sciences, one of three natural sciences, and at least two elective courses in the second year. Thus, at the end of the sophomore or second year, students will divide themselves into one of the following classes: those terminating their formal education at Bloomsburg and receiving the Associate degree; those transferring to other State Colleges; those transferring to colleges and universities other than State Colleges; those continuing in the third and fourth years in the Arts and Sciences curriculums on the present campus; those continuing at Bloomsburg in the teacher-education curriculum.

As part of this new development, the State has purchased the home of Mrs. Marian K. Dillon, Light Street Road for \$50,500.

He must be a Freshman, he's reading the menu.

New Approach Is Used For Customs

Freshman "customs" are no longer in existence at BSC. Instead the term "orientation" will be used and a new approach will replace the traditional "customs" ritual.

The function of this new approach is to help the student adjust to college life more easily and to develop a wholesome attitude toward the college community life, according to Myles Anderson, assistant to the Dean of Student Affairs.

The previous day-to-day plan of various themes such as artist day, professional day, etc., has been eliminated. Important additions are the laboratory period for professional orientation held yesterday, the orientation coffee hour tomorrow at 9:30 a.m., and the dinner for the orientation of new students at 4 p.m. on Sunday.

During these sessions, the freshmen will be introduced to the various aspects of community life, rules and regulations, and the importance of organizations such as the CGA and College Council.

Traditional customs will remain however: all freshmen will be expected to stay off Senior Walk, obey the "Buttons Frosh" command, sing college songs and memorize college cheers.

New Housing Plan In Sutliff House

Twenty-nine resident students whose applications would have been denied because of a full dorm have now been accommodated at BSC. The last minute change is due to additional housing in the former home of Professor Sutliff.

The students who were part of a large waiting list will be living in the home, but will have all the opportunities and facilities of the dormitory available to them. Nancy Devoer, a transfer student from West Chester, will be residing in the home and serving as a Junior Advisor.

According to Dean Jackson the home is near enough to be considered almost on campus. She also stated that she has high hopes for the success of the new housing plan.

Frosh Visited BSC in Summer

The class of 1966 has become accustomed to BSC in a unique manner. A plan initiated by the admissions office with the cooperation of the Dean of Students has provided for them to visit the campus one day during the summer.

This preview served a dual purpose. Groups of 100 students and their parents were invited to visit the campus. While the students underwent their required physical examination, the parents attended an orientation assembly at which Deans Hoch, Edwards, Jackson, Hunsinger, and McCauslin explained various facets of college life.

PARENTS CONCERNED

In the question-and-answer period the parents concerned seemed to show the greatest concern for their part in helping the students maintain a good scholastic average and in general — how to help their children make a success of college.

The initiation of this program has eliminated the necessity of a similar one for the annual parents' day, and this year the format will be changed. Since this pre-registration orientation has met with such great success, the admissions office has decided to continue it for the future incoming freshmen.

Husky Lounge Has Improvement

Husky Lounge takes on new look in bright green.

Husky Lounge takes on a new look this year with the booths re-decorated with paneling of wood-grain formica and light green Nougahide cushions.

Actual construction by Schaub Brothers of Freeland, Pa. began early this summer as measurements were made for the prefabricated paneling. With the prefabricated material used, the installation of the new booths took only five days.

This is the first major replacement made in the lounge. The former paneling and cushions were the ones installed in 1955 when the lounge was first opened. With luck and student respect, these should last another seven years and perhaps more.

Other additions to the lounge are the new menu board, and a change in lounge personnel policy. The menu board is a contribution of Confair Beverage Co., the 7-Up distributor to BSC.

From 9 a.m. to 2 p.m. the Snack Bar will be serviced by five full time employees. There will be no student help until 5 p.m.

Insurance Policy One of Benefits Of Activity Fee

Where does the extra \$5.00 activities fee go? This is a question that is asked quite often, and the M&G shall now clear the issue.

The major part of the fee will pay for a student insurance policy. First, the increase will automatically insure each student against all accidents. This will be twenty-four hour coverage from September to June each year whether the individual will be at home or school. This insurance will also cover intramural and intercollegiate sports as well as traveling to and from college. This insurance will cost \$6.50 per academic year and will give the same coverage as the \$875 individual policy.

New Plan Eliminates Expense

Under this new plan the expense is eliminated. In previous years, for example, each football player paid \$10.00 for insurance which was supplemented by an additional \$20.00 from the athletic fund which made a total of \$30.00 per player for insurance. The new policy saves the athletic department \$20.00 per player.

The remaining \$3.50 of the \$10.00 increase of the activities fee will be used to fortify the increased budgets of organizations such as the Pilot, the newspaper, and the yearbook. It will also accommodate the expenses of new activities such as the Spring Arts Festival.

Originally, the activities fee of \$15.00 was increased to \$17.50, to \$20.00, to \$25.00 this year.

BSC Plan Superior

Many sister colleges with a fee of \$25.00 or \$30.00 don't have the automatic insurance plan, and other institutions with a small fee sometimes do not have as many activities as BSC. The colleges don't subsidize their publications either. Thirty per cent of our budget goes to support our athletic programs.

One third of our college community are commuters. This new insurance program will cover them, without a physical examination,

(Continued from page 1)

lic schools of that community. He earned the Bachelor of Science degree in education at Lock Haven State College and is currently a candidate for the Doctor of Education degree at Pennsylvania State University.

AUDIO-VISUAL ED.

Mr. Gerrold W. Hart has joined the BSC staff as assistant professor of audio-visual education. For the past five years, Mr. Hart has been a member of the Bullard-Havens Regional Vocational-Technical School, Bridgeport, Conn.

Mr. Hart is a native of Newark, N.J., where he completed his elementary and high school education in the public schools of East Orange. He earned the Bachelor of Science degree from Springfield College, Mass., and has continued his graduate studies at the University of Hartford.

BUSINESS EDUCATION

Dr. S. Lloyd Toumey, has been appointed Director of the Division of Business Education at Bloomsburg State College. Mr. Toumey was chairman of the Division of Business Education at Georgia Southern College previous to coming to BSC.

A native of Ridgeville, Ind., Dr. Toumey attended the Jefferson Elementary School of that community and was graduated from Saratoga High School in Indiana. He earned the Bachelor of Science degree in Education at Ball State Teachers College, Muncy, Ind., the Master of Science degree in Education at the University of Georgia, and the Doctor of Education degree from the latter institution in 1955.

Dr. Lawrence Starlight has accepted a position on the BSC Business Education faculty. He will teach undergraduate courses of

basic economics courses and graduate courses of public finance, money banking, and problems in economics.

Dr. Starlight, an honor graduate and member of Phi Beta Kappa, received his Master of Arts degree at Dartmouth and a Ph.D. in Economics at Harvard.

LIBRARY

Miss Mary T. Quigley, librarian for the past four years at the junior-senior high school at Gettysburg has been added to the professional library staff at BSC as circulation librarian with the rank of instructor.

A native of Mt. Carmel, Miss Quigley attended the elementary and secondary schools of Shenandoah, Pa. She earned the Bachelor of Science degree in education at Bloomsburg State College prior to beginning 15 years of employment by the Federal Government in Washington, D.C., and Harrisburg, Pa.

SPANISH

John P. Brady, a graduate of King's College, has been appointed instructor of Spanish at BSC.

Mr. Brady, a native of Pittston, completed his elementary and secondary education in the public school of Duryea. He earned the Bachelor of Arts degree, majoring in the study of modern language, at King's College, Wilkes-Barre.

MATH AND SCIENCE

Charles R. Reardin, Jr., has accepted a position as assistant professor of mathematics at BSC.

A native of Passaic, N.J., Mr. Reardin attended the public schools of Passaic and Paterson, N.J. and Akron, Ohio. He earned the Bachelor of Arts degree at Duke University, Durham, N.C., and has continued his graduate study at the above mentioned colleges.

Mr. Theodore Jones has become a new member of the BSC faculty this fall. He will be professor of biological sciences.

Mr. Jones received his elementary education at the Pocono Lake Elementary School and graduated from the high school of that same community. He received his Bach-

Mrs. Cooper

Mrs. Downs

Two Personnel Changes At BSC

During the summer two replacements were made in the college personnel. Mrs. Marian Downs and Mrs. Betty T. Cooper have filled the vacancies created by the resignation of Mrs. Elenore Knorr and Miss Margaret Eggar.

Mrs. Betty Cooper is the new resident advisor. She qualifies for her position with a life-long interest in this sort of work and several recent workshop courses at Ohio

University. She has two children, James and Tom, and three grandchildren. Mrs. Cooper is a bowling enthusiast and enjoys sports in general.

Mrs. Marian Downs is a new telephone operator and is a veteran of 19 years of service with Bell Telephone. She is a mother of two children, Michael, 15, and Jamie, 11, and enjoys going bowling with her family.

elor of Science degree from East Stroudsburg State College and his Master of Education degree in Biological Science from the Pennsylvania State University.

ELEMENTARY EDUCATION

Miss Dorothy Andrysick has accepted a position as instructor in elementary education at BSC. Miss Andrysick will join the faculty of the division of elementary education and will begin her duties as supervising teacher in grade two at the Benjamin Franklin Elementary Laboratory School.

Miss Andrysick was born in Alden Station, Pa. and attended the elementary and secondary schools of the Newport Township School District. She earned her Bachelor of Science degree in Elementary Education at BSC.

Nerine Middleswarth, a member of the faculty of Mansfield State College for the past eight years, has been appointed assistant professor of elementary education at BSC. Miss Middleswarth will be a member of the faculty of the division of elementary education, and will serve as supervising teacher in grade one at the Benjamin Franklin Elementary Laboratory School on campus.

A native of Troxelville, Pa., Miss Middleswarth is a graduate of the West Beaver High School, Beaver Springs, and earned her Bachelor of Science degree at Bloomsburg State College. She was awarded

the Master of Education degree in elementary education by the Pennsylvania State University.

Ray T. Sunderland was appointed as assistant professor of elementary education and supervising teacher of grade five at the Benjamin Franklin Elementary Laboratory School on BSC campus.

Mr. Sunderland was born in Newton Hamilton, Mifflin County, Pa., and was educated in the elementary schools of that community. He is a graduate of Mount Union High School, Mount Union, Pa., and earned the Bachelor of Science degree at Western Maryland College.

EDUCATION

Robert C. Norton has been appointed assistant professor of education at BSC. Mr. Norton will join the faculty of the department of education and psychology.

Mr. Norton earned the Bachelor of Science degree at Slippery Rock State College and the Master of Science degree at the University of Pittsburgh. He has completed additional graduate work at the University of Pittsburgh certifying him as a guidance counselor and an elementary and secondary school principal.

Mrs. Margaret C. Means, a member of the Westminster College faculty since 1957, has accepted a position as associate professor of education and supervisor of elementary teachers at Bloomsburg State College.

A native of Williamsport, Mrs. Means was educated in the public schools of both Williamsport and Lewistown. She earned the Bachelor of Science degree in Elementary Education at Indiana State

Band Prepares For Busy Season

Last week forty-four students arrived on campus for the annual Maroon & Gold Band Camp under the direction of Mr. Nelson A. Miller, chairman of the department of music, and Dr. Charles H. Carlson, assistant director of the band.

The twenty-nine women and fifteen men participated in intensive practice sessions three times a day for three days. The band also held a few drill practices on the football field. During the summer the band uniforms were cleaned and repaired.

During the football season, the band will participate at pre-game pep rallies, for both home and away games, and in parades scheduled by the Pep Committee of the Community Government Association. The band will also participate in the Homecoming Parade.

Faculty Members Receive Doctorate

Donald A. Vannan, fifth grade teacher at the Benjamin Franklin Laboratory School has received his Doctor of Education degree from Pennsylvania State University.

Dr. Vannan, a native of Danville, received his BS degree from Millersville SC and his Master's from Penn State.

Charles R. Halstead received his Ph.D. from the University of Virginia. A native of the greater New York Area, he received his B.S. degree from Siena College and his Master's from the University of Virginia.

College (Pa.), the Master of Education degree at Pennsylvania State University.

A. J. McDonnell is a new member of the BSC faculty as an assistant professor of education and supervisor of secondary student teachers.

A native of Sunbury, he attended the public schools in Upper Augusta Township, and was graduated from Sunbury High School. He earned the Bachelor of Science degree at the Pennsylvania State University and was awarded the Master of Education degree in guidance and psychology.

ASS'T DEAN OF STUDENTS

Myles J. Anderson is a new member of the BSC faculty and is the assistant to the Dean of Students. A graduate of BSC, Mr. Anderson is currently enrolled as a graduate student at Bucknell University.

Sportsman's Diary . . .

by Ed Berlin

Well, another trout season has passed on leaving behind another collection of pleasant memories of the big ones that got away and the smaller ones that didn't. Looking back over this past season, I can't help feeling that it was unlike any other trout season I have ever experienced. The season opened with cold weather and snow. Anyone who was out the first day will long remember the driving snow and cold temperatures that sent most fishermen running for home before the day was half over. The cold temperatures stayed with us for almost a week, but then the weather settled down to the usual spring pattern.

The two things that made the early part of the season so different from other years were the low water conditions and the number of trout caught. Very few of the "old-timers" that I know can recall a spring when the water level was so low in our streams. Most of the larger streams in this area were running nearly a foot below the usual spring level. This was probably due to the lack of any heavy snow accumulations during the winter, and the fact that March and April did not bring their usual heavy rainfall. Despite the relatively low water level, the early season trout catch seemed to be well above normal. Everyone was catching fish. I don't recall meeting anyone during April, May, or June who complained about poor fishing or a lack of fish.

With the beginning of real summer weather in July, the fishing just reversed itself. The water level of the streams continued to drop until some were reduced to a mere trickle. The water became so warm in the local trout streams that many fishermen did their wading in swim suits instead of boots. Under these conditions the fishing really dropped off. Fishermen, who, in the spring, had returned home with full creels, now had to be content with one or two fish a day. Conditions got so bad that one day in late July I fished the whole day without seeing another fisherman the entire time. This was a rare occurrence indeed considering that the stream I was fishing is probably the most popular in the area. Even the dry fly fisherman, who usually take more fish in late season than anyone else, reported extremely poor fishing. I know of only two gentle-

BSC Host NAIA Tournament in Spring of 1963

The Husky Grapplers will be climaxed their season by hosting the NAIA National Tournament March 14, 15, 16. This year we are the defending champions and will be trying for the first place to chalk up a record of three first awards in four years, the previous top placings being in 1960 and 1962.

Shippensburg will host the State Tournament this year. In former years it was usually held either at Lock Haven or BSC.

The varsity squad will be fairly intact this year with only Don Poust, the 177 pound state champ, not returning. Coach Houk does have several frosh wrestlers beginning this fall who he hopes will be ready to take over the senior positions till the end of the season. They will be in competition with the junior varsity squad that went undefeated last year.

The four freshmen coming up will be Tom Vargo, 165 pounds, of Danville; Jim Rolley, 127 pounds, of Clearfield; Dick Miller, 145, of Clearfield; and Robert Gibble, 120, of Manheim. Returning after three years in the U.S. Army is Bill Rabb, a 130-pound first-string wrestler who went into the service in 1959.

Coach Houk stated that we can expect an outstanding season this year as long as "Senior Apathy" doesn't set in and the boys have the proper mental attitude and are willing to work.

men who took trout consistently during the summer. One of these men fishes minnows, and the other uses artificial nymphs. Both know more about trout and their habits than the trout themselves do.

So, in the final analysis, we can say that this was truly a different trout season. Early season catches ran from good to excellent, and the late season was just plain poor. But we should not judge a trout season on the number of fish caught or lost. These are only the material returns of fishing. We must also take into account the experience gained, the good fellowship of our fishing companions, and the relaxation and happiness gained from just being on the stream. Taking all of these into consideration, it is hard to rate any fishing season anything but excellent.

Houk Named "Coach of Year"

Coach Houk

Coach Houk, wrestling coach at BSC has been named "coach of the year" by the NAIA. This is the second year that the honor has been granted. Last year the coach chosen was Hubert Jack of Lock Haven. The selection is made by the coaches attending the annual NAIA Tournament.

During the summer coach Houk conducted a wrestling camp at Maple Lake for five weeks. He operated with a maximum of 100 wrestlers a week and had boys coming from 10 states. In addition to Pennsylvania, others represented were Michigan, New York, New Jersey, Connecticut, Delaware, Maryland, West Virginia, Ohio, and Georgia.

Gridders in High Spirits

BSC gridirers in fine shape.

Husky gridirers are in high spirits this year, and Coach Blair is optimistic for the oncoming season.

Twenty lettermen returned from last year's squad for the pre-season practice. Fifteen other upperclassmen and thirty freshmen were among the sixty-five gridiron candidates at the practice sessions.

The line is much improved by several experienced men, and good passing will be expected of Rohrer, Robbins, Scott, Pieffer, Clembara, and De Valo.

Right now the most outstanding weakness seems to be in the defensive unit. After the first scrimmage with Bucknell University, a more accurate estimate of team strength can be made.

The general attitude of the squad is favorable and several players gave statements to your M&G reporter:

Frank Hydro, a freshman, "The backs are very powerful. They can really run. The line is big and is going to be hard to move. We should go far this year and win a lot of games."

"Little" Joe Casavella, a junior, "With the attitude the boys have, they're going to go all the way."

Moses Scott, a senior, "We hope that the seniors will lead the squad to the championship they've been working toward the last three years. We'll achieve this goal with a team that's dependable, ambitious, and willing to work."
