A. L. Codran

STATE NORMAL SCHOOL

YEAR 1878-79.

FOINBORO, ERIE COUNTY, PENYA

SPECIAL NOTICE.

The State Aid of \$50.00 to graduates is usually sufficient to repay all the tuition previously paid by the student. In many cases it is much more than sufficient.

The expenses per year to economical students run from \$90,00 to \$140.00.

CIRCULAR

OF THE

Northwestern State Normal School,

LOCATED AT

Edinboro, Erie Co., Pa.

Design.

The school is established and equipped according to the "Act of Assembly" of 1857, as an institution to prepare teachers for the Public Schools of the State. It aims to prepare teachers by

1st. Giving thorough instruction in such branches of learning as are taught in the schools of the State, including Graded and High Schools.

2d. Giving instructions in the Theory of Teaching, including methods of study, methods of reciting, methods of instructing, and methods of governing.

3d. Training students in the Art of Teaching.

4th. Offering examples of good teaching.

Classes of Pupils.

1st. Those who have taught school, who want to learn how to teach better, and who expect to teach a few years only. 2d. Those who never have taught, but who intend to teach.

3d. Those who wish to make teaching a profession for life.

4th. Those who wish to study instrumental music or some special study.

5th. Children from eight to fifteen years of age whose parents wish to send them where they will be well grounded in the common branches, and where they will have a good home and good care.

Means Employed to Train Teachers.

These are: First, thorough study by the pupils. We expect students to study their lessons, and to become familiar with hard study. They are taught that all education is, and must be, self-education.

Second, careful and critical recitation under the direction of the teachers. We expect the pupils to recite without assistance from the teachers. The teacher aims to direct, encourage and stimulate the pupils.

Third, the study of teaching. This includes three distinct courses of study. The first embraces the object, means, and methods of teaching, the motive of the teacher, and the methods of organizing, conducting, and governing schools. The second treats of the methods of teaching the various branches of study. The third relates to the study of the mental and moral powers, their nature and culture.

Fourth, practice in the Model School. All who intend to graduate, and such other students as are prepared for it, practice teaching in the Model School. Students teach half an hour to an hour a day while devoting the most of their time to study and recitation in the Normal School. They try to practice the principles of teaching as they have 6. 7. 8, l(tea)

Stuc lessons ing; to learned them in the Normal School. They compare their work with their standards of good teaching, and receive advice and instruction from the Superintendent of the Model School and the teachers of the Normal School.

Methods of Teaching.

The methods of instruction are based upon the following assumed truths:

- t. All improvement is self-improvement.
- 2. Teachers can help those who try to help themselves.
- 3. Study, rightly pursued, is pleasant.
- 4. In education, method is everything.
- 5. Learning, to be useful, must be exact.
- 6. Good habits can be formed.
- Self-reliance, perseverance, and energy can be cultivated.
 - 8. He who does the best he can, does his duty.
 - 9. Every one can do his best.

The Instructors Aim:

- 1. To direct the students in their choice of studies.
- 2. To show them how and when to study.
- 3. To teach them how to teach themselves.
- 4. To advise them in the use of their time,
- 5. To inspire them with the love of learning.
- 6. To encourage them in gaining knowledge.
- 7. To train them to right habits of thought and action,
- To lead them to regard the performance of duty as the greatest good.
- To have them perform every duty in the best possible manner.

Students are expected to study the subject-matter of their lessons thoroughly; to give undivided attention while studying; to learn every lesson at a single study-period; to study A knowledge of the mental and moral powers, and the methods of training them.

 A knowledge of the methods of teaching the different branches of study.

3. A knowledge of the methods of organizing and managing public schools.

THE PRACTICE OF TRACHING.—This includes forty-five minutes daily practice in the Model School for one half of a school year, and two meetings each week for the discussion of the Practice of Teaching.

The theory of teaching must be commenced the second half of the Junior year, and continued during the entire course.

Order of Studies of Graduating Course.

JUNIOR YEAR.

FALL TERM.—English Grammar, United States History, Algebra begun, School Economy.

WINTER TERM,—Algebra completed, United States History, School Economy, Natural Philosophy.

SPRING TERM, — Geometry, Methods of Instruction, Natural Philosophy.

SENIOR YEAR.

FALL TERM.—Physiology, Mental Philosophy, Drawing, Latin.

WINTER TERM.—Rhetoric, Drawing, Latin, Methods of Instruction.

SPRING TERM .- Botany, Rhetoric, Latin, Reviews.

Students can enter this course at any stage of progress, and be allowed credit for all the studies of the course with in fur visi

mar, Book can b publis which they are thoroughly acquainted. None can graduate without attending here one half a school year.

Examination for Graduation.

The examinations for graduation are conducted by the Faculty of the School and a Board of Examiners appointed by the State Superintendent.

The Faculty first examine the candidates for graduation, and if satisfied with their scholarship, deportment, and teaching power, certify the same to the Board of Examiners, for further and final examination.

The Board of Examiners consists of the State Superintendent, the Principal of the School, the Principal of one other State Normal School, and two County or City Superintendents, the last three of whom are appointed by the State Superintendent.

The Board of Examiners test the scholarship and mental power of the candidates, and give Diplomas to those for whom four of the five members of the Board vote.

Diplomas.

Graduates receive a Diploma and Degree of Bachelor of Elementary Didactics. The Diploma is a certificate, valid in all parts of the State, and exempts the holder from any further examination by any officer acting under the provisions of the Common School System of Pennsylvania.

Text-Books.

We furnish Text-Books in Reading, Arithmetic, Grammar, and Topical Geography for use, free of charge, Books in other branches are provided by the students, and can be bought at the Normal School Book Room, at the publishers' retail prices. During the past year, we have used the following textbooks: Stoddard's and Goff's Arithmetics; Colton's and Guyot's Geographies; Monroe's and Osgood's Readers; Swinton's Speller; McGuffy's Speller; Spencerian Copy Books; Smith's Drawing Books; Kerl's and Greene's Grammars; Robinson's Algebra, Brooks' Geometry; Barnes' United States History; Bryant and Stratton's Book-Keeping; Wickersham's School Economy, and Methods of Instruction; Hill's Rhetoric; Norton's Natural Philosophy; Wayland's Intellectual Philosophy; Gray's Botany; Hooker's Physiology; Davies' Surveying; Sauveur's, and Allen & Greenough's Latin Works; Shaw's Literature.

Students should bring such old books as they have. If not used in class, they are often found convenient for comparison. We aim to teach subjects rather than books.

Buildings and Grounds.

The buildings of the school consists of three two-story edifices, containing fifteen recitation rooms, one large hall for public purposes, one Library Room, and one Apparatus Room, one Music Hall with Thirteen Rooms, and two Boarding Halls containing the Dining Room, suites of rooms for the teachers, and one hundred and thirty rooms for students. The grounds embrace twelve acres, a portion of which is laid out and set with shrubbery and shade trees.

the

tage

Pap

Apparatus.

The apparatus of the school is sufficient to illustrate the subjects taught in the Institution. A fine microscope, and many maps, charts, pictures, sets of weights and measures, object lesson cards, charts and material, and other things for visible illustration and for experiment have recently been purchased for the use of teachers and students. A partial list of these will be sent on application.

Cabinets.

A small cabinet of minerals and rocks has long been in the school. Recently an addition has been made to it by the purchase of an amateur's collection. The cabinet now contains several thousand specimens, arranged in cases accessible to the students, and so used as to cultivate in them the habit of observation and investigation. money to pay for the collection was given by students.

A small cabinet of Indian relics belongs to the school. It contains about 1,000 specimens of Indian utensils, weapons, instruments, ornaments, etc., illustrating their mode of life and manners. Among them are arrow, lance and spear heads, knives, hatchets, hammers, fleshers, scrapers, pounders, celfs, pots, pestals, cups, hoes, axes, chisels, charms, etc. They are arranged in a case daily accessible to the students.

A few specimens of Natural History are in the possession of the school. We shall make additions to this collection soon.

Libraries.

The libraries of the school contain about 3,600 volumes, Among these are nearly 500 volumes of books relating to the teacher's profession. There are sets of Reports of the National Teachers' Association, Reports of the American Institute of Instruction, bound volumes of magazines, school journals, etc. Perhaps no Normal School in this country is better supplied with works upon the teacher's profession. The library is open daily from 8 A. M., to 3 P. M., under the care of a librarian.

Reading Room.

A good Reading Room has long been one of the advantages of the school. In it are found all the Educational Papers and Magazines of the country, and some of the

leading Literary, Religious and Scientific Periodicals. The reading room and libraries are now united under the care of the librarian.

Literary Societies.

Three live Literary Societies and two Debating Clubs and several Critique Clubs are maintained by the students with weekly meetings.

State Aid to Students.

The Legislature of the State, at its last session, appropriated \$32,000 to aid students in attending Normal Schools during the year 1879-'80. The conditions of the aid are as follows:

"For each student over seventeen years of age, who shall sign a written declaration that said student intends to teach in the common schools of the State, there shall be paid the sum of fifty cents per week.

"For each student whose father lost his life in the military or naval service of the United States or of Pennsylvania, and who shall sign such declaration, shall be paid one dollar per week.

of-

"To each student who shall graduate during the year and sign an agreement binding said student to teach in the common schools of the State two full years, shall be paid fifty dollars.

"Any student, to secure the benefits of this appropriation, must attend the school at least twelve consecutive weeks, and must attend a special class in the Theory of Teaching:

"PROVIDED, The \$32,000 is not sufficient to pay the sums above specified, then the halance available the last term in the year shall be divided PRO RATA to the students entitled to receive it, on the above conditions."

Model School.

In this department, lads and misses, from eight to fifteen years of age, are received. They are instructed in the Elementary Branches of an English Education. The design is to lay the foundation of a good and systematic knowledge of the subjects studied, to train the pupils to habits of correct thought and study, and to prepare them for the active duties of life.

The Model School is provided with excellent rooms and facilities for thorough elementary instruction. It is designed as a training school for teachers and is supplied with the apparatus and facilities for instruction used in the best schools. Student teachers of the Normal School are here trained in the art of teaching.

Music Department.

A special department of music has been established in order to afford student teachers the best instruction in the art of music and in the true theory of teaching the same. A building containing a small hall for class use, recitation room, office and practice rooms has been erected and furnished with first-class pianos, cabinet organs, wind and stringed instruments for the use of music pupils. The system of instruction is based on the theory that all persons have the music faculty and can cultivate that faculty so as to develop taste and skill in execution, that music is the language of the emotions, which language all can understand and use. For full explanation of the system, methods, expense and facilities, see special music circular, which will be sent on application.

Habits.

It is the design of the Faculty to aid the students in forming correct habits. All students should acquire the habit of —

- rst. Close attention to study in study hours.
- 2d. Learning every lesson thoroughly,
- 3d. Expressing thought clearly and forcibly.
- 4th. Reviewing at the close of each day.
- 5th. Keeping a memorandum.
- 6th. Having and following a written programme.
- 7th. Writing home at regular intervals.
- 8th. Promptness in beginning every study.

Moral and Religious Influence.

All students are expected to attend one public religious service in the village on Sunday, and are requested to attend the service of the denomination preferred by themselves or their parents. Students are required to attend a daily chapel service at 8 A. M., and are invited to attend a half-hour prayer meeting at 6 P. M.

Government.

The object of the Normal School is to prepare young men and women for successful teaching. Before one can become a successful teacher, he must be able to obey the teachings of reason and conscience. Self-government is essential for success in teaching. Our students are expected to know the right and to obey it. They are not subject to a close tyrannical surveillance, but they are put upon their honor to obey the regulations of the school. Each student pledges himself to obey, and none will be retained who are known willfully to violate their pledge.

the

Regulations.

The following embraces the substance of our regulations, copies of which are placed where all can see them. Persons not willing to observe them are not desired as students:

1st. Make school duties the main business.

ad. In school hours give the whole time and strength to school duties,

3d. Attend every required exercise promptly.

4th, Try to excel in every exercise required by the teachers.

5th. Keep and work to a written programme.

6th. Take one hour of vigorous exercise daily.

7th. Review the day's work before retiring.

8th. Prompt retiring at the ringing of the retiring-bell.

Peculiar Character of Normal Schools and Normal School Culture.

In other schools the aim of instruction is that the student may know the subject; in Normal Schools, that the student can teach it. There is a great difference between knowing a subject and being able to teach it. The purpose for which the instruction in the Normal School is given is that the student may acquire the power and skill to teach, train, stimulate and control others. In every recitation, therefore, the students must act as teachers of the class in which they are reciting. They must recite not only so as to prove that they know the lesson, but must recite so as to show that they can teach the lesson.

Teacher-like methods of recitation develop teacher-like habits of study. Normal School students learn to study, to know and to understand rather than to recite. They learn to grasp the root or central thought of a paragraph and to hold the subordinate ideas by the laws of association. Teacher-like habits of life and manners are acquired at the Normal School. Living and moving for weeks and months among those who have taught and who intend to teach, leads to manners and habits which are peculiarly helpful in the future work.

Kind of Students Wanted:

We want good students. We wish those only who intend to become teachers. We desire such as are desired at teachers' institutes. We wish those who have good natural abilities, discretion, aptness to teach and a disposition to improve by a wise use of their opportunities. To such we offer our best assistance in training themselves for future usefulness as teachers. To such we promise help in developing their powers and abundant opportunities for well-paid labor after their powers are developed. Good teachers are wanted everywhere, Good teachers are greatly needed in all parts of the land.

Suggestions.

Students can complete our course without attending consecutively. Many students attend two terms a year and teach one term.

Students are received from any county or any State,

Students not intending to graduate can select such studies as they are qualified to study.

Students are received at any time, but should arrive here, if possible, on Monday of our opening week.

Location and Access.

The Northwestern State Normal School is located in Edinboro, Erie Co., Pa., eighteen miles south of Erie and seven miles from Cambridge, on the Atlantic & Great Western Railway. Daily stages run to Erie and Cambridge. Persons coming over the Philadelphia & Erie Railroad will strike the Atlantic & Great Western Railway at Corry; those coming over the New York & Erie Railroad will meet the Atlantic & Great Western Railway at Salamanca; those near the Pennsylvania Central will come to Pittsburgh and take the Erie & Pittsburgh Railroad at the Union Depot,

t

and meet the Atlantic & Great Western Railway at Transfer, near Greenville. Persons from the West will come to Cincinnati or Cleveland and take the Atlantic & Great Western Railway to Cambridge. For See map on second page. Edinboro is a quiet, rural village, and by its retirement well suited for successful student life.

Expenses.

Tuition, fourteen dollars per session. This pays for class instruction in all the studies of the school except instrumental music. There is no incidental or contingent fee.

Boarding.

Two buildings are used for dormitories and boarding. The rooms, furnished with stove, bedstead and table, are let to the students at the nominal rent of five dollars per toom per session. Table board, by a system of co-operation, has been furnished students for the past year at \$1.75 per week; this system will be continued. The whole expense of a student for board, room, fuel, lights, etc., need not exceed \$100 per year. Many of our students board themselves for less than this amount.

History.

The School was recognized as a State Normal School January 26, 1861. Since that time there have attended its instruction, exclusive of the Model School pupils, 2,534 male students and 2,440 female students, or a grand total of 4,974. Nearly all of these have been teachers in the common schools, and many of them are now teaching. During its history it has aimed to give the best instruction possible for the money charged. The advantages for teachers have been constantly improved.

Special Advantages of the School.

rst. It is designed and managed especially to prepare teachers for skill in teaching.

ad. The instructors have had successful experience in teaching. Many of them have been long in the school.

3d. The Libraries, Apparatus, Cabinets and all appliances are designed for the instruction of students.

4th. A large body of earnest student teachers create an atmosphere favorable for the development of the teaching faculty.

5th. The State aids students.

6th. Graduates receive a permanent certificate.

7th. Graduates receive fifty dollars from the State at graduation.

8th. The expense of a year here is less than at most other schools.

CALENDAR.
