EDINBORO STATE COLLEGE Edinboro, Pennsylvania 16412

ACKNOWLEDGMENTS

Appreciation is expressed to Mrs. Cynthia Cogley, Miss Brigit Brickner, Miss Jeanne Orr and Mrs. Carolyn Hazlewood for their assistance in the compilation of the data for this report. Valuable help in preparation of the cover was rendered by Mrs. Mary Newhall, of the Edinboro Art Department, and Mr. Russell Wood. We thank members of the Duplicating Section of the College, and in particular Mrs. Alma Brown, for their work in publishing this report. We are grateful to faculty, department chairmen and others in furnishing the data so essential for a report of this kind.

James E. McKinley Vice-President for Academic Affairs

Associate Dean for Academic Affairs

INTRODUCTION

This is the first in a series of annual academic reports that will be published by the Office of the Vice-President for Academic Affairs. The purpose of these reports is to provide information about various facets of the college that would be of interest to those concerned with its development. In addition they will contain up-to-date information that will be of value in preparing reports for various agencies and groups in the future.

Since a great deal of information about the college is contained in the documents prepared for the Middle States and National Council for the Accreditation of Teacher Education visiting teams, it would be repetitious to provide that information within the pages of this report. However, it is anticipated that this report will up-date some kinds of information contained in the above-mentioned documents.

Edinboro State College was established primarily to serve the North-western Pennsylvania region. However, students now come from all counties of the state as well as from other states. The college has experienced an accelerating growth rate in both faculty and students over the past five years. As of the Fall of 1969, the college enrolled 6849 students and employed 433 professional staff members.

Until recently the chief objective of the college was the education and preparation of classroom teachers for the schools of the Commonwealth. With the implementation of programs in arts, sciences, and humanities, Edinboro has become a multi-purpose institution of higher learning serving the educational needs of a tri-state area. The college operates off-campus centers in Farrell and Warren, Pennsylvania, making higher educational opportunity available to a larger number of students in its service area. Programs in elementary and secondary education, and in the arts, humanities, and sciences curricula are available at these centers. After two years, students may transfer to the main campus.

In order to better meet the challenge presented by its rapid growth, the college was reorganized in September, 1969 from a departmental structure to that of academic schools, student personnel services, and administrative services. Presently the college has five schools: the School of Arts and Humanities, the School of Behavioral and Social Sciences, the School of Education, the School of Science and Mathematics, and the School of Graduate Studies.

Edinboro State College offers curricula in numerous fields in elementary and secondary education leading to the Bachelor of Science degree in Education. The Bachelor of Science degree in nursing and programs leading to the Bachelor of Science degree in Education are also offered for registered dental hygienists and school nurses. In addition, Bachelor of Arts and Bachelor of Science degrees are awarded in a number of subject fields. The college offers graduate study leading to the Master of Education degree in art, biological science, earth science, educational psychology, elementary education, elementary and secondary guidance and counseling, English, mathematics, mental retardation, physical sciences, and social studies. The Master of Arts degree is offered in English, history, and political science. The following programs have been applied for and are pending Department of Education approval: Associate Degree in nursing, Bachelor of Fine Arts in art, Master of Education in music and in reading, and Master of Science in Biology and in Chemistry.

As indicated earlier, Edinboro State College's academic structure is organized in terms of five schools. Schools and departments, divisions, and areas contained within them are as follows:

School of Arts and Humanities

^{*} The terms authorized and encumbered are used rather than authorized and expended because funds may not be actually expended for a year or more after orders are placed for materials. Money may be encumbered in one year, but due to publishers' shortages the items may not be produced and the college billed for them until much later. Funds not expended within a particular year are returned to the General Fund of the Commonwealth of Pennsylvania and materials that are on order for that year must be paid for when they arrive at the college from the current year's budget.

The library did not receive authorizations for expenditures for materials in the years 1967-68 and 1969-70 due to budgetary difficulties at the state level. Since the college reorganization was not completed until the Fall of 1969, the authorizations and encumbrances are listed under categories used under the previous organization.

[#] Figures for 1966-67 are for both elementary and secondary education. Expenditures for elementary and secondary education were not differentiated until 1967-68.

FACULTY NON-INSTRUCTIONAL ACTIVITIES

On February 20, 1970 each member of the faculty was contacted with a questionnaire to be returned to the Office of the Vice-President for Academic Affairs. This instrument was designed to obtain information concerning: extra-class or non-teaching assignments; attendance at professional meetings or conferences; research activities; lectures or talks delivered before various groups; consultant work or field services; and publications. (See Appendix) Approximately three weeks later follow-up questionnaires were sent to those faculty members who had not as yet responded.

Following is the number of persons from each area who responded to the above instrument:

^{*} The Art Department Faculty responded to the same questionnaire as did faculty from other areas of the college.

This instrument did not have sections specifically for the reporting of exhibitions entered or awards won. Thus it is possible that the faculty of this department entered more shows or exhibitions and won more awards than the number indicated above. The same is true for the Television and Public Relations Faculty.

Statistics are not recorded as to the class standing of transfer students - this is only done for curriculum. Thus, the

status e.g. freshman, sophomore, etc. of the transfer students in each of the above years is not known.

**

The major area of specialization of transfer students in secondary education is not known. Figures in parenthesis indicate the total number of transfer students for all specializations entering Edinboro in the designated time period.

:

This program began after Sept. 1966, thus there were no freshmen entering the program in this year.

+

The Dental Hygiene program requires a minimum of 64 hours for completion, and the Public School Nursing program requires a minimum of 60 hours of approved courses for completion. Thus, students in these curricula ordinarily enter at sophomore or junior standing.

The major area of specialization of transfer students in Arts and Sciences in not known. Figures in parenthesis indicate the total number of transfer students in Arts and Sciences entering Edinboro in the designated time period.
