February 7, 1994

FOR IMMEDIATE RELEASE:

**VIDEO/PERFORMANCE ARTIST TO APPEAR AT EDINBORO UNIVERSITY**

Philadelphia video and performance artist Cheryl Dunye will be at Edinboro University of Pennsylvania, Thursday, February 17, to show and discuss her work. She will conduct an afternoon seminar at 3:30 p.m. in room G-9, Doucette Hall and an evening show at 8:15 p.m. in 119 Doucette Hall. Both events are free and open to the public.

An accomplished and highly-respected artist and writer, Dunye was born in Liberia and earned a BA from Temple University and an MFA from Rutgers University. Her work has been seen in museums, theater and television in this country and overseas – including the Whitney, Anthology, Walker Arts Center, and the Kitchen. She has served as a guest lecturer at Princeton, Cornell, Northwestern, and Concordia universities, The University of Illinois, the Chicago Art Institute, the University of Pennsylvania, and Hampshire College. She has curated numerous film festivals including the Lesbian and Gay Video Festival, the New York Lesbian and Gay Experimental Film Festival, and the Philadelphia Festival of Independent Film and Video Artists.

Dunye describes her work as "a kind of Brechtian cinema," where people step out of character and speak to the audience. She deliberately sets out to make humorous videos saying, "We are so angry and marginalized with our anger. We need to learn how to laugh . . . I put my anger into my humor."

Cheryl Dunye's appearance at Edinboro University is funded by a grant from the Pennsylvania Council on the Arts and is part of the Alternative Film Festival funded by the Student Government Association of Edinboro University. For additional information, call the Edinboro University art department, 732-2406.

Video/Performance Artist to Appear at Edinboro University

Philadelphia video and performance artist Cheryl Dunye will be <sup>AT</sup> on ~~the~~ Edinboro University <sup>of PENNSYLVANIA,</sup> campus Thursday, February 17, to show and discuss her work. She will conduct an afternoon seminar at 3:30 <sup>pm</sup> in room G-9, Doucette Hall and an evening show at 8:15 <sup>pm</sup> in room 119, Doucette Hall. Both events are free and open to the public.

An accomplished and highly-respected artist and writer, Cheryl Dunye was born in Liberia and earned a BA from Temple University and <sup>an</sup> her MFA from Rutgers University. Her work has been seen in museums, theater and television ~~venues~~ in this country and overseas - including the Whitney, Anthology, Walker Arts Center, and the Kitchen. She has served as a guest lecturer at Princeton, Cornell, Northwestern, and Concordia universities, The University of Illinois, the Chicago Art Institute, the University of Pennsylvania, and Hampshire College. She has curated numerous films festivals including the Lesbian and Gay Video Festival, the New York Lesbian and Gay Experimental Film Festival, and the Philadelphia Festival of Independent Film and Video Artists.

Her work explores the intersections of race, sex and class in the lives of black lesbians. Her video "Janine" is an autobiographical examination of one black woman's resolution with a relationship in her past. In "She Don't Fade," she examines the sexuality of a black lesbian and the journey to find her. One of her most recent videos, "Vanilla Sex" was featured in an installation entitled "Those Fluttering Objects of Desire" by New York artist Shu Leah Cheang. In "Potluck and the Passion," two black lesbians have a potluck to celebrate their one-year anniversary inviting an interesting mix of

(more)

Cheryl Dunye Appearance continued....

~~women types who bring with them their own hang-ups, and issues.~~

Dunye describes her <sup>work</sup> videos as "a kind of Brechtian cinema," where people step out of character and speak to the audience. She deliberately sets out to make humorous videos saying, "We are so angry and marginalized with our anger. We need to learn how to laugh.... I put my anger into my humor." According to Dunye, the day we express our anger means that, as members of the Black left and the lesbian gay left, we can spend 80 percent of our time opposing the right, while they go about their business of collecting arsenals. Or, we can "spend our time creating a culture instead, so that they have to spend 80 percent of their time worrying about us."

Cheryl Dunye's appearance at Edinboro University is funded <sup>by</sup> with a grant from the Pennsylvania Council on the Arts and is part of the Alternative Film Festival funded by the Student Government Association of Edinboro University.

For additional info, <sup>call</sup> ~~contact~~ ~~Dr. White~~ ~~Wendy~~  
~~to~~ the Ell art department, 732-2

FOR IMMEDIATE RELEASE:

**EDINBORO UNIVERSITY PRESENTS COLORADO STRING QUARTET**

The Edinboro University of Pennsylvania Concert and Lecture Series is proud to present The Colorado String Quartet on Monday, February 21, at 8:00 p.m. in Memorial Auditorium.

Winners of the coveted Naumberg Chamber Music Award and first prize at the Baniff International String Quartet Competition, The Colorado String Quartet has become one of the outstanding quartets touring today. It has won praise on four continents including appearances on Lincoln Center's "Great Performers" series and Carnegie Hall's "Quartets Plus" series, the Kennedy Center, the Amsterdam Concertgebouw, the Casals Festival, and the Janacek Festival.

Members of the quartet include Julie Rosenfeld and Deborah Redding, violin; Francesca Martin Silos, viola; and Diane Chaplin, cello. They are well known teachers, having taught at the Juilliard School and the New School of Music in Philadelphia. They founded the Soundfest Chamber Music Festival in Falmouth, Massachusetts, and released their third CD in 1991.

The program will include the Haydn Quartet in E major, the Britten Quartet, op. 94 and the Beethoven Quartet in a minor, Op. 132.

Tickets are required for this event and are available at the University Center of the Edinboro University music department. Prices are \$5.00 for adults and \$4.00 for senior citizens and others. Call 814-732-2518 for ticket reservations or additional information.

FOR IMMEDIATE RELEASE:

**EDINBORO ACADEMIC FESTIVAL FEATURES NATIVE AMERICAN THEMES**

In recent years there has been a renewal in the nation's interest in the culture and history of Native Americans. This year's Academic Festival at Edinboro University of Pennsylvania features several events with Native American themes.

A slide presentation by Dr. Robert Gensemer, "Last of the Apaches," will explore the events which led to the end of the colorful and complex nomadic history of the Apache Indians in the American Southwest. The event, which focuses on Geronimo and his surrender in 1886, will be held Monday, February 21, at 11 a.m. in 336 Butterfield Hall, and will be repeated at 8 p.m. in classroom 8 at the Porreco Center in Erie.

Also beginning February 21 will be an exhibit of limited edition serigraphs of Pacific Northwest Native Contemporary Art. Like the songs, dances, carvings and totems of the native people of the Northwest, this display of approximately 45 prints will express the complex mythology of their relationship with man and animals and, in turn, their connection with the forces of nature. The exhibit will open at 10 a.m. in Bates Gallery of Loveland Hall and continue until 4 p.m. during all three days of the Festival.

Coinciding with the art exhibit will be a lecture and slide presentation of the myths, legends and stories of the Pacific Northwest Native Americans. Prior to contact with Europeans, there were tens of thousands of such stories. Now numbering only a few thousand, the myths – which found their articulation in the totems and lodges of their ancestors – are now also expressed in contemporary art. Dr. Jan Kinch will host this presentation on February 21, at 3 p.m. in Bates Gallery.

-more-

Later that evening, Edinboro radio productions will present its recently-released production of "My Father's Ways," an original radio play by Texas author Sharon Wood. The 32-minute production features an all-Native American cast and authentic pow-wow. Plans are being made to air the production on a national level. This pre-broadcast event will be held at 7 p.m. in G-9 Doucette Hall.

For further information on these or any other events, contact the Office of Public Information and Publications at 732-2745.

FOR IMMEDIATE RELEASE:

**EDINBORO UNIVERSITY MUSIC DEPARTMENT  
RELEASES SCHEDULE OF EVENTS FOR MARCH**

The music department of Edinboro University of Pennsylvania has released its calendar of events for the month of March.

The Jazz Ensemble concert will be held on Tuesday, March 1, in Memorial Auditorium at 8:00 p.m. The concert will feature a band of University students who will play one set of jazz music. The concert will be the first performance of this group for the semester.

The Opera/Music Theatre Workshop will sponsor *Anything Goes* from March 17-19. This Cole Porter musical is set in the 1930's aboard a luxury liner cruise ship. It is a comedic musical about a boy in love who will do almost anything to win the girl he adores. Famous for its classy Cole Porter music, *Anything Goes* is sure to entertain the audience. On opening night, the show will begin at 7 p.m. All other nights, the show will begin at 8 p.m. in Memorial Auditorium.

All events are free of charge and open to the public. For further information, contact the Edinboro University Music Department Office at 732-2555.

**(CORRECTED RELEASE)**

**EDUCATION DEAN STENNIS-WILLIAMS TO LEAVE EDINBORO**

Dr. Shirley Stennis-Williams, Edinboro University of Pennsylvania's dean of the School of Education, has indicated her intent to leave Edinboro University, according to University President Foster F. Diebold. She has agreed, however, to remain in office until the end of the spring 1994 semester.

Stennis-Williams, who was appointed dean of the University's School of Education in the fall of 1991, previously served as senior academic planner with the University of Wisconsin system.

While at Edinboro, Stennis-Williams also served on the President's Cabinet, the Executive Management Team, and the Deans' Council.

FOR IMMEDIATE RELEASE:

### **EDINBORO UNIVERSITY TO HOST STAND-UP COMEDIENNE RENEE HICKS**

Edinboro University of Pennsylvania, along with the Student Government Association Special Programming Committee and the University Programming and Activities Office will sponsor stand-up comedienne Renee Hicks on Saturday, March 12, at 8 p.m. in the University Center.

Hicks' comedic style deals with questioning our perceptions, preconceived notions, and personal quirks. Her material, energetic and refreshing, makes the audience laugh as well as think. During the course of her show, titled the "Bald Ambition Tour," Hicks heartily pokes fun at her relationships with her sister, her nephews, and her father, a Pentecostal preacher.

Hicks has performed on the Arts and Entertainment network's *Evening at the Improv* and MTV's *Half Hour Comedy Hour*. She also appeared on the *Phil Donahue Show*. In addition to these appearances, she has performed at the "Comedy Concert Against AIDS" at the Oakland Coliseum in California.

Hicks has appeared at many universities and clubs which include Stanford University, the University of California at Berkeley, The Improv in California, and Caroline's Comedy Club in New York. The show is open to the public free of charge. For further information regarding this event, call the Edinboro University Programming and Activities Office at (814) 732-2842.

EDINBORO UNIVERSITY TO HOST STAND-UP  
COMEDIENNE RENEE HICKS

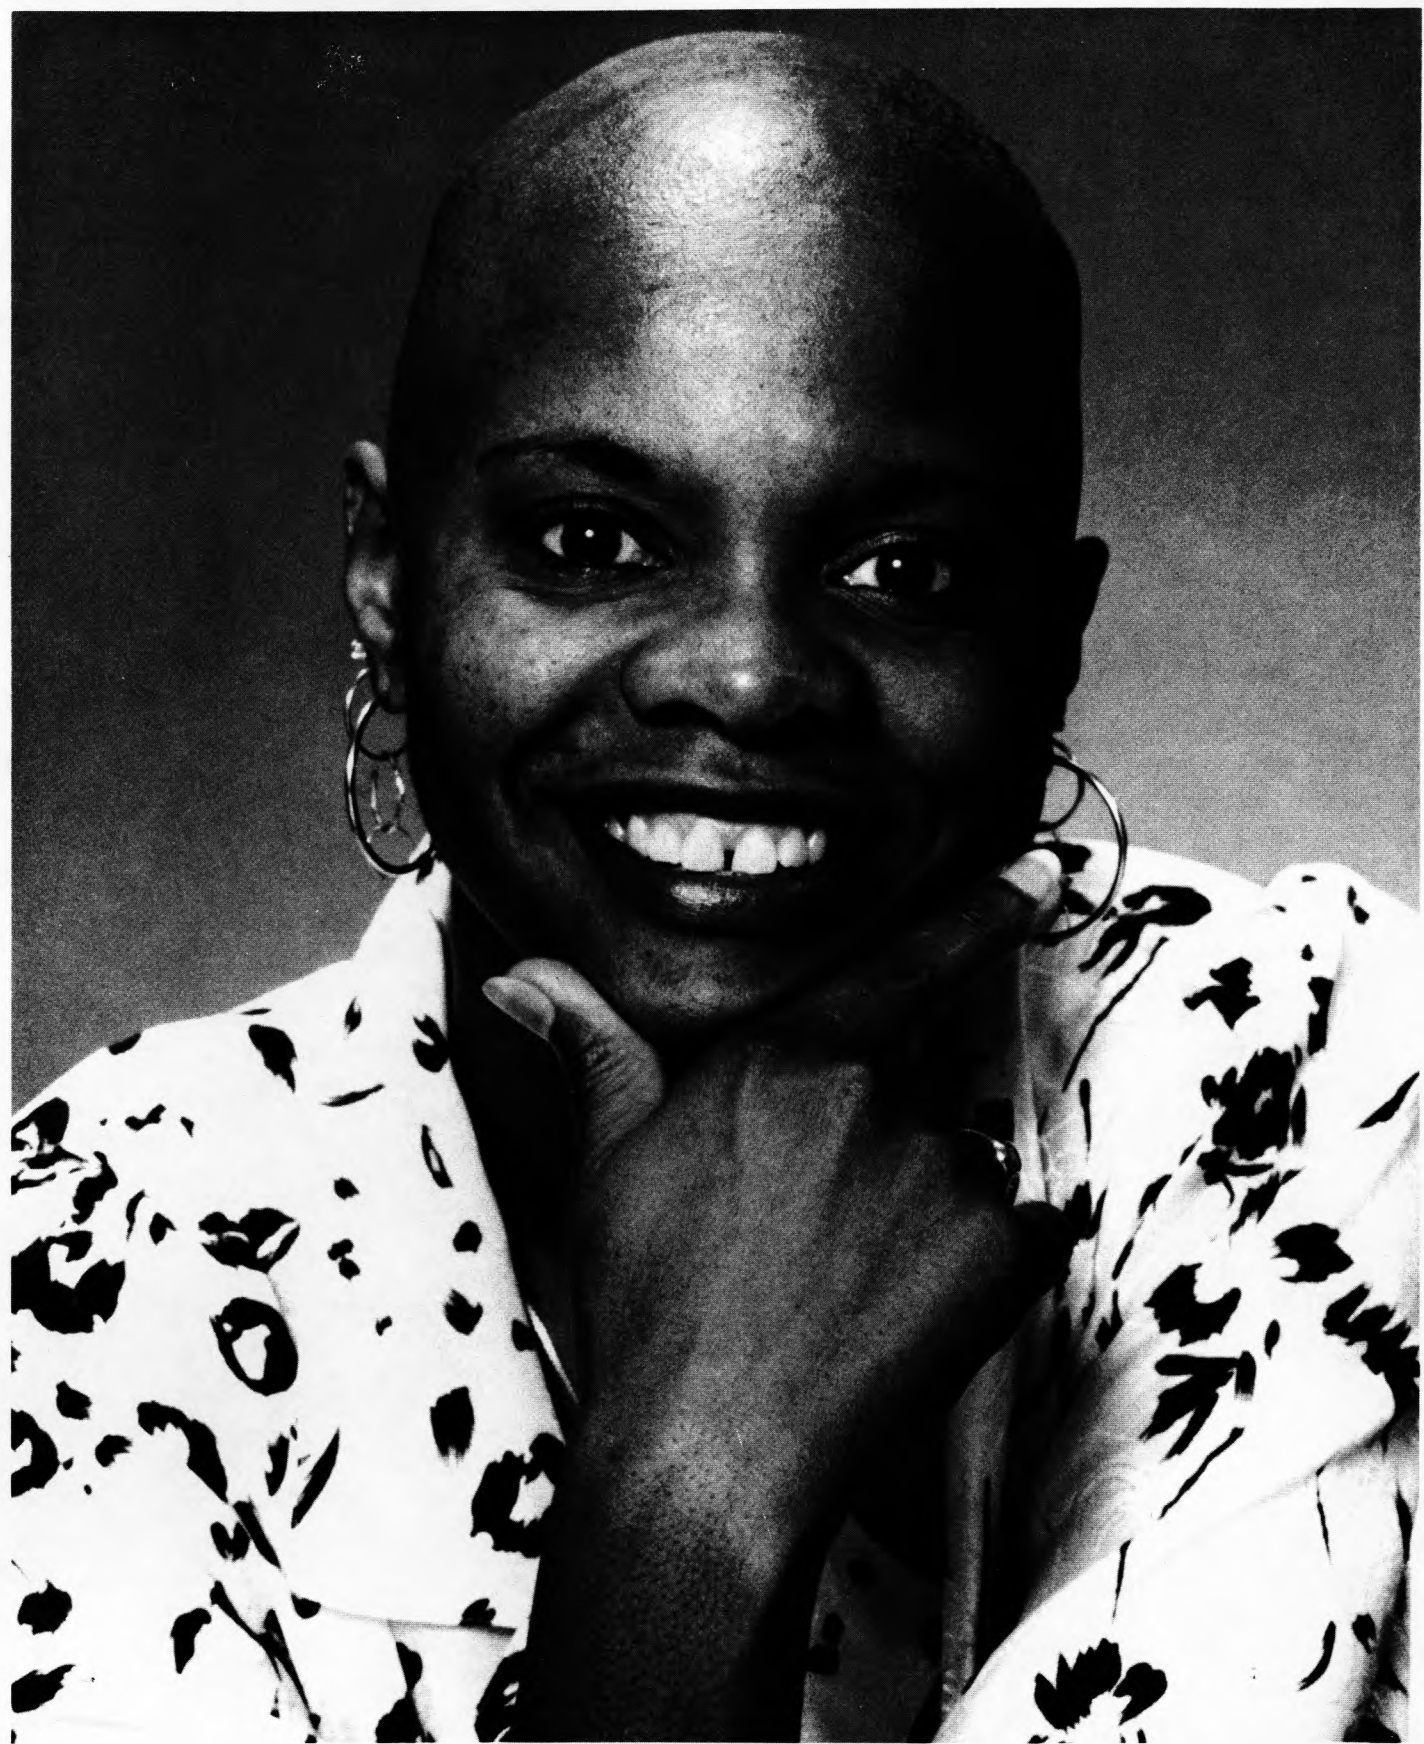

Edinboro University of Pennsylvania, along with the Student Government Association Special Programming Committee and the University Programming and Activities Office will sponsor stand-up comedienne Renee Hicks on <sup>Saturday,</sup> March 12 at 8 p.m. in the University Center.

Hicks' comedic style deals with questioning our perceptions, preconceived notions, and our personal quirks. Her material, energetic and refreshing, makes the audience laugh as well as think. During the course of her show, titled the "Bald Ambition Tour," Hicks heartily pokes fun at her relationships with her sister, her nephews, and her father, a Pentecostal preacher.

Hicks has performed on the Arts and Entertainment network's *Evening at the Improv* and *MTV's Half Hour Comedy Hour*. She also appeared on the *Phil Donahue Show*. In addition to these appearances, she has performed at the "Comedy Concert Against AIDS" at the Oakland Coliseum in California.

Hicks has appeared at many universities and clubs which include Stanford University, the University of California at Berkeley, The Improv in California, and Caroline's Comedy Club in New York. The show is open to the public and is free of charge. For further information regarding this event, call the University Programming and Activities Office at (814) 732 - 2842.

Edinboro

RENEE HICKS

## Renee Hicks

Renee Hicks: bold, boisterous, and bald! Renee spends a great deal of her time questioning our perceptions, our preconceived notions and our personal quirks. When Renee starts to talk, you not only find yourself laughing, but thinking. Renee's always refreshing, energetic material examines her relationships with her sister, her nephews and her father, a Pentacostal preacher. Spending an evening with Renee not only opens the throat for laughing, but opens the mind for listening as well.

### TELEVISION

FOR IMMEDIATE RELEASE:

### **AWARD-WINNING TEACHER MAKES LEARNING SCIENCE FUN**

If everyone had Ruth Ruud for their sixth grade science teacher, the world might be full of rocket scientists, engineers and molecular biologists. Ruud, who teaches science at Millcreek's new Walnut Creek Middle School, is no ordinary educator. Last year she was the recipient of a Presidential Award for Excellence in Science and Mathematics Teaching. She will represent the state and receive the award at the official ceremony in Washington, D.C., this March.

Ruud grew up on Cleveland's west side, the daughter of parents who never made it past the ninth grade. They knew the value of an education and insisted that their children receive as much schooling as possible. "My mother instilled in me the notion that learning is a lifelong process," said Ruud.

Following graduation she worked for 18 months as a long-distance telephone operator before enrolling in elementary education at Ohio University. Her college career was interrupted by marriage in 1964, and a decade passed before she returned to school. By that time the Ruud family was living in Erie, and the youngest of their three children was in school.

Because of her love of learning, a teaching career came naturally to Ruth. She enrolled at Villa Maria and graduated with a degree in elementary education in 1978. She found a job immediately at Our Lady of Peace, and a year later, she joined the Millcreek School District. At the same time she started studying for a master's degree at Edinboro University of Pennsylvania, which she obtained in 1983.

-more-

It was at Edinboro that her interest in science education really blossomed. Dr. Merrick Owen was the director of the University's planetarium and an instructor for Pennsylvania Improvement of Elementary Science (PIES). The program offered hands-on summer science classes for elementary teachers. Ruud took one of those classes and discovered she had a real knack and enthusiasm for the topics, ranging from earth science to rockets. "Merrick is my mentor," said Ruud. "He was one of the first people to instill in me a love of science education. He really inspired me."

It was because of programs like PIES that Ruud has been able to boost Millcreek's science programs. She has also taken courses in computers, astronomy, and energy and attended the Science Unlimited workshop at Shippensburg University. She has taught first, second and fifth grades, and this is her first year teaching sixth grade at the new Walnut Creek Middle School. "It's a great place to learn and to teach," said Ruud.

In the mid-1980s Ruud was actively involved in NASA's classroom programs and its teacher in space program. At the time of the space shuttle Challenger disaster, Ruud was teaching fifth grade, and her class had participated in a teleconference call with Barbara Morgan, the backup teacher to Christa McAuliffe.

"Christa was a good role model," recalled Ruud. "She was very brave and always accepted a challenge."

It is not difficult to imagine Ruud participating in the teacher in space program. She brings such enthusiasm and dedication to her work. Her students understand and appreciate science because they realize everything they do or touch involves science.

The key to Ruud's success is not what she teaches, but how she teaches. "I care about my students. I want them to enjoy learning. I make learning fun. Science is not an isolated subject. What we learn is relevant to everything the students do in their lives."

Several former students have gone on to careers in science or related fields; two women are currently pursuing engineering degrees.

Another key to the success of the Millcreek science program has been its relationship with private industry. Ruud and the Millcreek School District recently received \$22,000 from the education foundation of International Paper.

The partnership between Millcreek and International Paper has actually become part of the curriculum. Ruud's class is now studying natural resources. International Paper came into the classroom and demonstrated how to make paper. They even brought the pulp with them. Ruud

did the pre-and post-teaching for the program, and also initiated the Millcreek Science, Industry Partnership which involves 12 local industries infused into the science curriculum for grades two through seven.

Ruud has passed her love of learning on to her children. James, her oldest son, has a Ph.D. in physics from Harvard. A research scientist for General Electric, he is attempting to improve one of technology's most basic inventions – the light bulb. Her other son, Scott, is an aerospace engineer in Arizona. Her youngest child, Karen, is a recent communications graduate from Clarion University. It must be noted that Ruth's husband, James, also influenced their children's careers – he has a bachelor's degree in mechanical engineering and an MBA.

### **AWARD-WINNING TEACHER MAKES LEARNING SCIENCE FUN**

If everyone had Ruth Ruud for their sixth grade science teacher, the world might be full of rocket scientists, engineers and molecular biologists. Ruud, who teaches science at Millcreek's new Walnut Creek Middle School, is no ordinary educator. Last year she was the recipient of a Presidential Award for Excellence in Science and Mathematics Teaching. She will represent the state and receive the award at the official ceremony in Washington, D.C., this March.

Ruud grew up on Cleveland's west side, the daughter of parents who never made it past the ninth grade. They knew the value of an education and insisted that their children receive as much schooling as possible. "My mother instilled in me the notion that learning is a lifelong process," said Ruud.

Following graduation she worked for 18 months as a long-distance telephone operator before enrolling in elementary education at Ohio University. Her college career was interrupted by marriage in 1964, and a decade passed before she returned to school. By that time the Ruud family was living in Erie, and the youngest of their three children was in school.

Because of her love of learning, a teaching career came naturally to Ruth. She enrolled at Villa Maria and graduated with a degree in elementary education in 1978. She found a job immediately at Our Lady of Peace, and a year later, she joined the Millcreek School District. At the same time she started studying for a master's degree at Edinboro University of Pennsylvania, which she obtained in 1983.

-more-

It was at Edinboro that her interest in science education really blossomed. Dr. Merrick Owen was the director of the University's planetarium and an instructor for Pennsylvania Improvement of Elementary Science (PIES). The program offered hands-on summer science classes for elementary teachers. Ruud took one of those classes and discovered she had a real knack and enthusiasm for the topics, ranging from earth science to rockets. "Merrick is my mentor," said Ruud. "He was one of the first people to instill in me a love of science education. He really inspired me."

It was because of programs like PIES that Ruud has been able to boost Millcreek's science programs. She has also taken courses in computers, astronomy, and energy and attended the Science Unlimited workshop at Shippensburg University. She has taught first, second and fifth grades, and this is her first year teaching sixth grade at the new Walnut Creek Middle School. "It's a great place to learn and to teach," said Ruud.

In the mid-1980s Ruud was actively involved in NASA's classroom programs and its teacher in space program. At the time of the space shuttle Challenger disaster, Ruud was teaching fifth grade, and her class had participated in a teleconference call with Barbara Morgan, the backup teacher to Christa McAuliffe.

"Christa was a good role model," recalled Ruud. "She was very brave and always accepted a challenge."

It is not difficult to imagine Ruud participating in the teacher in space program. She brings such enthusiasm and dedication to her work. Her students understand and appreciate science because they realize everything they do or touch involves science.

The key to Ruud's success is not what she teaches, but how she teaches. "I care about my students. I want them to enjoy learning. I make learning fun. Science is not an isolated subject. What we learn is relevant to everything the students do in their lives."

Several former students have gone on to careers in science or related fields; two women are currently pursuing engineering degrees.

Another key to the success of the Millcreek science program has been its relationship with private industry. Ruud and the Millcreek School District recently received \$22,000 from the education foundation of International Paper.

The partnership between Millcreek and International Paper has actually become part of the curriculum. Ruud's class is now studying natural resources. International Paper came into the classroom and demonstrated how to make paper. They even brought the pulp with them. Ruud

did the pre-and post-teaching for the program, and also initiated the Millcreek Science, Industry Partnership which involves 12 local industries infused into the science curriculum for grades two through seven.

Ruud has passed her love of learning on to her children. James, her oldest son, has a Ph.D. in physics from Harvard. A research scientist for General Electric, he is attempting to improve one of technology's most basic inventions – the light bulb. Her other son, Scott, is an aerospace engineer in Arizona. Her youngest child, Karen, is a recent communications graduate from Clarion University. It must be noted that Ruth's husband, James, also influenced their children's careers – he has a bachelor's degree in mechanical engineering and an MBA.

**ING TEACHER MAKES LEARNING SCIENCE FUN**

n Ruud for their sixth grade science teacher, the world might be full  
rs and molecular biologists. Ruud, who teaches science at  
ek Middle School, is no ordinary educator. Last year she was the  
ward for Excellence in Science and Mathematics Teaching. She will  
ve the award at the official ceremony in Washington, D.C., this

March.

Ruud grew up on Cleveland's west side, the daughter of parents who never made it past the ninth grade. They knew the value of an education and insisted that their children receive as much schooling as possible. "My mother instilled in me the notion that learning is a lifelong process," said Ruud.

Following graduation she worked for 18 months as a long-distance telephone operator before enrolling in elementary education at Ohio University. Her college career was interrupted by marriage in 1964, and a decade passed before she returned to school. By that time the Ruud family was living in Erie, and the youngest of their three children was in school.

Because of her love of learning, a teaching career came naturally to Ruth. She enrolled at Villa Maria and graduated with a degree in elementary education in 1978. She found a job immediately at Our Lady of Peace, and a year later, she joined the Millcreek School District. At the same time she started studying for a master's degree at Edinboro University of Pennsylvania, which she obtained in 1983.

It was at Edinboro that her interest in science education really blossomed. ## AWARD-WINNING TEACHER MAKES LEARNING SCIENCE FUN

If everyone had Ruth Ruud for their sixth grade science teacher, ~~chances are~~ <sup>might</sup> the world ~~would~~ be full of rocket scientists, engineers and molecular biologists. Ruud, who teaches science at Millcreek's new Walnut Creek Middle School, is no ordinary educator. Last year she was the recipient of a Presidential Award for Excellence in Science and Mathematics Teaching. She will represent the state ~~this March~~ <sup>this March</sup> and receive the award at the official ceremony in Washington, D.C. <sup>this March.</sup>

Ruud grew up on Cleveland's west side, the daughter of parents who never made it past the ninth grade. They knew the value of an education and insisted that their children receive as much schooling as possible. "My mother instilled in me the notion that learning is a lifelong process," <sup>(said Ruud.)</sup>

Following graduation she worked for 18 months as a long-distance telephone operator before enrolling <sup>at</sup> Ohio University <sup>in elementary education.</sup> Her college career was interrupted by marriage in 1964. <sup>and</sup> A decade passed before she returned to school. By that time the Ruud family was living in Erie and <sup>their</sup> youngest of three children was in school.

Because of her love of learning, a teaching career came naturally to <sup>Ruth. She</sup> her. Ruth enrolled at Villa Maria and graduated with a degree in elementary education in 1978. She found a job immediately at Our Lady of Peace <sup>and</sup> for a year <sup>later, she ed</sup> before joining the Millcreek School District. At the same time she started studying for a master's degree <sup>in education</sup> at Edinboro University of Pennsylvania, which she obtained in 1983.

It was <sup>at</sup> through Edinboro that her interest in science education really blossomed. Dr. Merrick Owen was the director of the University's planetarium <sup>an</sup> and instructor for Pennsylvania Improvement of Elementary Science (PIES). The program offered hands-on summer science classes for elementary teachers. Ruud took one of those classes and discovered she had a real knack and enthusiasm for the topics, <sup>which</sup> <sup>ran</sup> <sup>ged</sup> from earth science to rockets. "Merrick is my mentor," said Ruud. "He was one of the first people to instill in me a love of science education. He really inspired me."

It was because of programs like PIES that Ruud has been able to boost Millcreek's science programs. She has also taken courses in computers, astronomy, <sup>and</sup> energy and attended the Science Unlimited workshop at Shippensburg University. She has taught first, second and

fifth grades, and this is her first year teaching sixth grade at the new Walnut Creek Middle School. "It's a great place to learn and to teach," said Ruud.

In the mid-1980s Ruud was actively involved in NASA's classroom programs and its ~~tragic~~ <sup>and</sup> teacher in space program. At the time of the space shuttle Challenger disaster, Ruud was teaching fifth grade. <sup>Her</sup> class had participated in a teleconference call with Barbara Morgan, ~~who~~ <sup>participating</sup> was the backup teacher to Christa McAuliffe(?).

"Christa was a good role model," recalled Ruud. "She was very brave and always accepted a challenge."

It is not difficult to imagine Ruud <sup>participating</sup> in the teacher in space program. She brings such enthusiasm and dedication <sup>Her</sup> to work. Her students understand and appreciate science because they realize everything they do or touch involves science.

The key to Ruud's success is not what she teaches, but how she teaches. "I care about my students. I want them to enjoy learning. I make learning fun. Science is not an isolated subject. What we learn is relevant to everything the students do in their lives."

Several former students have gone on to careers in science or related fields. <sup>Two</sup> women ~~students~~ are currently pursuing engineering degrees.

Another key to the success of the Millcreek science program has been <sup>its</sup> relationship with private industry. Ruud and the Millcreek school district recently received \$22,000 from the education foundation of International Paper.

The partnership between Millcreek and International Paper has actually become part of the curriculum. Ruud's class is now studying natural resources. International Paper came into the classroom and demonstrated how to make paper. They even brought the pulp with them. Ruud did the pre- and post-teaching for the program, <sup>and</sup> ~~she~~ <sup>has</sup> also initiated the Millcreek Science, Industry Partnership which involves 12 local industries infused into the science curriculum for grades two through seven.

Ruud has passed her love of learning on to her children. James, her oldest son, has a Ph.D. in physics from Harvard. <sup>He is</sup> a research scientist for General Electric, <sup>he is</sup> attempting to improve one of technology's most basic inventions – the light bulb. Her other son, Scott, is an aerospace engineer in Arizona. Her youngest child, Karen, is a recent <sup>communications</sup> graduate ~~in~~ <sup>university</sup> ~~communications~~ from Clarion. <sup>In fairness</sup> it must be noted that Ruth's husband, James, ~~did~~ <sup>also</sup> influence their children's careers. He has a ~~BS~~ <sup>bachelor's</sup> degree in mechanical engineering and an MBA.

## Ruth Ruud Interview Notes

Ruud and the Millcreek School District recently received \$22,000 from the Education Foundation of International Paper. She went to Alabama in January for several days to attend a conference sponsored by International Paper. The sessions were about science for teachers – many dealing with water quality.

IP also has other partnerships in the classroom that have actually become part of the curriculum. They came into the classroom and made paper with the students. They brought in the pulp. Ruud did the pre- and post-teaching. Her sixth grade class is studying natural resources and conservation.

Ruud grew up on Cleveland's westside, and attended parochial schools. She skipped fourth grade and graduated when she was 16. She worked for one and a half years as a long-distance telephone operator and enrolled at Ohio University for 1 and a half years. She married in 1964 and had three children. When the youngest child was five she returned to college and earned a degree in elementary education from Villa Maria in 1978. She began teaching right away from Our Lady of Peace for one year and then joined the Millcreek School District. She began working on her master's degree in education with a specialization in reading from Edinboro University of Pennsylvania.

Through Edinboro she took the PIES program from Dr. Merrick Owen. He was one of the first people to instill a love of science education in her. "Merrick is my mentor. He really inspired me."

The Millcreek school district sent her to Science Unlimited (?) in Shippensburg. She started doing science workshops for the Intermediate Unit. She also took courses in computers, astronomy and energy.

Ruud has a love of learning and education. "My mother instilled in me the notion that learning is a lifelong process. You make the most of it. I read all the time. Mother and father only went to the ninth grade. They insisted that their children get an education. They instilled a

respect for life and people.

Ruud has passed her love of learning on to her children. James, her oldest son, is a physicist for General Electric with a Ph.D. from Harvard. He is a research scientist attempting to improve one of technology's most basic inventions – the light bulb. Scott, is an aerospace engineer for Garrett in ? Her youngest child, Karen, is a recent graduate in communications from Clarion. Her husband, James, is a mechanical engineer.

Ruud started her career in first grade, has also taught second and fifth grade. This is her first year teaching sixth grade. Also the first year at Walnut Creek. "It's a neat learning and teaching environment. It's a great place to learn and teach.

I make learning fun. I care about my students. I want them to enjoy learning. It reaches all students . I am aware of individual differences. You pique that interest. What we learn is relevant to everything they do in life. Science is not an isolated subject. Kids can apply that and make science(?)

I pick up the phone and ask for help. Some of my former students are in science fields. Girls are pursuing engineering degrees. "I think girls are better now."

At the time of the Space Shuttle Challenger disaster I was teaching 5th grade. I had ten kids involved in the teleconference call from NASA. We had done a lot with Christa McAuliffe(?)'s backup teacher, Barbara Morgan, from Idaho.

Christa is a good role model. She was very brave and always took a challenge. Pennsylvania had the most applications for Teacher in Space.

There are so many things I want to do. I love teaching in the classroom. New opportunities for education are out there.

Ruud is the recipient of the Presidential Award for Excellence in Science and Math. Of the three winners from Pennsylvania. Ruud was the one chosen to go to Washington for five days in March to accept the award at the Natural History Museum. It is a real special week including dinner at the State Department. The award includes a \$7,500 grant to her school from the National Science Foundation and a \$750 professional grant.

This is her 17th year teaching. I love teaching. It's very rewarding.

Brian  
There were 3 State Winners in Elementary Division -  
I was selected to represent state as Presidential Winner

### AWARD-WINNING TEACHER MAKES LEARNING SCIENCE FUN

If everyone had Ruth Ruud for their sixth grade science teacher, chances are the world would be full of rocket scientists, engineers and molecular biologists. Ruud, who teaches science at Millcreek's new Walnut Creek Middle School, is no ordinary educator. Last year she was the recipient of a Presidential Award for Excellence in Science and Mathematics Teaching. She was <sup>with</sup> one of only three teachers from Pennsylvania to receive the award, and the only one chosen to represent the state this March at the official ceremony in Washington, D.C. <sub>to receive the award</sub>

Ruud grew up on Cleveland's west side, the daughter of parents who never made it past the ninth grade. They knew the value of an education and insisted that their children receive as much schooling as possible. "My mother instilled in me the notion that learning is a lifelong process, said Ruud."

NO Although Ruud does not mention it, it is clear she was a very bright child. She skipped the fourth grade and graduated from high school at the age of 16. "I love learning and education," said Ruud. "I read all the time as a child." <sub>NO</sub>

Following graduation she worked for 18 months as a long-distance telephone operator before enrolling at Ohio University in elementary education. Her college career was interrupted by marriage in 1964. <sup>OKAY</sup> A decade passed before she returned to school. By that time the Ruud family was living in Erie and their youngest of three children was in school.

Because of her love of learning, a teaching career came naturally to her. Ruth enrolled at Villa Maria and graduated with a degree in elementary education in 1978. She found a job immediately at Our Lady of Peace for a year before joining the Millcreek School District. At the same time she started studying for a master's degree in education at Edinboro University of Pennsylvania, which she obtained in 1983.

It was through Edinboro that her interest in science education really blossomed. Dr. Merrick Owen was the director of the University's planetarium and instructor for Pennsylvania Improvement of Elementary Science (PIES). The program offered hands-on summer science classes for elementary teachers. 5432 West 50th St.  
Fairview, PA 16415

Dear Ms. Ruud:

On behalf of the Edinboro University Alumni Association and its Board of Directors, I would like to congratulate you on your selection as a recipient of the 1993 Presidential Award for Excellence in Science and Mathematics Education. We recently received information about the awards from the National Science Foundation.

We have a copy of your vita in our files and I note that this award will be added to an already impressive list of professional accomplishments. This national honor must be truly satisfying as you were selected from what was undoubtedly an impressive group of colleagues.

Again, please accept my sincere congratulations.

Sincerely,

*Janet L. Bowker*

PRESIDENTIAL AWARDS for EXCELLENCE in SCIENCE and MATHEMATICS TEACHING

NATIONAL SCIENCE FOUNDATION

---

February, 1994

To: Reporters and Editors

From: Kathleen Holmay, Public Information Consultant, 301-588-6168  
Fax: 301-565-3782

Re: Elementary Teachers - Presidential Awardees for 1993

We are pleased to announce the elementary teachers in your area who are coming to Washington, DC, to receive the prestigious PRESIDENTIAL AWARD FOR EXCELLENCE IN SCIENCE AND MATHEMATICS TEACHING.

Please see the accompanying Fact Sheet and list for details about the program and for the names of awardees from your coverage area.

You are invited to interview teachers between now and the time they visit the nation's capital, or to send a representative to the following events:

10:30 am Awards Ceremony, Baird Auditorium  
Thursday, National Museum of Natural History  
March 10 Speaker: Dr. John Gibbons, Assistant to the  
President for Science and Technology

11:30 am - Press Interviews, National Museum of Natural History  
(in back Thursday, of the Rotunda)  
March 10 Press kits will be available.  
Individual interviews can be arranged in advance or  
on site. Call 301-588-6168 to arrange interviews in advance.

Afternoon White House Congratulations, President Bill Clinton  
Thursday, For your convenience in locating individual teachers, call  
March 10 Kathleen Holmay in advance to arrange interviews. Gain  
admittance by calling the White House Press Office.

-more-

---

6:30 pm  
Wednesday,  
March 9

Don Herbert, "Mr. Wizard" will address the awardees at a program and reception in Carmichael Auditorium, Hall of Flags, National Museum of American History

Administered by the National Science Foundation, Presidential Awards are designed to recognize excellent science and mathematics teachers in elementary schools, and middle/junior and senior high schools.

One hundred-and-eight elementary teachers will be in Washington, DC from March 8-13 to receive the prestigious 1993 **Presidential Award for Excellence in Science and Mathematics Teaching**. The White House announced these awardees and the secondary teachers receiving this award last fall. The secondary teachers will be honored in April.

In addition to receiving the prestigious Presidential Award, each science or mathematics teacher will receive a National Science Foundation grant of \$7,500 and a generous array of gifts from the private sector.

Among many activities during the week, the awardees will attend a Department of State dinner, a reception at the Hall of Flags in the Museum of American History, and will exchange valuable information and expertise with members of Congress, leading national educators, and each other.

Begun in 1983 by The White House and the National Science Foundation, the **Presidential Awards for Excellence in Science and Mathematics Teaching** program has now identified just over 1,400 exemplary science and mathematics teachers from 50 states, the District of Columbia, Puerto Rico, Department of Defense Dependents Schools, and the U.S. Territories.

Teachers eligible for the Presidential Awards program have spent at least five years teaching science or mathematics half-time or more in a public or private elementary, middle, junior or senior high school. Teachers may submit nominations directly or they may be nominated by colleagues, administrators, students, parents, and others who are familiar with their skills.

#####

Biographies of the teachers are available by calling 301-588-6168.

## FACT SHEET

### What are the Presidential Awards for Excellence in Science and Mathematics Teaching?

The awards represent the nation's highest honor for teachers of mathematics and science in grades K-12. The award consists of a \$7,500 grant to the recipient's school to be spent under the awardee's direction and a week of activities in Washington for that person and a guest. While in Washington each teacher receives an award certificate signed by the President and has the opportunity to meet with members of Congress and representatives from the National Science Foundation. The awardees also receive a generous selection of gifts from private sector contributors.

### How was it established?

The award was established by President Reagan and the Congress in 1983. It is administered by the National Science Foundation and managed under contract by the National Science Teachers Association.

### How many recipients are honored?

Each year up to 108 elementary recipients and 108 secondary recipients are selected. This includes one science and one mathematics teacher, at each level, chosen from each of the 50 states, the District of Columbia, Puerto Rico, Department of Defense Dependents Schools, and the U.S. Territories.

### How are recipients selected?

Teachers may submit nominations directly or they may be nominated by professional colleagues, parents or students. These nominations are sent to PAESMT program chairs and directors in each state or jurisdiction who then distribute the nomination packet to the nominees. Six mathematics teachers (3 elementary, 3 secondary) and six science teachers (3 elementary, 3 secondary) from each of the 54 states and jurisdictions are selected by committees of mathematics and science educators. From the 3 selected as state-level awardees in each category, a National Panel chooses one to be recommended to the Assistant to the President for Science & Technology as the Presidential Awardee. The National Panel is made up of previous Presidential Awardees, state chairs and directors, and university-level scientists and mathematicians, who are known for their contributions in both education and research.

### What is the selection criteria?

Award recipients are chosen on the basis of the excellence of their teaching performance. They must spend at least half of their professional time in a classroom and have completed at least 5 years of teaching at the time of application. In addition, they must answer substantive questions regarding their philosophy of teaching and produce evidence of its application and success in the classroom by submitting examples of student work. Their background and experience including formal education, continuing education activities, teaching experience, as well as professional and non-professional activities related to their role as a teacher are also given consideration. Finally, three letters of support are requested either from colleagues, students, former students, parents, or supervisors.

FOR IMMEDIATE RELEASE:

**NATIONAL ENGINEERING APTITUDE SEARCH OFFERED AT EDINBORO**

Area high school students with an interest or ability in engineering can take part in the National Engineering Aptitude Search (NEAS), Saturday, April 23, from 9 a.m. until noon at Edinboro University of Pennsylvania.

The NEAS examination offers students the opportunity to assess their aptitude for engineering, math, science, or technology studies before choosing or entering a college. Recent research found freshmen engineering students' NEAS scores correlated significantly to fourth-year grade point averages at a majority of the schools in the study.

Students interested in applying for NEAS should contact their high school guidance counselors. The deadline for applying for the test at Edinboro is March 18.

The three-hour exam includes tests in mathematical understanding, science reading and comprehension, and problem solving, as well as an interest inventory, out-of-class accomplishment scale, and a biographical questionnaire.

There are two versions of the test – one is for 9th and 10th grade students, and the other is for 11th and 12th graders. The test results, which will be mailed directly to each student's home, will help parents, teachers, counselors and students evaluate the student's aptitude for a career in engineering, mathematics, science or technology.

The test is sponsored by the Junior Engineering Technical Society (JETS), a national non-profit education society emphasizing the understanding of engineering and technology and encouraging high school students to excel in mathematics and science.

For further information, contact Edinboro's department of physics and technology at (814) 732-2592.

FOR IMMEDIATE RELEASE:

**EDINBORO UNIVERSITY COUNSELOR GIVES PRESENTATION  
AT NATIONAL CONFERENCE**

Gloria Furcron, ACT 101 counselor in Edinboro University of Pennsylvania's department of academic support services, recently gave a presentation at the ninth National Higher Education Conference on Black Student Retention in Hollywood, California. The conference was attended by approximately 450 people including college presidents, vice presidents, and deans.

The presentation, titled "Summer Intensive Program for Minority and High Risk Students," dealt with the many challenges and opportunities that students may face during the course of a college experience. Furcron stated that two sources of challenge – stress and anxiety – can be due to many factors ranging from separation from family and friends to selecting a future career choice. Any student can be affected by these challenges, but minority and high risk students may face another source of anxiety and stress: the academic demands encountered on a predominantly white campus.

During her presentation, Furcron pointed out the benefits and importance of academic advisors and counselors and how they need to help students through difficult and unusual situations.

EDINBORO UNIVERSITY COUNSELOR GIVES PRESENTATION  
AT NATIONAL CONFERENCE

Gloria Furcron, <sup>Act 101</sup> a counselor <sup>in</sup> for Edinboro University of Pennsylvania's <sup>department of</sup> Academic Support Services, recently gave a presentation at the "Ninth National Higher Education Conference on Black Student Retention" in Hollywood, California. The conference was attended by approximately 450 people including several college presidents, vice presidents and deans.

The presentation, titled "Summer Intensive Program for Minority and High Risk Students," dealt with the many challenges and opportunities that a student may face during the course of a college experience. Furcron stated that ~~two sources of~~ challenge, stress and anxiety can be due to many factors ranging from separation from family and friends to selecting a future career choice. Any student can be affected by these two challenges, but ~~for~~ minority and high risk students <sup>may face</sup> another source of anxiety and stress <sup>could be some of the</sup> academic demands encountered on a predominantly white campus.

During her presentation, Furcron pointed out the benefits and importance of academic advisors and counselors and how they <sup>need to help</sup> ~~are available to the~~ students to ~~help see them~~ through difficult and unusual situations. Furcron stated that she felt her presentation went well and that everyone in attendance at the conference learned from the many presentations given. For further information, contact Gloria Furcron at (814) 732 - 2218.

Subj: PRESENTATION AT NATIONAL CONFERENCE

Brian, I made a presentation at the 9th National Higher Education Conference on Black Student Retention (November 16-20, 1993) in Hollywood, CA. The title of my presentation was "Summer Intensive Program for Minority and High Risk Students". The abstract for the presentation reads:

College life presents the student with many challenges as well as many opportunities. Two major challenges come from dealing with stress -- producing situation and from using the tools to enable one to become an effective student.

Doubts and anxieties that produce stress come from a variety of sources, ranging from the separation from family and friends, to interpersonal relationship problems, to selecting a major and

beginning to plan for a future career. A greater source of anxiety for minority and high risk students can often be the academic demands tht they encounter on a predominantly white campus. Academic advisors and counselors are prepared to see a student through difficult and unusual situations.

Though you'd like to know. If you have any questions please call me at 2218.  
Thanks, Gloria
