NEW CASTLE, PA..

LADIES' DEPARTMENT

Location, History, &c.

LOCATION

SLIPPERY ROCK STATE NORMAL SCHOOL is situated midway between Pittsburg and Erie, in Butler county, about 17 miles from Butler, Mercer, and New Castle, and is easily accessible from all points in Western Pennsylvania. Those coming by way of Pittsburg can reach here by the P. & W. and the P., B. & L. E. Railroads, which run morning and evening trains to Kiester Station, three miles distant, or take the West Penn R. R. to Butler, then the P., B. & L. E. to Kiester. Those coming by way of New Castle will change cars at Mercer and come to the same station. At Shenango, the P., B. & L. E. R. R. connects with the N. Y., P. & O., and at Osgood with the Lake Shore R. R., thus affording easy access from the north.

The location of the school is pleasant and healthful. Being situated on a hill, a commanding view of the town and surrounding country is afforded, and it possesses unexcelled facilities for healthful drainage.

There are four churches in town—the Presbyterian, the United Presbyterian, the Methodist Episcopal, and the Reformed Presbyterian, at which the students are always welcome—and it is surrounded by a community noted for morality and intelligence.

HISTORY

During the autumn of 1887, the question of organizing a school in the town was agitated. The project found many friends and soon assumed definite form. A meeting was

called at which it was determined to erect a building and open an academy. Subscription papers were prepared, and the community was canvassed for money to erect a building and support a school until it should become self-sustaining. While this work was in progress, the discovery was made that there was no Normal School in this district. A second meeting was called, at which it was resolved to erect the necessary buildings and apply for recognition as the State Normal School of the Eleventh District. To determine, was, with them, to act. Subscriptions were again solicited, and soon sufficient money was pledged to warrant success.

In the spring of 1888, an organization was effected, a charter obtained, a building committee elected, and the erection of the buildings was begun. All lent ready aid, and through the summer and succeeding winter, work was carried on with vigor.

In the spring of 1889 the buildings were completed, and on the first day of February the committee appointed by the State inspected them. By a unanimous vote the recognition of the school was recommended.

BUILDINGS

There are five buildings—two dormitories, a chapel, a main school building, and a model school. They are situated on a commanding eminence. The dormitories contain 220 rooms, besides a reception-room, large dining-hall, kitchen, store-rooms, etc. The chapel is situated between the two dormitories. It is a fine stone building, 89x110 feet, Norman-French architecture, and contains music-rooms and the general assembly room. This large room has seating capacity for one thousand persons, and a gallery with three hundred additional seats. The endeavor has been made to construct an auditorium of beauty and convenience. The rooms are all heated by steam and lighted with natural gas. The buildings are supplied with pure, soft water. Every floor is provided with an

abundance of hot and cold water, bath rooms, lavatories, and closets of the most approved patterns.

The authorities of the school are determined to do all that can be done to promote the ends for which it was established, and to add to the comfort and convenience of all connected with it. Many improvements have already been made, viz.: stone walks, bath rooms and closet annexes, laundry, Smead dry-closets and ventilating system, grading and ornamentation of grounds, and equipment of Model School. The new main building contains class-rooms, laboratories, parlors, reading-rooms, society-halls, gymnasium, and offices, and is one of the finest school buildings in the State. The ladies' dormitory has been entirely remodeled, and now forms a beautiful building with a frontage of two hundred and twenty feet. A new boiler-house has been erected, and the advantages in steam-heating thereby improved. The boys' dormitory, recently erected, is a very commodious and substantial building, one of the best in the State. It is a model of beauty, comfort, and convenience. Few buildings of its class can equal it in those points that make it a real home for young men who attend the school. The new Model School building, now completed at a cost of \$27,000, adds much to our facilities during the school year. Located directly on the campus, the practice-school does not interfere with the work of the regular normal department. The rooms in the new building are adapted to separate grades, and seniors are placed in full charge of the rooms during the various periods. Since our practice-school is a regular county school, the value of the year's experience thus gained by seniors cannot well be over-estimated.

RECREATION AND AMUSEMENT

Lawn tennis, croquet, and base ball are among the means of recreation already provided. The weekly socials from 6:30 to 7:30 P. M., on Saturdays, are very popular. These

are intended for the boarders, but the day students gladly take part in the evening's enjoyment.

LIBRARY

The Normal Library is open during every school day, when students are permitted to consult works of reference, or take out books for a limited period. On Friday and Saturday of each week, students may secure books for longer periods limited to two weeks.

Many new books have been added to the library, so that its attractiveness and usefulness have been greatly increased. By a judicious expenditure of funds, we hope to make this important aid to the student more valuable from year to year.

A reading-room containing the leading daily and weekly newspapers, magazines, journals of education, church and Sunday-school weeklies, etc., is also connected with the school, with privileges free to all.

LITERARY SOCIETIES

Among the attractions of the school are two flourishing Literary Societies, conducted by the students—the "Bryant" and the "Philomathean." They hold weekly meetings. Any student may become a member of either of the societies by paying a small initiation fee. The training given in these societies is of such great value that students cannot afford to neglect the opportunities furnished for literary or oratorical culture.

LECTURES

Students should have those opportunities for culture which will enable them to become stronger intellectually through mental contact with the strong minds of the country. Through the hearty co-operation of a generous and public-spirited community, we are able to bring before the students many prominent lecturers.

Courses of Study

[As revised and adopted at a meeting of Normal School Principals held at Harrisburg November 8, 1900.]

Two courses of Instruction are provided for, as follows: the Regular Course, and the Supplementary Course.

Each of these courses of study has been prescribed, and provision made for examination by State Committee, as well as for the awarding of a diploma upon the completion of either course. In the present management of this school, attention is concentrated upon

THE REGULAR COURSE

(Studies marked with a (*) are to be reviewed in Senior Year.)

This course is intended for the preparation of teachers for our common schools, and embraces the branches usually taught therein, together with other branches bearing so directly upon them as to be of great value.

It also embraces a liberal amount of professional study, and among the essentials for graduation is the practical work in the TRAINING DEPARTMENT.

The minimum of work of this kind, required of each candidate for graduation, is one period of 45 minutes, each school day, during 20 weeks.

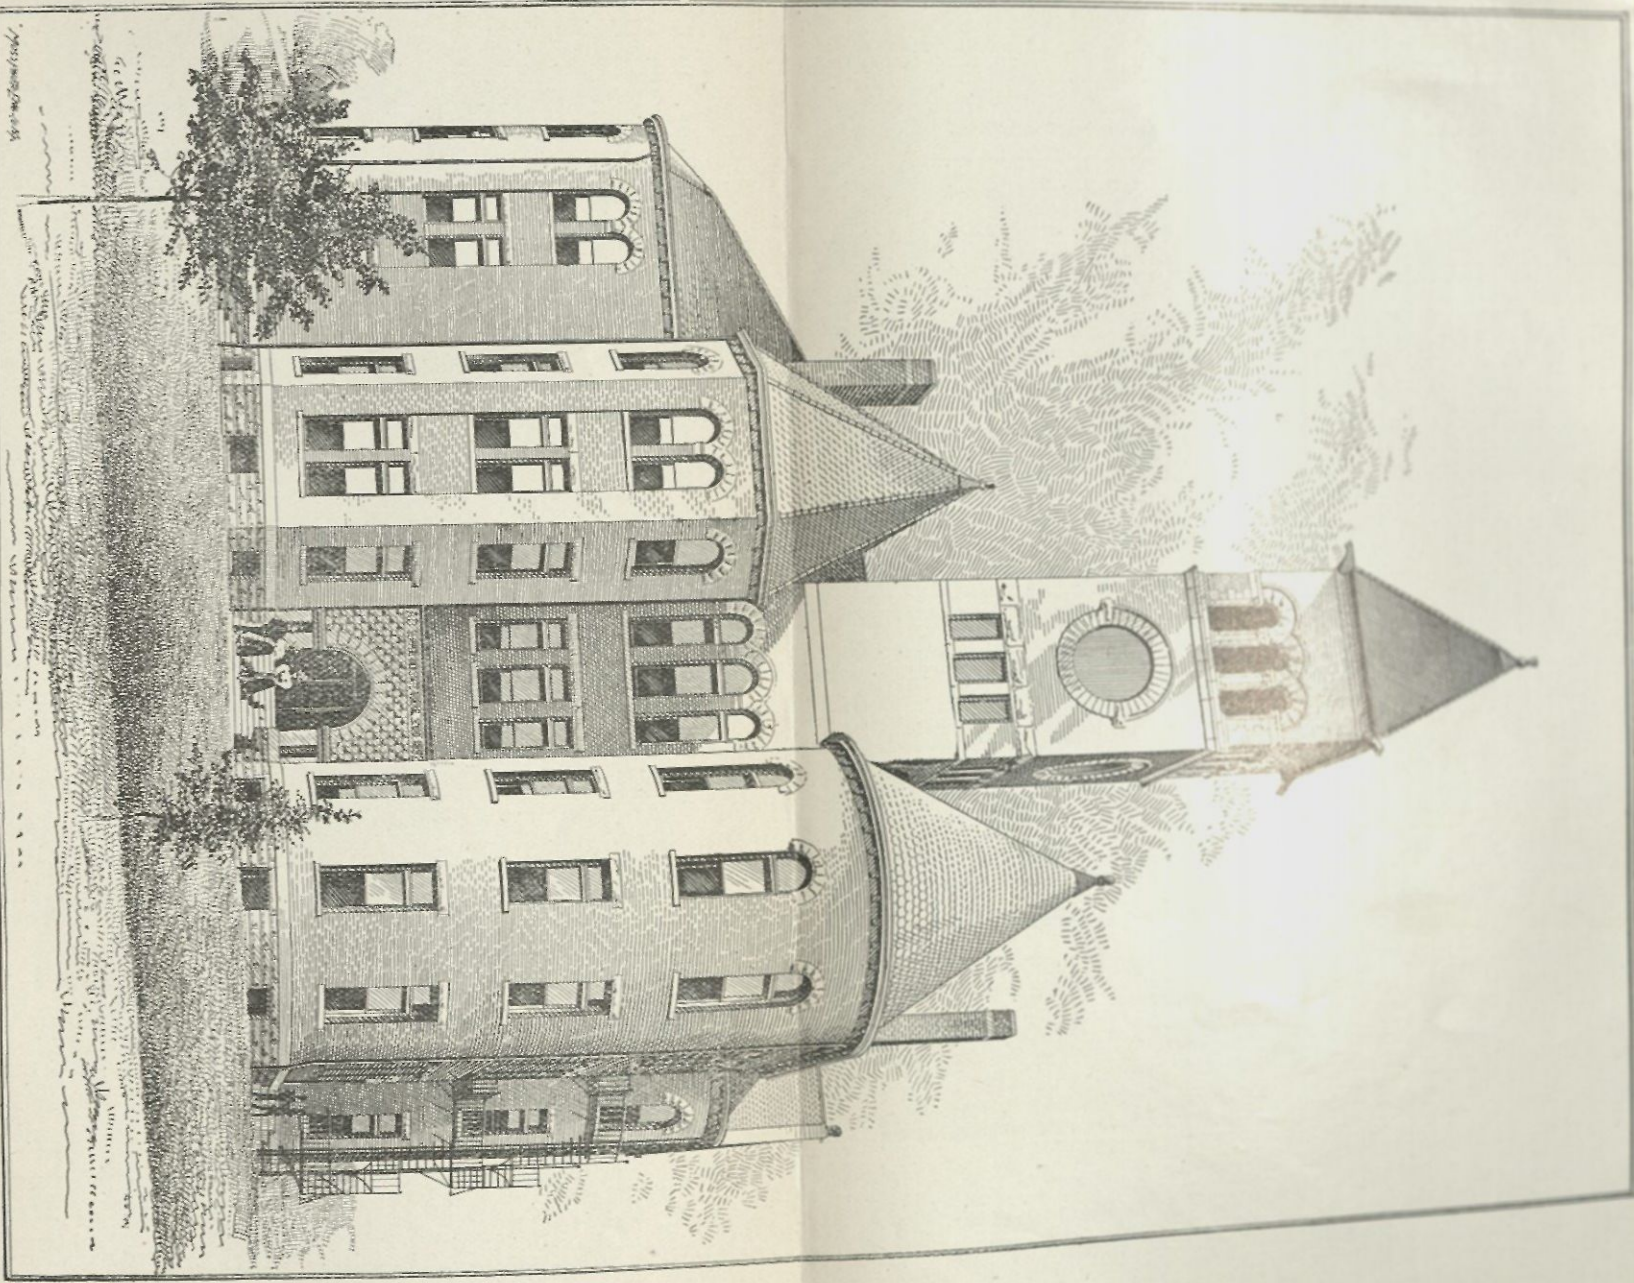

JUNIOR YEAR

PEDAGOGICS.—School Management.

LANGUAGE.—English Grammar,* Reading and Orthography, Latin to Caesar.

MATHEMATICS.—Arithmetic,* Algebra.

NATURAL SCIENCE.—Physiology, Botany.

MAIN BUILDING.
