Message from the Presidents

I am often asked – by alumni and others who are important to the past and future of this great university – why I've placed so much emphasis over the 15 years of my presidency on the growth and success of our international programs.

The answers are simple: First, it is a part of Edinboro University's mission statement to "... develop international relationships with appropriate institutions and agencies for mutual enrichment..." Second, it is my belief that our relationships in the countries where we hold formal educational linkage agreements are indeed forwarding the cause of world understanding. And third, they support my contention that the international dimension we have added to the campus and curriculum benefits Edinboro students from both worlds, domestic and foreign.

I returned recently from a 15-day trip overseas to visit the various institutions with which Edinboro has academic linkages. At the outset, they numbered eight in two countries: seven in Pakistan and one in the Peoples' Republic of China. I am pleased to report that new agreements were concluded with another school in China, an eighth in Pakistan, and one with an emerging new university in Morocco.

Many of our international students have returned to their homelands after their Edinboro stay to assume key positions and important assignments in education, government and business, which reflects favorably upon their education and experiences at Edinboro University. Their presence here helped make our campus environment even more cosmopolitan, a factor which is important in the growth and development of the well-rounded university student.

The transference of cultural awareness I see on the Edinboro campus and observe overseas is a tribute to our commitment to a *real* international education program, one that truly seeks to promote understanding among people of different national and cultural backgrounds, and recognizes that the world community is becoming smaller in the sense of its interdependence.

*Foster F. Diebold, President
Edinboro University of Pennsylvania*

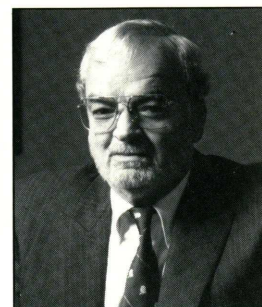

Graduation dates have come and gone for those of us who have seen our sons and/or daughters move into another phase of their lives. My youngest son just graduated from high school and will be joining his older brother at Edinboro in the fall. Thirty years ago this year I joined some 450 other graduates on the old football field behind Centennial Hall to receive my degree. Returning to the Reunion Weekend activities over the years, I've found it brings a real sense of family when alumni from a half-century of graduates join in those activities. With that thought in mind I would like to encourage those members of the Class of 1964 to return to Edinboro this year for their 30th reunion celebration on June 10-12. Whether you come for the whole weekend or just for the Saturday activities, I believe you'll be pleasantly surprised by what you see and what you hear that day.

Over the past three years, I've commented on a variety of topics in support of the University and the Alumni Association. Certainly, the general membership has continued to provide us with their support and guidance for those endeavors. Updating you on one of the major projects of the past two years, your Association now holds the deed to a nice parcel of land on Meadville Street and is moving forward on construction plans for an alumni hall on the site. As we bring the aspects of that project into focus this spring, we intend to bring you complete coverage and photos through the alumni magazine.

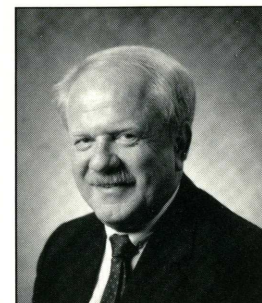

Through the recent Art Awards celebration and the Athletic Hall of Fame, we have seen many outstanding graduates honored. When those "Oscar" awards are coupled with the honorees of Reunion Weekend's listing of distinguished alumni, it becomes evident that Edinboro University has certainly provided a sound and notable foundation for lifelong achievement.

Join in the times; support the many activities of the University; and help us share our experiences with those preparing for a life of success and involvement through the next 50 years.

*David Sheneman '64, President
Alumni Association Board of Directors*

The Circus Train is Coming!

For as long as there have been railroads and circuses, there have been circus trains. For generations, in towns all across America, children – and adults – have eagerly anticipated the arrival of the circus train.

The circus is just as exciting now as it ever was. All of the electronic wizardry of computers and the information superhighway cannot replace the live spectacle of a three-ring circus. And there is no more efficient way of transporting a circus than by train.

Ringling Bros. and Barnum & Bailey Circus, the largest in North America, has two complete circuses on two separate trains – the Red Unit and the Blue Unit. Tom Dillon, a 1975 graduate of Edinboro University, is the person in charge of the Blue Unit, the trainmaster.

One doesn't set out to be a circus trainmaster the way one plans to become a teacher or doctor or even an actor. In Dillon's case, it just sort of happened.

After graduating with a degree in psychology, Dillon found work in his native Pittsburgh area as a laborer with the Penn Central Railroad (now Conrail). He learned welding as a train mechanic and enjoyed a series of promotions over the next ten years – first as a foreman assigned to Steubenville, Ohio; then general foreman in Lordstown, Ohio, and Reading, Pennsylvania; and finally

general foreman for cars and locomotives at Conrail's headquarters in Philadelphia. That's where he was in the summer of 1985 when the Red Unit circus train pulled into town.

Its trainmaster asked Dillon if Conrail would assist in making some repairs. During the Circus' two-week stay, the trainmaster, also from Pittsburgh, got to know Dillon's skills. "You'd make a perfect trainmaster," he told Dillon. "We've got an opening on the Blue Unit."

A few months later Dillon was hired for the Blue Unit job. It was a job made in heaven, combining two of his passions – traveling and railroading. "I had been to Mexico many times, South America, and the Caribbean," he said. "But I had never seen the United States."

As trainmaster, Dillon is in charge of a moving city of nearly 300 men, women and children (not to mention 24 elephants, 10 lions, 6 bears, 18 horses, several tigers and many other animals). The train is on the rails 48 weeks a year, visiting 97 cities and performing 1,070 times on a two-year tour.

Working with the train crew, Dillon oversees every aspect of maintaining and moving the Circus train. He serves as liaison between the Blue Unit and the various railroads that give switching instructions in each city. While moving between cities, he keeps in touch with the locomotive engineer to accommodate the Circus' special needs – water stops for the animals, a crew change for the barn men. His crew oversees all plumbing, cleaning, carpentry, laundry, and septic needs for the train while it is parked in a particular city serving as home base for the Circus personnel.

Dillon's responsibilities include unloading the train when it arrives at a new location, maintaining the entire train, and loading the Circus when the stay is over.

When it comes to packing and unpacking, loading and unloading, the Circus may be the best there is. It takes just four hours for 100 people to break down the entire three-ring show. Everything is packed into crates and wagons and then loaded on the train. Seventeen railroad cars are required just to carry the equipment. The animals are loaded closest to the locomotives where there is less

slack in the couplings, giving a smoother ride. The passenger coaches are next, followed by the equipment cars. Even the wagons are arranged in a certain order. The set-up wagons for the next show are the first in line, so they will be the first off at the next location.

When the Circus train arrives in a new town, the first task is to unload the equipment and set up an animal area at the circus site. It takes only 10-12 hours to set up the entire show. Ringling Bros. and Barnum & Bailey's reputation for efficient transport even attracted the attention of the U.S. military which traveled to San Diego to watch them work.

Once the work of unloading and set-up is done, Dillon and his crew of 12 begin their regular maintenance routine – inspecting, repairing and sometimes replacing wheels, brake shoes, and anything else on the undercarriage of the cars. "All of the wheels and brakes are inspected at every stop," said Dillon. "We attempt to stay ahead of federal safety standards."

It's not just the rail equipment Dillon is responsible for, it's everything in this steel caravan – from heating and air conditioning to carpeting and upholstery to light bulbs and toilet paper. A circus train is really a miniature city. It has its own postmistress, school teacher and purchasing agent. It has no doctor, but it does have a veterinarian. "We are totally self-contained on the train and don't have to rely on outside sources for our comfort," Dillon said. "We're 20th century nomads, traveling from one oasis to another."

The locomotives pulling the train are supplied by the railroads. In the long run, it is more economical to use the railroads' engines than to have its own locomotives. For one thing, the number of engines needed to pull the mile-long train varies from just one in the flatlands of Florida to six in the Rockies.

Until January 13 of this year, the Circus train had 53 cars. Then, in one horrifying moment, 14 cars were destroyed. Dillon was in his coach car around 9:00 a.m. as the train thundered through Lakeland, Florida, at 49 miles per hour.

"It felt like an earthquake," said Dillon, referring to the derailment. He knew immediately what was happening and radioed the engineer in a desperate attempt to

slow the train. It was too late. In just seconds, 16 cars of the train scattered like dominoes. Dillon's car pitched sideways at a 45-degree angle, while another car tore through what had been his living room. He squeezed out an emergency door and put his crew to work looking for the injured.

The accident claimed two of Dillon's close friends: Ceslee Conkling, a 28-year-old clown who had been with the Blue Unit three years, and Ted Svertesky, an elephant trainer who was touring with his wife and two children.

A death in a community like the Circus is like a death in the family. A few days after the accident the Circus held its own memorial service, led by its chaplain, Father Jerry Hogan.

In the best show business tradition, the show went on. "When we opened again in Orlando following the accident it was the most moving show I have ever seen," said Dillon. "There were tears in the eyes of the clowns; the ring where the elephants would have performed was darkened in Ted's honor. The people of Orlando, knowing what the Circus had just endured, gave the performers a five-minute standing ovation.

"The Circus is a family. I love these people," Dillon said. "It's not like working in a corporation. Circus people have incredible fortitude, stamina, and love. We work our hearts out!"

Because the Circus community is a close-knit one, much of the socializing that goes on takes place within the community. While on the road, the dining car is the center of social activity. It's where people play cards, shoot

"It felt like an earthquake," said Dillon, referring to the derailment. He knew immediately what was happening and radioed the engineer in a desperate attempt to slow the train. It was too late. In just seconds, 16 cars of the train scattered like dominoes.

When the Circus came to Pittsburgh last year, Dillon took in the show with around 30 Edinboro alumni and their families. His Edinboro days mean a lot to Dillon. He still carries with him a still-life watercolor painted by his first love when they were both students at Edinboro.

the breeze, or just hang out. In circus slang, the diner car is known as the "pie car." In the early days of circus railroads, the diner car had a reputation for creating delicious pies. Whenever the circus came to town, local citizens would come to the train to buy pies. "Where's the pie car?" they would ask.

Undoubtedly, one of the greatest rewards of traveling on the circus train is the scenery. Dillon said it is especially spectacular on the route from Phoenix to San Diego along the Pacific coast where people on the beaches wave to the train. Mt. Shasta in the summertime, Puget Sound, the Great Salt Lake, and the Rocky Mountains are all spectacular.

While traveling by train may be the best part of circus life, weather can be the worst. Last year, the train was snowbound in Knoxville, Tennessee, and had to detour around the midwest flooding. Although Dillon has never encountered a tornado, he has traveled through some tremendous thunderstorms in Kansas and Oklahoma. The toughest times, he said, are loading and unloading a train in freezing rain or snow.

One of the more unique venues for the Circus is Madison Square Garden in New York. Because the train parks three miles away in Long Island City, the performers take the subway to work. The animals, however, have their own way of getting to the show. After midnight on arrival day in late March, traffic is blocked off, and the animals, led by the elephants, parade through the Mid-Town Tunnel under the East River into Manhattan. Thousands of people turn out in the early

morning hours to watch the elephants emerge from the tunnel and make their way to the Garden. Accompanying them are horses and camels and even a buffalo and a long-horn steer. The lions, tigers and bears are transported by wagons.

Although Dillon has watched the Circus performances dozens of times, he never tires of The Greatest Show On Earth. He has made friends in almost every town the Circus visits, often inviting them to be his guests and giving them a backstage tour. When the Circus came to Pittsburgh last year, Dillon took in the show with around 30 Edinboro alumni and their families. His Edinboro days mean a lot to Dillon. He still carries with him a still-life watercolor painted by his first love when they were both students at Edinboro. Like Dillon, the painting carries a scar from the Florida accident.

The next time the Blue Unit will be in the tri-state area is October 27 to November 6 at the new Gateway Arena in Cleveland. This year marks the 124th Edition of the Ringling Bros. and Barnum & Bailey Circus. Its newest stars are Romeo and Juliette, the first baby elephants born and bred to the Circus.

Anyone wishing to contact Dillon may do so by writing to him c/o the Blue Unit, Ringling Bros. and Barnum & Bailey Circus, 8607 Westwood Center Drive, Vienna, Va. 22182.

— Brian K. Pitzer

SHOW-STOPPING STATISTICS

Show Statistics:

24 elephants
10 lions
6 bears
18 horses
More than 1,000 costumes
6-8 hours to set up rigging
4 hours to tear down rigging

Circus Train and Route:

48 weeks on the road
97 cities visited in two years
1,070 performances in two years
Approximately 350 miles between cities (average)
Longest haul – 1,433 miles from Philadelphia, Pa. to Tulsa, Oklahoma
Shortest haul – 17 miles from Chicago to Rosemont, Illinois

Food Supplies: (per year)

364 tons of hay
46,800 pounds of oats
46,800 pounds of meat
72,800 pounds of elephant chow
62,400 pounds of carrots
39,000 pounds of apples
15,288 loaves of bread

If you make a dental appointment to see Dr. Tom Brown, don't be surprised if you must wait your turn behind a lion, gorilla or an orangutan. Brown, a 1982 graduate of Edinboro University, not only takes care of human teeth, but also volunteers his time for the dental needs of the animals of the Pittsburgh Zoo.

Brown said animals suffer the same kinds of dental problems that humans do – including decay of enamel tooth structures, and broken, chipped, or abscessed teeth. When the zoo's veterinarians are going to perform a medical procedure on an animal they will often ask Brown to come in to check its teeth and oral tissues at the same time. He is called to the zoo about once a month and takes with him a portable dental unit.

His first experience with animal dentistry came at Baylor College of Dentistry during a prosthodontic residency. He assisted a veterinarian colleague in performing a root canal procedure on a spotted leopard at the Dallas Zoo. When he returned to his hometown of Pittsburgh in 1991 he offered his services to its zoo.

Since then he has treated dozens of animals including cleaning all 104 teeth of Chuckles, a bottle-nosed dolphin. Of all the animals he treats, he is most in awe of the big cats because of their size.

Brown, a graduate of Quaker Valley High School, received a degree in biology at Edinboro while minoring in physics and mathematics. For three years he worked at the University of Pittsburgh/Veterans Administration Hospital in kidney research. Because he enjoyed his experiences in the medical field he enrolled in Pitt's dental school and graduated with a DMD degree in 1989. Then it was on to Baylor to gain certification in prosthodontics in 1991.

Anyone who has had a denture, partial denture, crown or other service that restored missing teeth probably has a prosthodontist to thank. Brown calls it restorative dentistry – restoring natural teeth, replacing missing teeth, correcting cosmetic defects and installing dental implants. He helps people who have suffered facial injuries or

A routine day in the life of Dr. Tom Brown might include a periodontal treatment on an adult male orangutan, cleaning and examination for a bottle-nosed dolphin, a root canal on a spotted leopard, or a tooth extraction on a gold lion tamarin. In this photo, a Siberian tiger is patiently (we hope!) undergoing a root canal.

undergone surgical or radiation treatment for cancer.

The part of Brown's job he enjoys most is working with his hands. While at Baylor he earned certification as a dental technician. He makes his own crowns, bridges and dentures. "It's one of those things that comes naturally," said Brown. He has even taken his profession and turned it into a hobby. Using the casting and crafting skills he learned as a technician he taught himself how to make jewelry. "When you make a crown," said Brown, "you are really making a piece of jewelry."

After spending eleven years studying and working at universities in Edinboro, Pittsburgh and Dallas, Brown is ready for his career to take its course. But in the back of his mind he has a desire to someday return to the college classroom as a professor. He has already taught some restoration courses at the college level.

In the meantime, though, he is content to give the best care possible to his patients, even if they can't say thank you.

– Brian K. Pitzer

Award-Winning Teacher Makes Science Fun

If everyone had Ruth Ruud for their sixth grade science teacher, the world might be full of rocket scientists, engineers and molecular biologists. Ruud, who teaches science at Millcreek's new Walnut Creek Middle School, is no ordinary educator. Last year she was the recipient of a Presidential Award for Excellence in Science and Mathematics Teaching. She represented the state and received the award at the official ceremony in Washington, D.C., this past March.

Ruud grew up on Cleveland's west side, the daughter of parents who never made it past the ninth grade. They knew the value of an education and insisted that their children receive as much schooling as possible. "My mother instilled in me the notion that learning is a lifelong process," said Ruud.

Following graduation she worked for 18 months as a long-distance telephone operator before enrolling in elementary education at Ohio University. Her college career was interrupted by marriage in 1964, and a decade passed before she returned to school. By that time the Ruud family was living in Erie, and the youngest of their three children was in school.

Because of her love of learning, a teaching career came naturally to Ruth. She enrolled at Villa Maria and graduated with a degree in elementary education in 1978. She found a job immediately at Our Lady of Peace, and a year later, she joined the Millcreek School District. At the same time she started studying at Edinboro University for a master's degree, which she obtained in 1983.

It was at Edinboro that her interest in science education really blossomed. Dr. Merrick Owen was the director of the University's planetarium and an instructor for Pennsylvania Improvement of Elementary Science (PIES). The program offered hands-on summer science classes for elementary teachers. Ruud took one of those classes and discovered she had a real knack and enthusiasm for the topics, ranging from earth science to rockets. "Merrick is my mentor," said Ruud. "He was one of the first people to instill in me a love of science education. He really inspired me."

It was because of programs like PIES that Ruud has been able to boost Millcreek's

science programs. She has also taken courses in computers, astronomy, and energy and attended the Science Unlimited workshop at Shippensburg University. She has taught first, second and fifth grades, and this is her first year teaching sixth grade at the new Walnut Creek Middle School. "It's a great place to learn and to teach," said Ruud.

In the mid-1980s Ruud was actively involved in NASA's classroom programs and its teacher in space program. It is not difficult to imagine Ruud participating in the teacher in space program. She brings such enthusiasm and dedication to her work. Her students understand and appreciate science because they realize everything they do or touch involves science.

The key to Ruud's success is not what she teaches, but how she teaches. "I care about my students. I want them to enjoy learning. I make learning fun. Science is not an isolated subject. What we learn is relevant to everything the students do in their lives."

Several former students have gone on to careers in science or related fields; two women are currently pursuing engineering degrees.

Another key to the success of the Millcreek science program has been its relationship with private industry. Ruud and the Millcreek School District recently received \$22,000 from the education foundation of International Paper. She also initiated the Millcreek Science, Industry Partnership which involves 12 local industries infused into the science curriculum for grades two through seven.

Ruud has passed her love of learning on to her children. James, her oldest son, has a Ph.D. in physics from Harvard. A research scientist for General Electric, he is attempting to improve one of technology's most basic inventions – the light bulb. Her other son, Scott, is an aerospace engineer in Arizona. Her youngest child, Karen, is a recent communications graduate from Clarion University. It must be noted that Ruth's husband, James, also influenced their children's careers – he has a bachelor's degree in mechanical engineering and an MBA.

– Brian K. Pitzer

Edinboro Grad Helps Reform PLCB

Charles Woods is having the time of his life. He's the director of administration for the Pennsylvania Liquor Control Board (PLCB), and president of the Pennsylvania Council of Alumni Associations (PCAA). He thoroughly enjoys making them among the most efficient and best-run agencies in the state.

"I'm a good government junkie," said Woods. "I try to make everything work better."

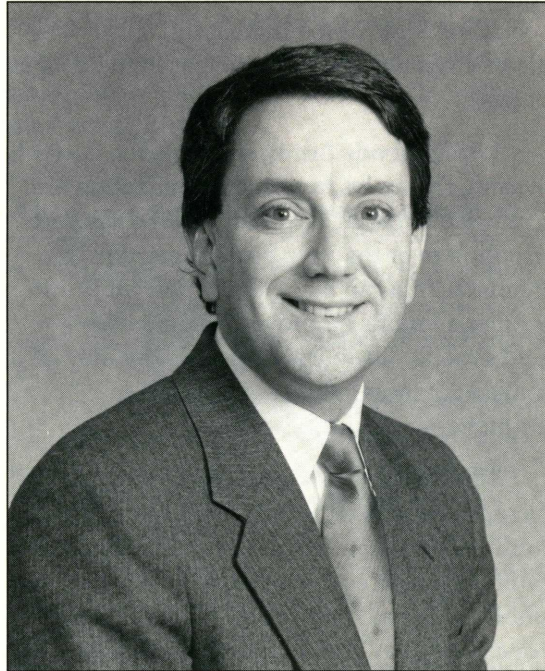

Since graduating from Edinboro University with a degree in political science in 1975 and receiving a master's degree in public administration from the University of Cincinnati in 1976, Woods has worked for many governmental agencies in three states, relishing what he does best, cutting costs.

Today he oversees the administration of an agency with 3,700 employees, 670 stores and \$840 million in sales. If it were a business, the PLCB would rank in the Fortune 500. He's proud of the fact that the PLCB is entirely self-supporting. Last year it produced \$45 million in profit, with a net of five percent on gross sales. Woods said most retail operations are lucky to get three percent.

Woods is one of the key players in a decades-long struggle between those forces that want Pennsylvania's retail liquor business turned over to private enterprise and those who believe the state's citizens are better off just the way it is. Woods is clearly in the camp of a more restrictive system.

His arguments for retaining the PLCB are based on comparisons to other states. "Pennsylvania is far below the national average in social problems from alcohol consumption," said Woods. "Our rates of consumption for wine and spirits are 40 percent below the norm."

The reason for these differences is not apparent to the general public. In 1934, at the end of Prohibition, Pennsylvania adopted an alcohol policy based on the Ontario, Canada, system. Wine and liquor can only be bought through state-owned retail outlets. In

Pennsylvania there is one store for every 17,000 residents. In California, there is one store for every 2,000 residents.

"We have subtle barriers to consumption," said Woods. "We don't advertise, we're not open 24-hours-a-day and holidays. The purpose of the system is not to promote – I don't think that is good public policy. Our employees are well-trained and paid well enough to support a family. They check identification. In other states, two-thirds of under-age purchase attempts succeed."

Woods believes the big difference in consumption rates is due to the way alcohol is marketed in other states. Because Pennsylvania does not sell wine and spirits in grocery and convenience stores, customers in those outlets are not bombarded with glitzy point-of-purchase promotions that make consumption look attractive. Impulse buying is virtually eliminated. Children shopping with their parents are not exposed to flashy come-ons that add to the temptation to experiment with alcohol. If adults want to buy liquor in Pennsylvania, they have to make a conscious decision and deliberate effort to go to a Wine and Spirits Shoppe. It won't be as an afterthought when buying a quart of milk or a newspaper at the local gas station.

"There's a high price to pay for convenience," said Woods. "It's a hidden social cost." He noted there are 100,000 alcohol-related deaths each year in the United States.

While Woods firmly supports the current system, the forces favoring privatization are formidable. Large corporate retail chains are drooling over that five percent margin. "If Pennsylvania can make a five percent profit while paying its employees a good salary," said Woods, "the corporations know they can make a lot more while paying their employees minimum wage."

The best weapon in the arsenal against alcohol abuse is education. The PLCB spends millions of dollars every year and produces millions of pieces of literature to educate the public about alcohol abuse. Woods is very concerned that fifth and sixth graders are now experimenting with alcohol.

As committed as he is to making the PLCB work well, Woods is equally dedicated to promoting the cause of higher education through the PCAA. "We have 300,000 graduates of the State System of Higher Education; 80 percent of them have stayed in Pennsylvania. That's a powerful locomotive for putting people into the economy. My goal is to build a stronger infrastructure for the system, and in turn, help Pennsylvania grow and prosper."

In his role as PCAA president, Woods is the leading advocate and cheerleader for the State System's alumni. Last fall he campaigned on behalf of the System's appropriation request.

"It's critical that alumni of the State System enthusiastically and vocally support the appropriations request," he told alumni. "Adequate funding of the state universities will help to keep higher education affordable and accessible, two traditional hallmarks of the State System."

Woods began his career with the Lincoln Trail Area Development District in Elizabethtown, Kentucky. He was, in effect, a circuit-riding manager for 26 cities in eight counties, serving as a consultant in all aspects of public management. In 1978 he went to

work for the Illinois Department of Commerce and Community Affairs as a management consultant to local governments. It was in this position that he became more specialized, focusing on cost reduction and operation improvement.

While he was roaming Illinois, helping local governments with their problems, his wife, the former Rebecca Garitee, whom he met at Edinboro, was working for the Illinois Senate as a staff researcher. She is a native of Penn Hills, Pa., and he grew up in Carnegie, Pa. They live with their two children in center-city Harrisburg.

In 1982, they began thinking about moving closer to home. Woods made a blind call to Robert Wilburn, a former president of Indiana University of Pennsylvania, who was then Governor Richard Thornburgh's secretary of budget and administration. He seemed to take a personal interest in Woods and hired him in the bureau of management services as a team leader and management consultant. One of his duties was writing detailed recommendations on how agencies could reduce operational costs and improve administrative systems. He prepared recommendations on 50 different programs and agencies, including the PLCB. In 1988 he was given the opportunity by Governor Casey to implement his own reorganization plan for the PLCB.

During his first three years as administrator he reduced operating costs by \$20 million by eliminating 650 full-time positions, distribution centers, and various field offices. He eliminated multiple layers of unnecessary management and doubled agency profits. At the same time, the retail chain was rebuilt with a complete overhaul of selection, customer service, and prices.

In the midst of overseeing these changes, Woods managed to take the summer of 1990 off and graduate from Harvard University's mid-career program for state and local officials. But, as Woods proudly notes, his roots in public service began as a student at Edinboro University.

— Brian K. Pitzer

New Donor Phonathon Completed

The annual spring phonathon focuses on acquiring new donors to the Annual Fund, and this year's efforts brought more than 600 new pledges. Those pledges combined for a total of more than \$15,000 toward the final phase of the Alumni Association's plan to provide scholarship support to Edinboro students.

Compared to last year, the number of new donors was about the same. Our goal this year was to increase the percentage of fulfillment. The results of successful phonathons are exciting, but, in the long run, if pledges are not paid, the Annual Fund cannot be successful and projects may go unfunded.

Combined results of the fall and spring phonathons are:

Alumni spoken to	11,313
Pledges	4,112
Participation rate	36.34%
Amount pledged	\$129,079
Amount paid as of 4/11/94	\$88,440.50
Outstanding pledges	\$40,638.50
Completion rate	68.51%

Reminder mailings have gone out, and more payments have been made since this article was written. If you have not sent your payment, please take a moment today to mail it in. Thanks for your participation!

1993-94 Annual Fund Nears Completion

If you've been waiting to mail your gift or pledge payment for this year's Annual Fund, do it soon! The Annual Fund runs on a fiscal calendar, from July 1 through June 30.

The 1993-94 campaign is the final phase of the three-year plan to help build a strong scholarship program. During Reunion Weekend, the Alumni Association Board of Directors will announce the final \$25,000 endowment creating a dean's scholarship. As a result, alumni donations will have provided an endowment for each of the three schools: Education; Liberal Arts; and Science, Management and Technologies.

Annual Fund totals for this year, including phonathon payments, are more

than \$116,000 (as of 4/11/94). Adding the outstanding phonathon payments would bring the total to more than \$156,000. Please mail your gift today.

Alumni Plan Their Own Gatherings

While the Alumni Office has been active in planning special events and gatherings to bring graduates together, many alumni create their own social gatherings.

Four "ESC" alumni got together for the first time since leaving Edinboro to celebrate the 20th anniversary of their graduation in 1973. (Ironically, they all live within two hours of each other!)

VIVIENE (SHARP) ELLYSON (December '72) taught for 11 years and now lives in a log cabin near Culpepper, Virginia, with her family. CAROL McCALL teaches high school English in Prince Georges County, Maryland. KAREN (LETKE) RIDER, who hosted the reunion at her home in Fredricksburg, Virginia, worked 12 years for the National Mapping Division of the U.S. Geological Survey, and lived with her husband and two sons in Germany for six years before returning to Virginia. BETSY (BROWN) WAGNER has taught learning disabled and emotionally disturbed children in Pennsylvania and Virginia and currently teaches in Lottsburg, Virginia. Her daughter is a sophomore elementary education major at Edinboro.

Pittsburgh area PHI SIGMA KAPPA members have been getting together every summer since 1985. This summer's gathering will be on Saturday, August 6, at Settler's Cabin, Chippewa Grove in Pittsburgh, from noon till dark. For more information, contact Carol (Guenther) Fleming ('80) or her husband John at 412-787-2195.

Choir Alumni Invited to Participate in European Concert Tour

An 11-day choir concert tour of Europe has been scheduled for June 1995, according to choir director Dr. Peter van den Honert. The tour will include Prague, Munich, Salzburg, and Vienna, with plenty of time for sightseeing.

Send cards and letters!

Retired art professor Marjorie Eason would love to hear from her former students and colleagues. Although her permanent residence is Edinboro, she is currently residing in Massachusetts where her daughter, Dr. Erica Eason ('73), is assisting with her treatments for cancer. Marjorie is in great spirits and as feisty as ever! Please write to her at #20 Chapel Street, #202-B, Brookline, MA 02146.

Affinity Card Update

The benefits of having an Edinboro University Affinity VISA card are better than ever! There is no annual fee, and the interest rate has been reduced from 15.5% to 14.5%. Apply now! Call the Alumni Office for more information (800-526-0117).

Pipe and Drum Band Gets a Start

Wouldn't it be great to hear bagpipes playing the Fighting Scots theme song, Scotland the Brave, at home football games? The Alumni Association is helping to make that a reality.

The Board of Directors recently approved a grant of \$3,000 to assist with the purchase of materials and equipment for the new Edinboro University Pipe and Drum Corp. Dr. Gary Grant, director of the Edinboro marching band, has been "instrumental" in getting funding for the bagpipe band. Since the group is not yet an approved student club, they aren't currently eligible for Student Government funding.

There are presently five student bagpipers and one drummer, and additional students are getting involved. They plan to accompany the marching band during fall football games and hope to eventually perform separately.

Anyone interested in assisting with funding or donating equipment or materials should contact the Alumni Office, 800-526-0117.

The cost will be approximately \$1,900 which includes round-trip airfare from Pittsburgh, all ground transportation, sightseeing, and two meals per day. An initial deposit of \$300 will be due by September 16, 1994, with the remaining funds payable in three installments.

For additional information, contact Dr. van den Honert, Music Department, Heather Hall, Edinboro University of Pa., Edinboro, PA 16444, 814-732-2506.

Grads Recognized as Art Educators

Harrisburg was the site of the 1993 Pennsylvania Art Education Association (PAEA) conference last October, and it was a special conference for Louise (Lawver) Garverick '69 and Dr. Sarah (Michelangelo) Tambucci '68.

Louise was chosen by the PAEA as the "Outstanding Elementary Art Educator of the Year." She is currently teaching in the Fairfield School District and resides in Gettysburg, Pa. Sarah is the president-elect of the National Art Education Association. She has been with the Chartiers Valley School District, both as a teacher and administrator.

Other Edinboro alumni at the conference were: Evelyn Askey-Zaleski '78, Norman Brown '72, Beth Cornell '68, Tracy Erlwein '90, Nancy (McBride) and Tom Fralic '71, Sue (Sollon) Hamilton '70, Murley Kay (Boyce) Kight '59, Valerie Lucas '??, Marlene (Gamer) Paulick '60, George Sanfilippo '69, Mary Ann (Chuburko) Schwartz '71, Pat (Wallace) Smith '70, Kathy (Fahlen) Stevens '74, and Gay (Endsley) '73 and Stu Thompson '64.

Alumni Gatherings

Edinboro alumni all over the country have been gathering this year to renew old friendships, meet alumni from other state schools, and celebrate the 10th anniversary of the State System of Higher Education (SSHE).

In January, two events were held in Texas, at Houston and San Antonio.

At the Houston event:

- 1949 Bertha (Pasold) Weed
- 1967 Clare (Steverman) Freas
- 1972 Diane (Macek) Meyer, Barbara (Boyce) Szopa, Ruth (Johnson) Underwood
- 1973 Elizabeth Ann (Wheeler) Davis
- 1974 Rosanne (Miller) Joseph
- 1975 Michael Joseph

- 1977 Malcom Eisenberg, Charleen Hinkler, Peter Lapuma, Shelley Nolan
- 1979 Margaret (Tkacik) Robinson
- 1980 David Allard, Robert Hanna, Michael Kovac, William Scott, Jeffrey Shipley
- 1981 Thomas Greenstone, Lori (Blasko) Hanna
- 1982 Mary (Goedert) Greenstone, Edward Roberts
- 1983 Lawrence Wheeler
- 1986 Melissa Caro
- 1989 Diane Kettis

At the San Antonio get-together:

- 1949 Dewey Davis
- 1962 Charles Battist
- 1966 Ruth (Tubbs) Davis, Lynda (Schambach) Waring
- 1970 David Bucher, Joe McNaul
- 1971 Nancy (McNaul) Everett
- 1975 Thomas Connelly
- 1977 Patricia Romba-Lada
- 1978 Mary (Decker) Quinones
- 1979 Patrick Smith
- 1983 Ed Lada, Janet (Stills) Millard

In February, a crowd gathered at the Babe Ruth Birthplace and Museum in Baltimore for an evening of socializing, trivia, and prizes. Edinboro alumni included Ray Barrett '66, Dan Buzas '83, Christine (Lutkus) and Gary Sizer both '91, and Mickey '67 and Barbara Walker. On hand from the State System Office were Chancellor James McCormick, Vice Chancellor for Advancement Sally Souris, and Assistant Vice Chancellor David Hoard.

The Allentown event occurred near St. Patrick's Day, so everyone enjoyed the Irish food! A large crowd of graduates from the 14 universities gathered and enjoyed an evening of socializing and music by the Kutztown Alumni Band. Edinboro alumni in attendance were Jan Snyder '68, Beth Rapp '73 and her guest, Stephen Siessmayer, and Chuck Woods '75, the current president of the Pennsylvania Council of Alumni Associations. Chancellor McCormick and Assistant Vice Chancellor David Hoard also attended this event.

Thanks to all who have attended these events and helped to make them so successful! Be sure to check your mail for information about future events.

Eight Graduates Honored for Art Contributions

The Edinboro University Alumni Association hosted its fourth annual Art Achievement Awards ceremony on April 16 to recognize the Edinboro alumni, faculty and staff who have given their talents to art and art education.

Now in its fourth year, the Art Achievement Awards program at Edinboro has honored an impressive and diverse group of artists and educators. Past award recipients have included painters and sculptors, gallery owners and museum administrators, filmmakers and set designers, and art educators at the elementary, secondary and university levels.

The eight artists and art educators honored at the 1994 ceremony were Joe Alexander, Evelyn Askey-Zaleski, William Bahmermann, Alfred Bloch, Beth Linden Cornell, David Gamble, Dorn Howlett, and Sam Moses.

Alexander ('73), along with his Edinboro classmate and roommate Sam Moses ('72), operates one of the most successful recording studios on the East Coast. KAJEM Studios has become a world-class operation with a list of clients that reads like a who's who of popular contemporary recording artists and groups.

Askey-Zaleski ('79, '82) has taught art to children and adults for more than 20 years, and is currently an art teacher at Fort LeBoeuf High School in Waterford, Pa. She is an active member of the Pennsylvania Art Education Association and was awarded the Association's Outstanding Art Educator Award in 1986.

Bahmermann ('37) enjoyed more than 40 years in dual careers as a fine arts educator and a commissioned portrait painter. His highly acclaimed portraits hang in many public, private and corporate collections in the eastern United States.

Bloch ('43) began his 36-year career as an art teacher in Erie schools after service in World War II. He eventually moved to California. His versatile career included award-winning work in photography, portraiture, photojournalism, and visual materials production.

Cornell ('68) is the fine arts and humanities adviser for the Pennsylvania Department of Education in Harrisburg. She is the director of education for the

Pennsylvania Council on the Arts, and serves on the executive boards of the Pennsylvania Art Education Association, Pennsylvania Alliance for Arts Education, Pennsylvania Coalition for Arts Education, and the Pennsylvania Music Educators Association, and on the education committees of the Theatre Association of Pennsylvania and the Pennsylvania State Association of Health, Physical Education, Recreation, and Dance.

Gamble ('74, '77) is the national marketing director for American Art Clay Co., Inc., of Indianapolis, as well as a working studio artist. He has developed and taught more than 60 workshops in printmaking and ceramics at schools, universities and art centers throughout the country.

Howlett, a professor emeritus, joined Edinboro's art faculty in 1962 after nine years of teaching and supervising art in Pennsylvania public schools. During his two-decade Edinboro career, he taught courses in art history, art appreciation and art education, and twice served as Art Department co-chairman.

A commemorative bronze sculpture, named the "Waldo" for Edinboro art pioneer Waldo Bates, was created by Chuck McCleary, a member of the Edinboro University art faculty. The original sculpture, along with a complete listing of those who have been honored, is permanently displayed in the University's Doucette Hall. Each award recipient receives a statuette of that sculpture.

Pictured above, left to right: David Gamble, Sam Moses, Joe Alexander, Evelyn Askey-Zaleski, William Bahmermann, Edinboro art professor Dr. Jim McMurray (accepting for Alfred Bloch), Beth Linden Cornell, and Dorn Howlett.

Campuses That Stress Teaching and Community

By
Joye Mercer
Harrisburg, Pa.

Reprinted with permission of *The Chronicle of Higher Education*, where the article first appeared in its October 20, 1993 issue.

In 1982, the General Assembly overwhelmingly passed Act 188, converting the one-time "normal schools," each of which had its own board, to universities. The law removed them from the control of the state Secretary of Education and outlined the responsibilities of the chancellor, presidents, the systemwide board, and the campus-based trustee councils.

"We wanted to increase the stature of the individual institutions and create a true system," says State Rep. Ronald R. Cowell, chairman of the House of Representatives Education Committee. "There was nobody whose primary responsibility was advocacy for the state-owned universities."

Pennsylvania's 14 state-owned universities have grown in stature and visibility

Don't ask James H. McCormick, chancellor of Pennsylvania's State System of Higher Education, about the inner workings of Joe Paterno's football team at Penn State this fall.

Contrary to popular belief, the Pennsylvania State University isn't part of the system. Neither is Temple or Lincoln University, or the University of Pittsburgh. All receive state appropriations, but they are not among the 14 state-owned institutions that are part of the 10-year-old system that Mr. McCormick heads.

Which institutions are? Former teachers' colleges such as Bloomsburg, Clarion, Slippery Rock, and, just to confuse everything a bit more, California and Indiana.

The names of universities in the system may never glide off the tongue. But within higher education in the state, the universities are generally known as places where teaching and community ties are strong.

Not Known for Football

"Let's be honest: A lot of institutions around this country are known by their football teams, or by some other artificial means," says Foster F. Diebold, president of Edinboro University, which boasts nationally recognized programs for physically disabled students. "I think I would much rather be known for our commitment to disabled citizens than as a powerhouse in football."

Over the 10 years of the system's existence, Mr. McCormick says, he and the board have tried to develop programs that simultaneously meet state needs and heighten the reputation of each campus.

One of those efforts includes the operation, since 1987, of the University Center in Harrisburg, which brings the system's universities into a consortium with private colleges to offer undergraduate and graduate courses in the capital.

Act 188, say the presidents, ended the era when campus fortunes were tied to the

political clout of the Secretary of Education or university officials' relationships with key lawmakers.

Politicians' Picks

The act is popular among legislators here, and on the campuses.

About 40 minutes south of the state system's downtown Harrisburg offices is Millersville University, in the state's most agriculturally productive county. Weeping willow trees line quiet streets in the college town.

In a graceful red brick building that once was the college library, Joseph A. Caputo, Millersville's president since 1981, talks about the changes that Act 188 has brought. For one thing, he says, there is now a system that stands up evenhandedly for all 14 institutions.

"That was not the case before," he says. Nothing prevented politicians "from picking institutions to favor."

Those who know Mr. McCormick, a graduate of Indiana University of Pennsylvania, say he doesn't have favorites. Mr. McCormick has spent most of his career with State System institutions, first as a professor and administrator at Shippensburg University and later as president of Bloomsburg for 10 years.

Mr. McCormick says he wants to "create an environment of participation and involvement."

Act 188 may be partially responsible for that. It limits the growth of the central-office staff – which numbers about 50 – by requiring that its annual budget not exceed one-half of 1 percent of the overall system budget, which is \$735 million for 1993-94.

By comparison, the budget for the central office of the much larger California State University System – another group of former teachers' colleges – is 1.5 percent of that system's overall budget.

Douglas Covington, president of Cheyney University, says the system's

structure balances central authority and institutional independence.

"There is delegated authority sufficient to provide effective leadership at the campus level, and there are quality controls in place so that presidents are accountable," he says.

Professors say the law has allowed each campus to maintain its identity. Alice V. James, an assistant anthropology professor at Shippensburg, says her colleagues see themselves as part of a campus instead of a system. Yet she says faculty members across the system seem to share her love of teaching.

"Each campus has its distinct personality," says Ms. James, associate editor of *Scholars*, the systemwide faculty journal. "But when I travel from campus to campus, I feel very comfortable on the others. The faculty are on my wavelength. They have the same approach to education that I do, and so I think there is some kind of unity among the schools."

Unity Prevents Squabbling

Mr. McCormick insists there is also a certain amount of unity among most colleges in the state that has prevented squabbling in uncertain economic times.

"Our philosophy is, we advance our own objectives and never say anything negative about the other sectors," says Mr. McCormick. "And we'd be upset if any of the other sectors took a whack at us."

Charles D. Foust, vice president for academic affairs and provost at Slippery Rock University, says there is also room in the state for institutions that provide an alternative to Pennsylvania's public research universities. Shippensburg enrolls about 8,000 students. In all, nearly 100,000 are enrolled throughout the universities. (Penn State's main campus has an enrollment of nearly 40,000.)

The system has also brought more resources to each of the universities. In the past five years, voluntary giving at system institutions has increased from \$11.8 million to \$32.3 million.

Helping Each Other

Lawmakers have not been particularly generous to higher education in the last few budget cycles – but the State System institutions have been doing better than others.

For 1993-94, those universities received an increase in state aid, to \$364.9 million, up from \$359.3 million. Meanwhile, budgets for the four state-related universities were virtually frozen, and state aid to a dozen Philadelphia-area private colleges, a decades-old tradition in this state, amounts to less this year than it did two years ago.

Edgar B. Shick, a senior consultant with the American Association of State Colleges and Universities, says that being part of a system can make the most difference when one institution is experiencing problems. Mr. Shick studied the Pennsylvania system for a book he contributed to on governance structures that work well.

Varied Commitment

Some say more should have been done. J. Otis Smith, a professor of psychology at Cheyney and a member of the system's 1989-90 planning commission, says the system should have taken a firmer hand in helping Cheyney – the system's only historically black college – to rebuild its enrollment, which in the past had topped 3,000 students.

Now the enrollment is half that number.

Mr. Smith credits the system for giving attention to Cheyney's problems, but he says officials should have encouraged the other, nearby institutions to send students to Cheyney when they could not accommodate them, due to a lack of space.

"I think McCormick has clearly shown to me that he's personally committed to seeing Cheyney strengthened," says Mr. Smith. "The commitment of the institution presidents varies with the individual."

As observers look to the system's next 10 years, they foresee the creation of a few doctoral programs at a handful of universities besides Indiana, particularly the larger institutions like West Chester.

And system officials look forward to still more people understanding just what their system represents.

Says F. Eugene Dixon, Jr., chairman of the system's Board of Governors since its 1983 creation: "We're still in the process of telling people throughout the Commonwealth who we are, but gradually we're becoming better known."

When Cheyney University officials were battling against a budget deficit, frequent turnovers in administrative posts, and plummeting enrollment, the other presidents agreed on a loan to the university and provided some administrators while Mr. Covington, president since August 1992, built his staff.

"The sister institutions released some very able and dedicated personnel to work with me on a loan basis," he says. "And in the past year, we've been able to cut the overall deficit almost in half – to \$3 million."

Justina Baron Alumni Scholarship

The Edinboro University Financial Aid Office has announced that applications are now available for the 1994-95 Justina Baron Alumni Scholarship.

Valued at \$1100 annually, the scholarship is renewable for up to three years as long as the recipient maintains a 3.0 or greater grade point average and has not completed bachelor's degree requirements.

Criteria include: (1) son, daughter, niece or nephew of an Edinboro graduate; (2) minimum of 32 earned credits at the time of selection; (3) 3.0 or greater quality point average; and (4) full-time enrollment during each term of the award. Financial need is not a limiting factor.

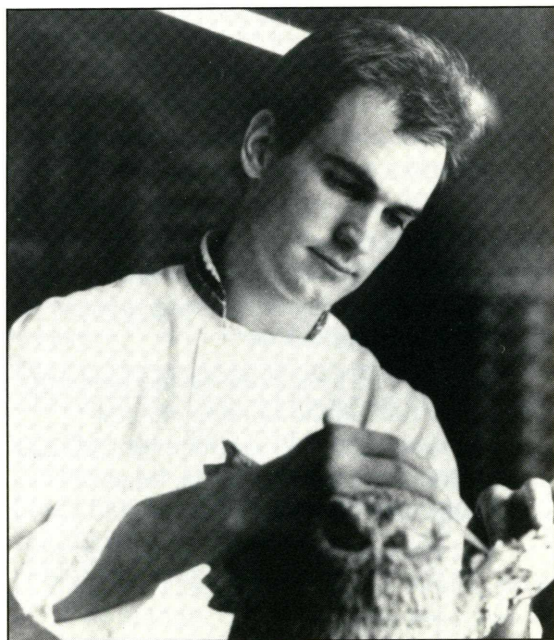

The scholarship is named in honor of Ms. Justina Baron who served Edinboro as a librarian from 1925 until her retirement in 1965.

Applications may be obtained from the Alumni Office or the Financial Aid Office (814-732-2821), and must be submitted no later than Monday, July 25, 1994.

Drug and Alcohol Abuse Program Gains National Recognition

Edinboro University President Foster F. Diebold has announced that the University's ALADIN (Alcohol and Drug Information Network) Project was recognized recently by a department of the federal government. With the official recognition came membership in the U.S. Department of Education's Network of Colleges and Universities Committed to the Elimination of Drug and Alcohol Abuse. The Network is an arm of the Education Department's Office of Educational Research and Improvement.

Developed under a 1993 federal grant, the project was designed to reduce alcohol and other drug use, as well as "binge" drinking. It uses a systems approach to develop a university-wide, multi-dimensional peer education program that offers students the opportunity to examine their attitudes about alcohol, explore their drinking habits, and learn about alcohol's physical, psychological, legal, and social effects.

Chef Jason Bakus puts the finishing touches on an owl he sculpted from dough at Edinboro's Van Houten Dining Hall. Bakus took 70 hours to fashion the owl from salt dough for a competition in Allentown. The owl is painted with cinnamon, nutmeg, turmeric, cayenne and other spices.

Ben Wiley to Chair Council of Trustees

R. Benjamin Wiley, executive director of the Greater Erie Community Action Committee (GECAC) and a trustee at Edinboro University since 1983, is the new chairperson of Edinboro's Council of Trustees.

Wiley has been the Council's vice chair since 1991 and became chairperson effective January 1, 1994, with the resignation of C. Richard Johnston from the chair position.

One of the region's premier social services administrators, Wiley has headed GECAC since 1969 and was its Man of the Year several times. The recipient of numerous special awards, to include the 1988 National Child Labor Council Lewis Hine Award for professional volunteer service to children and youth, he was also last year's recipient of the AFL-CIO Community Services Award from the Erie Central Labor Council.

In 1992, Wiley was one of 25 distinguished Pennsylvania community leaders appointed by Governor Robert Casey to the state's Commission on African-American Affairs, and last year was named the first recipient of the "Chamber President's Leadership Award for Business and Community Service" by the Erie Area Chamber of Commerce.

Trustees at Edinboro are nominated and appointed to six-year terms of office by the Governor of Pennsylvania with the advice and consent of the state Senate.

Professor and Student Honored at Erie Engineers' Week

Since the mid-1960s, the Erie Engineering Societies Council (EESC), an affiliation of 18 member societies dedicated to furthering technical education and strengthening the engineering, scientific and technical professions, has sponsored an annual Erie Engineers' Week and Industrial Exposition.

EESC member societies are encouraged each year to recognize one of their own as the outstanding member. Named by the Erie Section of the American Chemical Society as its outstanding member was Dr. Theresa Thewes, assistant professor of chemistry. A

frequent presenter at conferences and in-service programs, she is involved in improving science education, particularly at the elementary school level.

Also honored at Erie Engineers' Week was Jeffery Steiger, a sophomore in the 3-2 engineering program and one of six Erie area students to receive an EESC Louis W. Balmer scholarship. The Meadville native and member of the University Honors Program will transfer to Penn State after his junior year to complete an electrical engineering degree.

11th Academic Festival a Success

Edinboro University's 11th annual Academic Festival featured a wide range of lectures, presentations and discussions on important educational topics and social issues.

A series of events on women's issues featured a panel of women in the legal profession which included Judge Stephanie Domitrovich, attorney Michelle M. Hawk-Kelley, assistant DA Jane Earll, and attorney Elizabeth Kelly.

Several events were held in conjunction with Black History Month, including a cultural celebration of African-American history and the commemoration of the assassination of Malcolm X.

Art exhibits featured works by contemporary artists from the Pacific Northwest. Several local newspeople took part in a panel discussion on "What Makes News and Why?" One of the highlights of the Festival was a concert by the Colorado String Quartet.

"On-Track" with Rural Education

A \$40,000 grant from the State System of Higher Education will continue Edinboro University's initiative program to improve college attendance by students from rural school districts.

The grant was awarded for Edinboro's "On Track" program, which is a continuation of the Rural Education Access Program (REAP). Begun in 1992 as a pilot project to provide new access opportunities for prospective college students living in rural communities, REAP was also funded by a

State System grant. Grant monies for both REAP and On Track came from special line-item appropriations in the state budget for campus-based rural initiatives at the 14 State System universities.

The On Track program continues activities begun under REAP, including weekend visits to the campus, a week-long summer experience, orientation sessions during the school year, in-service workshops for counselors, training sequences for mentors, and meetings with students and parents in both high schools and homes in rural areas.

Survey Shows Strong Community Support for Fire Department

The positive results of a marketing survey by students at Edinboro for the Edinboro Volunteer Fire Department may have important implications for many other volunteer fire companies. The survey, which was conducted by the marketing research class of professor Sherry Reynolds, showed a majority of the people contacted are interested in volunteering for the fire department.

Nearly 19 percent of respondents indicated they would be willing to consider volunteering for emergency services and more than 58 percent indicated a willingness to consider volunteering for non-emergency services.

Reynolds said the high percentage of people willing to volunteer for non-emergency services is significant because they could free current department members from non-emergency duties.

Another positive result of the survey indicated that the less one is willing to volunteer, the more one is likely to contribute to the fire department. Nearly 65 percent of all respondents contributed to the fire department. "Contributing seems to substitute for volunteering," said Reynolds. "This could mean that community members are supporting their fire department in the only way their time allows: by giving money."

Information from the survey will be made available to other fire departments upon request.

Snow Update

By the count of the number of people who wrote to us or called (or stopped us on the street), it's obvious that we struck a familiar chord with our story, "How Much Did It Snow?" in the last issue. We're writing this on April 20, and assuming that it has finally stopped snowing, Rich Humes of the University's maintenance department tells us that it snowed 223 inches in Edinboro during the winter (and fall and spring) of 1993-94. That's a modern-day record for snowfall in Edinboro since Rich began measuring and recording some 18 years ago. (1977-78's total of 202 inches was the old record.) Actually, it snowed 222 and 7/8 inches, but after the first 18 feet of the white stuff, does 1/8 inch really matter? By comparison, Pittsburgh got 76.2 inches as of April 1, a record for them we understand, and Erie recorded 126 inches, also as of April 1, their second highest seasonal snowfall.

W.A.R.

Sertoma Club Grant Supports Leader Clinic

Thanks to a \$6,000 grant from the Sertoma Club of Meadville, the Leader Speech and Hearing Clinic on the Edinboro campus now provides state-of-the-art speech and hearing services to northwestern Pennsylvania.

At the heart of the new equipment is Speechviewer II, a computer program that allows its users to visualize their speech patterns. This is especially important for people with hearing problems who are unaware of how their speech sounds to others. The new program gives therapists more effective ways to treat clients, because it gives immediate and precise visual feedback.

In addition to the software, the new equipment includes an IBM-compatible computer, printer, a TV with built-in VCR, several video tapes, a CD player, and CDs. The video materials represent Leader Clinic's new emphasis on family-based services. The audio materials will be used to better assess an individual's hearing ability in different kinds of background noises.

The Meadville Sertoma Club is part of the Sertoma International service organization located in Kansas City, which has as its focus speech and hearing disorders. The local chapter has supported the Leader Clinic for the past two years through scholarships for outstanding students. The University is the only nationally-accredited program in speech-language-pathology in the region.

'37 ELEANORE (HARNED) PARKER resides at Springhill Suite #214, 2323 Edinboro Road, Erie, PA 16509. Her son, Bill, was married on February 20, 1993, in Florida. A great grandson, Alexander Michael O'Hara, was born on January 5, 1994.

'60 CHARLES F. TAYLOR is the custom project manager at S.I.T.A. in Atlanta, Georgia. He and his family reside at 1341 Sean Way, Marietta, GA 30066.

COL. GARY S. McKISOCK '64 has been nominated for the rank of brigadier general in the United States Marine Corps. He was commissioned a second lieutenant in 1966 and has served several tours of duty including in Vietnam (1967-68) as a platoon and company commander, and in Saudi Arabia during Operation Desert Storm as commander of a forward logistics support base. McKisock's decorations include the Legion of Merit, the Bronze Star, three Meritorious Service Medals, the Navy Commendation Medal with Combat "V," the Navy Achievement Medal with Combat "V," the Combat Action Ribbon, the Presidential Unit Citation, and the Navy Unit Commendation.

'65 RUTH ANN McKINNEY recently returned from Eatontown, New Jersey, where she corrected the English Composition Test for the Educational Testing Service in Princeton. She is also a table leader for the Educational Testing Service at Trinity University in San Antonio, Texas. She will oversee a group of teachers correcting the Advanced Placement English test. Her mailing address is 507 Homestead Place, Warren, PA 16365.

'69 RITA (MEISTER) YUNKER is a financial planner for Prudential Financial

in Pittsburgh. She resides at 3021 Shelley Drive, Library, PA 15129.

'70 RICHARD McKISOCK is a plant partner with McKissock Data Systems in Warren, Pa. He and his family reside at 16 Crescent Park, Warren, PA 16365.

SUSAN (VICKEY) MILLER, a teacher in the Winslow Township Schools, has been singing for ten years with the Mary Green Singers. She resides at 6 Carriage Lane, Marlton, NJ 08053.

DIANE (MILLER) OHLSEN and her two children reside at 3134 Tamerack Lane, Wooster, OH 44691.

'71 KATHLEEN (PESEK) BECK is a third grade teacher in the Mercer (Pa.) Area School District. She and her family reside at 11 Dogwood Drive, Mercer, PA 16137.

RALPH BUZZARD is the art department coordinator for the Bridgeport (Connecticut) Board of Education. He resides at 16 Great Hollow Road, Monroe, CT 06468.

RALPH KISH was recently appointed supervisor of special education programs for the Allegheny Intermediate Unit near Murrysville, PA.

SHIRLEY E. SHANES was elected vice president of the Board of Directors for the Mental Health Association of Mercer County. She resides at 825 Maple Drive, Hermitage, PA 16148.

JANET (WOJTALIK) YANOSKO is the 1994 president of the Erie Runner's Club. She and her family reside at 508 W. 57th Street, Erie, PA 16509. She is the director of early intervention services for the Sarah Reed Children's Center in Erie.

JOHN YANSON has moved his art studio to 211 8th Street NE, Washington, DC 20002. As of February 1994, he will be represented as an illustrator in New York City by Marie-Christine Matter. He resides at 21 R Street NW, Washington, DC 20001.

'72 DAVID BREEN has moved his law practice from downtown Pittsburgh to Warrendale, Pa. He resides at 3863 Grove Road, Gibsonia, PA 15044.

VICKI L. KIRMEYER and David J. Stubler, November 13, 1993. They reside at RR 1 Box 349, Oil City, PA 16301.

SANDY MARTONIK and Tim Fristoe, November 1, 1992. They reside at Rt 1 Box 288F, Bentonville, VA 22610.

'86 CLAUDETTE MAHONEY and Kevin Mitchell, July 10, 1993. They reside at 11983 Eureka Road, Edinboro, PA 16412.

DONNA MICKEY and Dirk Haney, March 20, 1993. They reside at RD 14, Box 398M, Greensburg, PA 15601.

REBECCA WEIGERT and Frederick Weiser, November 27, 1993. They reside at 2412 Reed Street, Erie, PA 16503.

'88 Robin Murray and JAMES WILLIAMS Jr., October 2, 1993. They reside at 945 Hamlet Court #3, Monroeville, PA 15146.

'89 KARLA BANNON and Solomon Clair, July 31, 1993. They reside in Virginia Beach, VA.

Kimberly Renick and STEPHEN SANDERS, August 28, 1993. They reside at RD 1 Hwy 86, Edinboro, PA 16412.

'90 DOLORES JIMERSON and Jeffrey Tombaugh, November 20, 1993. They reside at 3827 Canterbury Drive #3, Erie, PA 16506.

KIMBERLY McCREA and Patrick Henigin were married recently. They reside at RD 2 Box 229-B, Blairsville, PA 15717. In attendance were: JAYLA FUCCI '90, LORI BREEN '90, and KELLY McCREA-DUKE '90.

Laura Reed and MAX A. STANISCH, October 2, 1993. They reside at 415 E. Burnside Street, Bellefonte, PA 16823.

'91 MONICA DEAN-MARENDI and Mark Marengo, May 8, 1993. They reside at 933 W. Water Street, Bellefonte, PA 16823.

JULIA KNAPP and Eric O'Laughlen, August 7, 1993. They reside at 8920E Golden Oak Drive, Manassas, VA 22110.

Mindi Hodge and CHRISTOPHER LEWIS, October 2, 1993. They reside at 1532 Vista Club Circle #104, Santa Clara, CA 95054.

BRENDA LINDSEY and MARK THOMPSON '91, July 10, 1993. They reside at 1641 Connor Drive, South Park, PA 15129.

'92 Paulette Jayabalan and LARRY GOURLEY, July 24, 1993. They are working and traveling in Asia for the next two years. Their mailing address is: 9955 Jamestown Road, Wattsburg, PA 16442.

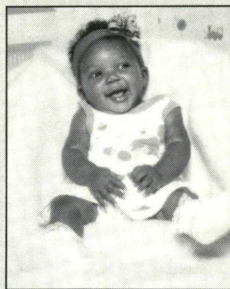

Valarie Eichenlaub and KURT SCHMID-HAMER, August 28, 1992. They reside at 1841 Carson Valley Road, Duncansville, PA 16635.

CAROLYN SMITH and Brian Mottern, April 3, 1993. They reside at 8600 West Lake Road, Lake City, PA 16423.

'93 DARLENE BUSH and Robert DiFua, October 16, 1993. They reside at 322 Whitney Road, Ontario, NY 14519.

MICHELE RYS and Ronald Boyd, May, 15, 1993. They reside at 1733 W. 21st St, Erie, PA 16502.

BIRTHS

'76 ▲ MARLENE (DASHIELL) SPELLS and Anthony Spells a daughter, Taylor Marie, May 23, 1993. They also have a son, Anthony Jr., age 17. They reside at 515 Woodhill Court, Grapevine, TX 76051.

'77 Jan and NORBERT KENNERKNECHT twin girls, Margeaux Gabrielle and Marielle Bridget, July 20, 1993. They reside at 209 Blackstone Drive, Erie, PA 16505.

'78 Teresa and TIMOTHY KATCHUR a daughter, Taylor Elizabeth, August 27, 1993. They reside at 7007 Westwood Drive, Conneaut, OH 44030.

KATHLEEN R. NELSON and Jim Moyer a daughter, Lauren Ruth, December 22, 1993. Their mailing address is Box 215, Linesville, PA 16424.

'80 LINDA (GUTHRIE) and CHRISTOPHER WORLEY a son, Kevin, October 30, 1993. They reside at 13489 LaPlaisance Road, Monroe, MI 48161.

'81 STARR (WILLIAMS) and Jeff SCHAEFERLE adopted a son, Tyler John, December 23, 1993. They reside at 1206 Staley Avenue, Frederick, MD 21701.

'82 Breda J. and CLIFTON CROSBIE III a son, Ian Patrick, October 14, 1993.

They reside at 4921 SW 196th Lane, Fort Lauderdale, FL 33332

'83 JULIE (ALLEN) and Richard Cupps a daughter, Alexandra Marie, August 28, 1993. They reside at 240 Baxter Lane, Butler, PA 16001.

Lora (Klinginsmith) and JEFF HANNOLD a son, Nathan Mark, November 27, 1993. They reside in Meadville, PA. He is a machinist at T & J Molds of Guys Mills, PA.

BONNI (CURRIERI) and GARY LAMEY '83 a daughter, Rachel Elise, August 16, 1993. They reside at 4824 N Parkway, Kokomo, IN 46901.

MARLA (RIVERS) and Brad Yasinsky a son, Tyler Douglas, August 8, 1993. They reside at 99 Vogel Road, Butler, PA 16001.

'84 AMY (SILVERMAN) and John SUKAY a son, Jordan Ryan, December 16, 1993. They reside at 739 Bar Harbor Drive, Pittsburgh, PA 15239.

ELIZABETH (BROWN) and Andy ZAFIROPOULOS a son, Andreas Nickolaos III, September 2, 1993. They reside at 1103 Ardmore Avenue, Erie, PA 16505.

'85 Debbie (Krysiak) and PAUL PRZEPIERSKI a son, Kyle Andrew, November 7, 1993. They reside at 2501 E. Gore Road, Erie, PA 16510.

Bonnie and CHRISTOPHER VAIDEAN a daughter, Angela Lou, September 24, 1993. They reside at 2789 Sleepy Hollow Drive, Kalamazoo, MI 49002.

RONALD F. WALDINGER and his wife a daughter, Carlie Nicole, July 23, 1993. They reside at 1125 W. 5th Street, Erie, PA 16507.

'86 HOLLY (HOLLENBAUGH) and JOHN FOGLE '84 a son, Max Alan, January 1, 1993. They reside at 115 Murrysville Road, Trafford, PA 15085.

VICKIE (BLISS) and JOSEPH NANIA '86 a daughter, Angela Betta, November 27, 1993. They reside at 105 Holiday Park Drive, Pittsburgh, PA 15239.

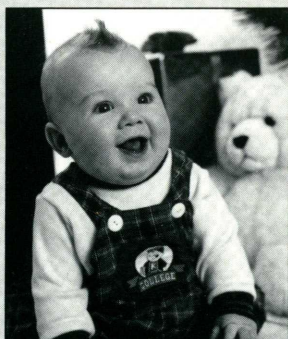

CAROLYN (DERUBEIS) and BRYAN SMITH '87 a daughter, Aleasha, Novem-

ber 10, 1993. They reside at 17821 Marcella Road, Cleveland, OH 44119.

MICHELLE (BAILEY) and JESSE SMYERS '85 a daughter, Syndney Louise, February 14, 1994. She joins her sister, Samantha Nicole, one year old. They reside at 3446 Mt. Troy Road, Pittsburgh, PA 15212.

LINDA (SAVOLSKIS) TERRICK and Rick Terrick a daughter, Emily Marie, November 3, 1993. They reside at 1067 Huston Drive, West Mifflin, PA 15122.

'87 DARLA (BAXTER) and Tim ELDER a daughter, Breanna, February 3, 1994. They reside at 12951 Cambridge Springs Road, Edinboro, PA 16412.

▲ Janine and D.J. KEISLING a son, Trenton James, June 21, 1993. They reside at 927 Elkton Street, Pittsburgh, PA 15220.

'88 LYNN (HOOK) BROWNING and her husband Scott, an Edinboro football coach, a boy, Andrew Scott, on April 6, 1994. The Browning family, including "Bud" the dog, reside at 12221 Skyview Drive, Edinboro, PA 16412.

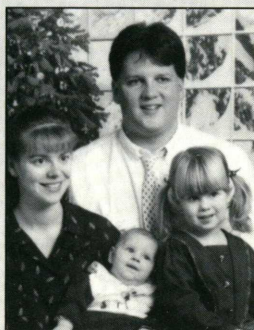

Sherri L. and PETER J. KAPPAS a son, James Peter, December 23, 1993. They reside at 80 13th Street, 2nd fl., Ambridge, PA 15003.

MISTY (YAWORSKY) and JASON MANZ '89 a daughter, Jillian Elizabeth, December 18, 1993. They reside at 13830 Oneida Drive, Delray Beach, FL 33446.

DENISE (ARNOLD) OTTENI and Scott Otteni a son, Nicholas Scott, October 28, 1993. They reside at 5493 West Road, McKean, PA 16426.

CHRISTINE (MORRIS) and ALEXANDER ROCK '89 a daughter, Colleen

Marie, May 25, 1993. They reside at 3932 Sheperd Road, Gibsonia, PA 15044.

▲ JAN (GEHRINGER) and MICHAEL LoPRESTO '87 a daughter, Emily Rachel, September 12, 1993. They reside at 352 Old Creek, Saline, MI 48176.

▲ ANGELA MEDZIE's daughter, Krysten Angela, celebrated her sixth birthday on January 5, 1994. They reside at 512 E. 4th Street, Clearfield, PA 16830.

JENNIFER (FINK) WEBB and Richard Webb a son, Zachary Stephen, May 20, 1993. They reside at 11333 Mesquite Lane, Lusby, MD 20657.

CHRISTINE (THOMAS) ZOFCIN and Raymond Zofcin a son, Zachary Anthony, November 6, 1993. They reside at 500 Fifth Avenue, Carnegie, PA 15106.

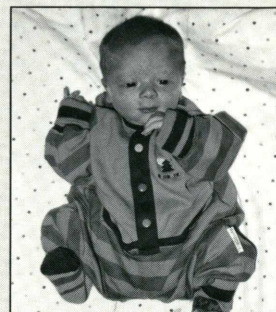

'89 STEPHANIE (EMMERT) ACKMAN and JAMES ACKMAN '88 a daughter, Amanda, September 17, 1993. They reside at 2934 Poplar Street, Erie, PA 16508.

SUSAN (HINES) and DANIEL PISKOR '88 a daughter, Diana Marie, January 4, 1994. They reside at 9850 Hagel Circle, Lorton, VA 22079.

Pam and ANDREW TERRY JR. a son, Benjamin Luke, February 21, 1994. They reside at 8782 Chesapeake Lighthouse Drive, North Beach, MD 20714.

▲ LORI (GERHART) GIBBS and Jonathan Gibbs a son, Connor Tyberius, October 18, 1993.

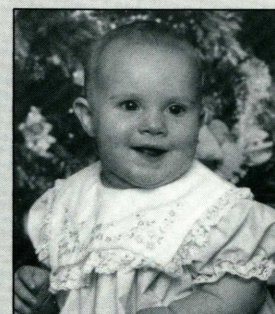

▲ KAREN (HARTMAN) and TIMOTHY JAY '91 a son, Connor Reid, October 25, 1993. They reside at #2 Shangri-La Circle, Pittsburgh, PA 15239.

'90 DENISE (ARNOLD) and Scott Otteni a son, Nicholas Scott, October 28, 1993. They reside at 5493 West Road, McKean, PA 16426.

CHRISTINE (SUTYAK) and KEITH SMITH '90 a daughter, Courtney Jayne, August 20, 1993. They reside at 30107 Thomas Street, Willowick, OH 44095.

'93 MELISSA (ALLEN) VOGT and her husband a daughter, Lindsay Rachel, August 5, 1993. Their mailing address is PO Box 487, Saegertown, PA 16433.

'92 ▲ STACY (MUMAU) and BRUCE BECKER '92 a daughter, Saman-

tha Erin, April 19, 1993. They reside at 9977 Darrow Park Drive #124A, Twinsburg, OH 44087.

Pictured above, front row, left to right: Gary Stanton, Michael Zahorchak '37 (accepting for the late Alex Crevar) and Greg Beardsley. Back row: Roger Stubbe and Dennis Rice.

The Edinboro University Athletic Hall of Fame inducted five new members at its 13th annual banquet on April 30. Honored this year were Greg Beardsley ('83), the late Alex Crevar ('37), Dennis Rice ('83), Gary Stanton ('79), and Roger Stubbe ('74).

Beardsley had an unparalleled running career in the early 1980s. Edinboro's Sox Harrison Award winner in 1983, he captured the NCAA II individual cross country championship his senior year and later was a United States Olympic trials qualifier. He was a five-time All-American, a two-time PSAC Athlete of the Year, and was selected as an alternate on the USA World cross country team.

Crevar, originally from Aliquippa, Pa., played football at Edinboro in the 1930s and went on to perform for the Warren Red Jackets, a local professional team. From 1939 to 1959, Crevar's coaching and administrative career included extended periods at Hopewell and Brentwood high schools. He previously earned Hall of Fame honors from the Western Pennsylvania Football Coaches Association and Aliquippa High School.

Rice, currently head track and cross country coach at Wooster College in Ohio, was captain of the 1981 NCAA national

runner-up cross country team. He earned All-America honors in cross country and track and earned numerous All-PSAC and All-Regional honors, according to Coach Doug Watts, "simply through hard work."

A native of Cleveland, Stanton roamed the interior for the basketball team from 1974 to 1978, helping the 'Boro to a 66-37 record during his career. He currently stands 12th on the all-time scoring list with 1,177 points and 3rd in rebounding with 841. His 147 career blocked shots are second best in Edinboro history, while his 101 games played is sixth highest among all Edinboro basketball players. He was an annual All-PSAC and All-District all-star choice.

Stubbe, a resident of Naples, Florida, starred for the baseball team in the early 1970s and led the 'Boro to its lone PSAC crown in 1972. He was an NAIA All-District 18 all-star choice for four consecutive seasons and was picked from among the Conference's best players for three straight years. Following graduation from Edinboro, Stubbe taught in the Ft. LeBoeuf School District in nearby Waterford, Pa., for 11 years.

The evening also recognized the University's male athlete of the year, Price Williams (basketball) with the Sox Harrison Award. The female athlete of the year, Kathy Balcum (swimming) received the Nancy J. Acker Award, and coach of the year honors went to Greg Walcavich (basketball).

Eighteen charter members were inducted into the Hall of Fame in 1982. The University has annually recognized individuals who have distinguished themselves through their association with athletics at Edinboro, either by virtue of their performance or by their meritorious efforts on behalf of the athletic program.

Basketball Team has Best Season Ever in Division II

There may have been better overall records, but the 1993-94 edition of the Fighting Scots basketball team accomplished something no other team in school history had ever done – they won a game in the NCAA Division II national playoffs.

Finishing the year 20-8, coach Greg Walcavich's third 20-win season in five years, the Scots advanced to the NCAA East Regional semifinals with a convincing, 88-67, victory over West Chester University. The Scots then fell to East Regional champion IUP in a semi-final matchup.

The Scots won 12 of their first 14 games, including a victory over Gannon University (69-58) in the championship round of Edinboro's Daniel Overheim Memorial Tournament, and finished as the #14 ranked squad in the final NCAA II poll, Edinboro's highest ranking ever. Playing in the Pennsylvania State Athletic Conference – arguably one of the toughest conferences in the country – the Scots' 8-4 Western Division slate was only good enough for a third-place finish, behind IUP and California.

Plenty of top individual performances highlighted the season as forward Price Williams and guard Tyrone Mason were named to the All-PSAC West all-star squad. Williams was also tabbed first-team East Region by the National Association of Basketball Coaches (NABC). A product of F.W. Ballou High School in Washington, D.C., Williams tallied 557 points (19.9 ppg) this season, tying the fourth highest single-season total in school history. He led the Scots in 15 statistical categories, including scoring, rebounding (8.9), three-point field goals (59), blocked shots (24) and steals (73).

Mason, a sophomore from Philadelphia, was named to the second-team conference squad for his brilliant play at the point guard spot. He was second to Williams in scoring (16.5) and steals (52) and led the team with 156 assists.

Other seniors making strong contributions were guards Ron Santiago and Walter Reap, center Lasana Crider, and forwards Charles Zollicoffer and Alex Boyden. Mason will lead the charge next year,

along with returnees Phillip Melton, Johan Clay, Chris Paris and Ernest Giles.

Two Lady Scots Named to PSAC West All-Star Team

Despite missing the NCAA Division II playoffs for the first time in three years, the Lady Scots placed a pair of players on the Pennsylvania State Athletic Conference's Western Division all-star basketball squad. Guard Lori Montgomery, the 1992-93 Western Division Rookie of the Year, and forward Shauna Nevel were recognized by the Conference coaches.

A sophomore from East Palestine, Ohio, Montgomery was named despite missing three conference games with an ankle injury. She led the team in field goal percentage (42%) and three-point percentage (38%) and was second on the team in scoring (14.0 ppg). She also registered 68 assists and 49 steals, both third on the team. She bettered her previous career high of 21 points per game five times this past season, including a 28-point effort in a 99-71 victory over Seton Hill College.

Nevel, also a sophomore, will team with Montgomery to give the Lady Scots a great foundation for next season. She led the team in scoring (16.0) and three-point field goals (13) and was second in rebounding (6.1) and steals (63). Nevel eclipsed the 30-points-per-game mark four times this season.

The lone senior on the squad was forward Cathlene Criss, who finished her career as a four-time University scholar-athlete for her 3.0 cumulative grade point average each semester.

Also contributing to the Lady Scots' 10-15 record were guards Pam Artman, Kim Jaeger, Lee Piccioni, Diana Holder, Laura Day and Christine Roppolo, and forwards Sedessa Grushecky, Sandi Blum and Karen Gibbs.

Wrestlers Ranked #10 in Division I

Under the direction of three-time Olympic medalist Bruce Baumgartner, the Fighting Scot wrestling team posted an impressive 15-2 dual meet record this past

season and finished #10 in the final *Amateur Wrestling News* NCAA Division I rankings. The dual winning percentage of .882 was the best in school history.

The squad also accomplished an Edinboro first – winning the prestigious Eastern Wrestling League (EWL) dual meet crown with a perfect 6-0 mark. At the EWL championship, the Scots finished just two points behind rival Clarion University, as the Golden Eagles claimed a victory in the final match.

In a season full of noteworthy performances, 158-pound sophomore Tony Robie posted the team's top individual effort. The Scots' lone EWL title winner, and the youngest ever, he earlier captured the PSAC crown, along with teammate Tom Shifflet in the 150-pound division. Robie earned 40 wins in 44 matches to post the second most single-season victories in school history behind Terry Kennedy's 43 victories in 1987-88.

With a career mark of 59-16, Robie finished 2-2 at the NCAA Division I national championships held in Chapel Hill, North Carolina. Shifflett, an All-American as a freshman and sophomore, also finished 2-2 at nationals and posted a 15-5 overall slate this season. With a three-year career record of 82-29-1, he ranks 10th on the Boro's all-time chart.

Also qualifying for nationals this past season were Matt Whitmer, Ken Bauer, Jason Robison, and Jason Loukides. Whitmer earned 23 wins against 14 setbacks in his senior season. Bauer, who made his fourth consecutive trip to the national tournament, ranks seventh on the Boro charts with a career record of 91-31-4. Robison posted an impressive 29-12 season as a freshman, and Loukides finished in the top 12 at the national tournament with a 3-2 record. He concluded his four-year career with a 92-38-2 slate.

Men and Women Swimmers Earn 33 All-American Certificates

Under the guidance of first-year coach Dan Langan, the men's and women's swim teams made their presence known in the PSAC and shocked the field at the NCAA Division II national championships.

Led by seven Fighting Scots, the men placed a school-record fourth at the championships in Canton, Ohio, while the

women finished 21st, paced by lone participant Heni Toth. In all, the eight Edinboro swimmers returned with 33 All-American certificates and seven school records.

Tony Knapp and Dave Lechler highlighted the men's team efforts, placing at All-American levels in seven events. Both athletes finished in seventh place, Knapp in the 100-yard freestyle and Lechler in the 200-yard freestyle. Also claiming All-American honors were Steve Kast, Gregg Sarbak, Jon Grafious, Chris Rhodes, and Brett Ramming.

Just a freshman, Toth captured All-American honors for the women in the 100-yard butterfly, 100-yard breaststroke, and 200-yard individual medley as she led the Lady Scots to a top 25 showing among the nation's elite.

Former Fighting Scots Drafted

- ✓ Tackle Tony Tighe, a 6-7, 303-pound native of Toronto, was recently drafted in the fifth round by the Saskatchewan Rough Riders of the Canadian Football League.

A three-year starter on the Scot offensive line, Tighe was named to the PSAC Western Division All-Star squad while leading Edinboro to an 8-3 overall record and their second straight trip to the NCAA playoffs. Known as the team's most consistent performer last season, Tighe helped the Scots average 200 yards per game rushing during his three-year starting career.

- ✓ Former Harlon Hill Award runner-up and two-time All-American wide receiver Ernest Priester signed a pre-season contract with the Cleveland Thunderbolts of the Arena Football League.

Priester, who concluded his career with the Scots in 1990, finished as one of Division II's all-time great pass catchers. He led the country in yards per game receiving (132 ypg) and scoring (12 ppg) his senior year. He is the Boro's all-time leader in career receptions (147), career reception yardage (3,064), single-season reception yardage (1,128), career receiving touchdowns (35), single-season receiving touchdowns (16), and yards per catch (20.8).

SUMMER STUDY ABROAD

Edinboro's Office of International Studies, Programs and Services is offering six destinations in its Summer Abroad Program for 1994.

June 12-26Rabat, Morocco

July 8-23Moscow

July 9-23Rome

July 23-August 7Karachi, Pakistan

July 26-August 12Zibo, China

August 13-27Oxford, England

For additional information, see page 16 of this magazine or contact the Office of International Studies, Programs and Services, 814-732-2770 or 2924.

ALUMNI REUNION WEEKEND

June 10-12, 1994

Friday, June 10

All-day registration and dorm check-in
Evening barbecue

Saturday, June 11

Breakfast buffet
