

TRMC Meeting Minutes 9/29/17

Lab Updates:

- Cell Culture – All is good
- Prep Room – New dishwasher? Hmmmm.... Also biohazard takes only biohazard material. No wrappers or towels in biohazard.
- Rat Room – All is great
- Bd – CHCKS thawed, nothing until after shindig
- BTV – Formed a new mutant virus!
- Acetaminophen – Dissection this Sunday!
- Biofilm –
- Compound I –
- Compound P – Distillation this weekend, Check the Facebook page!
- HSC –
- Annexin 1 –

Smith Lab News:

- Make sure everyone is disposing of non-biohazard in the trash and not the biohazard!
- Any full chemical waste bottles that are full, notify Dr. Smith ASAP to have it removed. Full waste DOES NOT leave the chemical fume hood.
- Micropipettors should never leave the calibration range (i.e. P200 shouldn't be set anywhere outside of 20uL-200uL). If you don't know how to use one, LEARN IT before using it!
- Dr. Natasha Dias has a 5% CO2 incubator on the counter to the right of the hood. Do not use her incubator unless your cultures require 5%. Smith Lab incubator is 10% CO2.

TRMC:

- Haunted dorms are still coming up!
- Relay for Life – April 7th

Anniversary:

- Get on the Smith Lab Facebook page so you can access the doodlepool link in which people can sign up for the welcoming team in the morning. If you are interested, the welcoming team is going to be in the atrium of the STC at a sign in table.
- Anyone interested in setting up, arrive at 7:30 am.
